BOWES STREET, CHURCH STREET AND WANLEY STREET IMPROVEMENTS - SOFTWORKS PALETTE

A vibrant, salt tolerant coastal planting mix – *Acer campestre* 'Elsrijk' create a compact columnar avenue on Bowes Street, robust and salt tolerant providing value for bees and butterflies; *Rhus typhina* provide a small multi-stem structural tree form in the street scene with a bold orange and red winter colour. Blues, oranges, greens and yellows in the coastal planting mix will bring the streets of Blyth to life and draw the colours and vibrancy of the wider coastal landscape into the Town Centre.
