Date Closed	18.10.21
Total signatures	643
Report sent to petitioner	14.01.22
Report to	North LAC 24.01.22
Minute extract sent	11.04.22
Decision/Current Position	<ul style="list-style-type: none"> • A comment on the draft report had been received on Friday 21 January 2022, from the named ecologist and stated that “Northumberland County Council do not apply for a licence to relocate the badgers, in regards to recommendation C in the petition report, another course of action will be suggested instead of submitting an application to relocate the badgers.”

	<ul style="list-style-type: none"> • The named ecologist did not believe that a licence would be possible to obtain from Natural England, due to the level of damage on site, location of the sets and the level of activity, nor would a licence resolve the issues which were experienced. • In addition to measures taken, it had been suggested to erect badger proof fencing between where the sets were located and the new section of the cemetery. • A licence may still be required to erect the fencing, which would be sought from Natural England. • There had been a ground penetrating radar survey, to investigate whether badgers had been disturbing remains on a sub-terranean level, concluding that badgers had not been tunnelling in the area surveyed.
