

Know Northumberland

Northumberland in Context

This quarterly bulletin is produced by the Northumberland County Council Digital Team to give a Northumberland update of statistical changes and headlines across a range of topics. The first two pages provide a general overview, the remainder of the bulletin focuses on specific topics. **This issue covers housing and quality of place**

Population

Northumberland is home to 316,000 people and covers an area of 5,013 km², of which 96.7% is classed as rural. 49.1% of the population live in rural areas compared to the North East (18.8%) and England (18.9%)
The number of people aged 65+ is set to increase by 60% by 2035 (North East 53% and England 60% (2012 based population projections).
Life expectancy at birth for males is 79.4 and females 82.5 (2012-14).
The county is sparsely populated with 63 people per km² (North East 304 and England 411 (2013)).
51% of the population live in the 3% of urban land based mainly in the South East of the county

Deprivation

13.2% of the population live in one of the 10% most deprived areas of England compared to 16.98% in the North East and 9.9% across England (2015).
20.8% of the population are classed as income deprived and 25.4% are employment deprived (2015 IMD).

Crime

Crime rates (per 1,000 population) are low in Northumberland at 39.5 which is the lowest rate in the Northumbria force area and the North East (60.3) and England (64.5) (Sept 15 Crime Survey England and Wales).

Economy and the labour market

GVA (Gross Value Added) is much lower in Northumberland. GVA per head stood at £14,979 compared to £18,216 across the North East and £24,958 for England (workplace based GVA 2014)
Unemployment is higher than the national level, 2.2% claim Job Seekers Allowance which is lower than the North East rate of 2.6% (Dec15).
The employment rate in Northumberland is 78.6% compared to the North East (75%) and England (77.8%) (Oct14-Sept15).
Wages in the county are lower than the country figure, with the weekly average (median) pay being £447 compared to £532 in England (2015).

Housing

There are 149,750 dwellings (2014) in Northumberland. The average house price (median) is £147,000 (ranging from £245,00 for a detached to £83,500 for a flat).

Children education and skills

The percentage of children achieving 5 or more GCSE grades A*-C (inc English and Maths) is 56.7%, compared to the North East (54.4%) and England (52.8%) (2014-15).

Maps showing different geographic boundaries and areas within Northumberland can be found on the Northumberland Knowledge website.

Statistical profile of Northumberland, by topic and indicator, shows how Northumberland compares to England, other LAs (lowest and highest rates), and the North East and England average figures.

Affordability

The table shows the house affordability ratios in Northumberland compared to England. However, it should be remembered that the affordability of home ownership is just one part of the affordability equation. The ratio of mean house prices to median earnings in Northumberland in 2013 was 5.8, compared to a ratio of 6.7 in England. When looking at the ratio of lower quartile house prices to lower quartile earnings shows a ratio of 5.0 for Northumberland and 6.45 for England in the same year.

Source: ONS based on data from the latest Annual Survey of Hours and Earnings and sales and valuations over last 12 months

Additional housing

In 2014/15, 1,450 additional dwellings were provided in Northumberland. This is higher than the number in 2013/14 (560). The number of affordable homes provided in 2014/15 was 520, an increase from the previous year of 260.

TRANSPORT AND ACCESS TO SERVICES

Transport network

The current transport network of Northumberland includes the following assets:

A roads	377km
B roads	641km
C roads	1,526km
Unclassified roads	2,502km
Road bridges	1,460
Lighting columns	43,750
Highway signs	45,772
Traffic signals	336
Bus stations	6
Bus stops	3,842
Railway stations	17
Footways	2,276km
Public rights of way	5,078km

Car traffic

The number of vehicle kilometres made by cars in Northumberland increased by 3% between 2010 and 2014 to 2074 million km. This is the opposite of the figures for the North East and England where the number of kilometres fell by 3% over the same period.

Average minimum travel time¹ to reach the nearest key services

In 2013, the average minimum travel time to reach the nearest key services by public transport or walking in Northumberland was 11 minutes, the same as the figure for the North East, but lower than England (12mins). In 2013 the average time by cycle in Northumberland was 14 minutes, which was longer than the time taken across the North East and across England. By car, the times were much reduced, with a minimum travel time of 7 minutes² in Northumberland and 6 minutes² in the North East, and England.

	Cycle	9	9	9
	Car (old/new ² methods)	6	6	6

Congestion

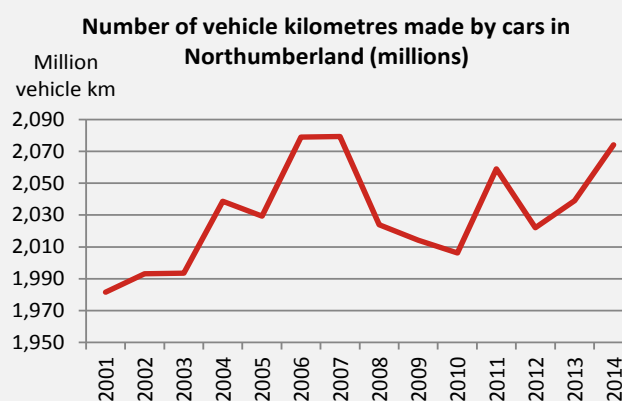

With the exception of a few major links, highway congestion is not considered to be a real problem in Northumberland. Congestion levels do need to be monitored, however, to ensure that the projected increase in car ownership does not mean it becomes a problem in future. (Source: Northumberland LTP)

The average journey time per mile during the morning peak on local authority A roads has decreased slightly over the past 5 years in Northumberland. In 2013/14, the average journey time per mile in Northumberland was 1.64 minutes which was less than both the North East (2.11) and England as a whole (2.47). Note: Morning peak defined as 7am to 10am. Based on academic years (Sept to July). Weekdays falling within school holiday periods excluded.

