

Does your business comply with the law?

- Do you minimise your waste using the waste hierarchy which recommends this order of preference;- prevent, reuse, recycle, recover and dispose?
- Have you made arrangements for your waste disposal with a waste contractor who is registered to collect waste?
- Can you demonstrate that you never put your business waste in a household bin, never in a litter bin, and never take it to a Household Waste Recovery Centre?
- Do you store your waste appropriately?
- Can you demonstrate you are fully compliant (including holding valid Waste Transfer Notes)?

For more help visit www.gov.uk/browse/business/waste-environment

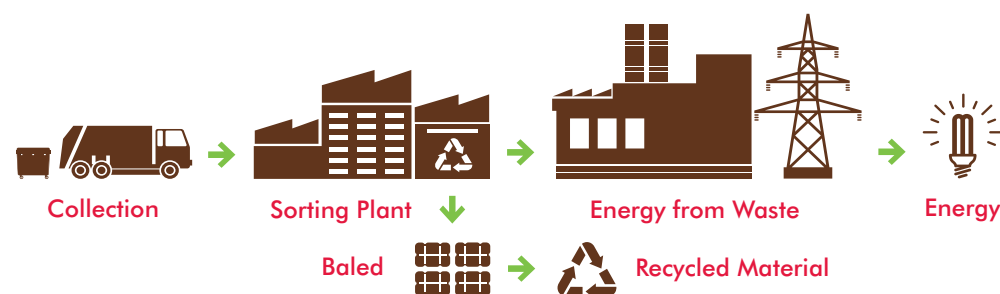

Did you know that...

since January 2015, businesses are required to separate waste for recycling (paper, plastic, metals and glass) wherever it is Technically, Environmentally or Economically Practicable (T.E.E.P).

If you only use one container for recyclables and non-recyclables then you are unlikely to comply.

How can the council help you meet this obligation?

- We offer co-mingled collections for paper, card, cans, aerosols and plastic bottles.
- We offer a separate collection for glass (subject to location).
- We use your non-recyclables as a fuel to make electricity.

What services are offered?

- Fully co-mingled recycling collection service which reduces the number of containers you need and keeps your costs to a minimum.

Mixed recycling (co-mingled collection)

Cardboard, paper, catalogues, magazines and envelopes.

Food and drinks cans and aerosols.

Plastic bottles, without lids.

Glass collection, collected separately from co-mingled

Any colour or clear glass is remelted or crushed for reuse (service subject to your location).

General waste collection, collected separately from co-mingled

Non-recyclable rubbish collected is sent to an Energy from Waste plant to make electricity which feeds into the National Grid. Little or no waste is sent to landfill.

What additional services do we offer customers?

- Bulky waste collection and disposal.
- Free estimates for one-off jobs for current customers.
- Landlords waste solutions.
- Professional expert advice.
- Waste review service.
