Proposed Elevations - Drawing No: 002 Revision B 1:100 Scale at A3

An example of valid proposed elevation drawings.

This example shows a single dwelling being split into two dwellings with extensions to each. If you are proposing works to a single dwelling you would not need to show the whole of the neighbouring property, just indicate where it is joined to yours e.g. via the dotted line shown below.

No 2 Crest View - No 1 Crest View **Existing East Elevation**

Northumberland

- ✓ Scale bar included that matches this scale.
- All external sides of the building from which the change will be seen are shown. These are clearly labelled east/ west or front/rear etc
- All window and door openings are shown (and you have checked the positions/sizes match the floor plans).
- It is clear from the \checkmark drawing title whether drawings are existing or proposed elevations.
- The relationship where a proposed elevation adjoins another building/ structure or is in close proximity is clear.
- It is helpful to state the paper size and a drawing (with revision) number.
- Plans have been ✓ submitted at the paper size stated, are not shrunk/enlarged and are not a photograph of a plan.