Children travelling to school (usual mode of travel)

Children attending state-funded primary schools in Northumberland (January 2011) were most likely to either walk there (58%) or to go by car/van (37%). In state-funded secondary schools however, although the most common mode of travel was walking (49%), a larger percentage were likely to take the bus (28%) than for primary schools. For special schools, the preferred way of travelling was either the bus (50%) or by car/van (44%). Only 5% walked to school. These proportions are roughly similar to the North East and across England. Since 2011, this information is now not collected.

Average Domestic Energy Consumption

In Northumberland, the average domestic electricity consumption in 2014 was 3,829kWh, which was higher than the figure for the North East region (3418). Over the five year period from 2010 to 2014, electricity consumption has fallen in Northumberland by 4%, which is the same as the North East rate.

Domestic gas consumption figures have decreased in Northumberland over the same five year period from 15,954 in 2010 to 14,051 in 2014. This is a reduction of 12% which is similar to the North East.. Although average gas consumption has decreased each year since 2010, it is slightly higher in Northumberland than the region as a whole. Source: DECC.

		N/land	North East
Domestic Electricity (kWh)	2010	3,992	3,563
	2011	3,919	3,522
	2012	3,880	3,458
	2013	3,801	3,421
	2014	3,829	3,418
Domestic Gas (kWh)	2010	15,954	15,378
	2011	14,915	14,420
	2012	14,884	14,434
	2013	14,583	14,045
	2014	14,051	13,487

All Energy Consumption by Sector

Northumberland has seen a fall in the energy consumption within the 'industry & commercial' and 'domestic' sectors

during the period 2009 to 2013, but reasonably level energy consumption in the 'transport' sector. There has been a 20% reduction in Industry and Commercial use in Northumberland since 2009 (NE rate -36%), 12% reduction in domestic energy (NE rate -10%) and 0.4% increase in Transport (NE rate - 3%).

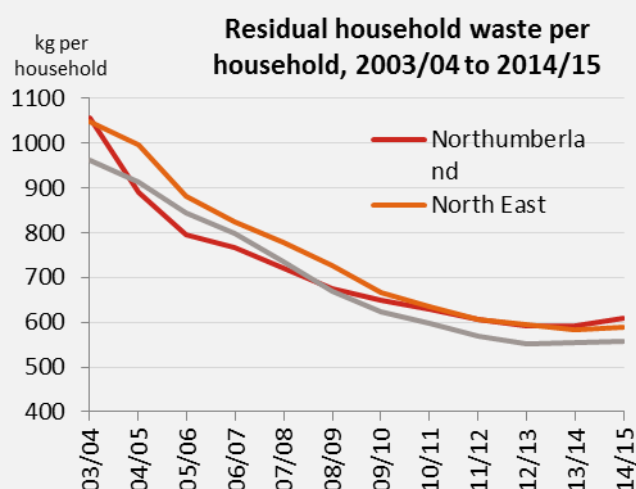

In 2013, 2,349GW were used in the Industry and Commercial sector, 2,702GW were used by the Domestic sector and 2,109GW were used by the Transport sector.

Source: Department of Energy and Climate Change

Household Waste

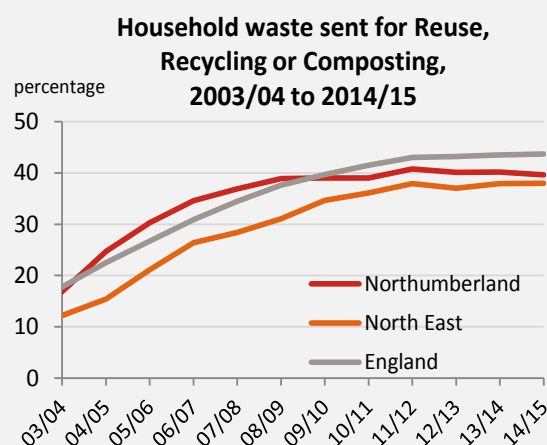

In 2014/15, residual waste per household in Northumberland was 609kg, an increase from 592kg in 2013/14. This was slightly more than the North East figure (588kg), and England (558kg). Residual waste per household has been falling for the past 5 years, and there has been a reduction of around 3% in Northumberland over this period, less than the North East and England where there was a reduction of 7%.

Source: Defra

The percentage of household waste sent for reuse, recycling or composting has been increasing year-on-year, with 40% (an increase from 39% in 2010/11) of Northumberland household waste treated this way in 2014/15. This is similar to the North East figure of 39.0 but less than the England figure of 43.7.
