

# We're creating more wooded landscapes in Northumberland.

NORTHUMBERLAND

2030

CARBON  
NEUTRAL

More trees will help tackle the big challenges facing society such as climate change and biodiversity decline, while promoting health and wellbeing and supporting a thriving local economy.

## What we do

We can help with advice, where to find more information and how to access funding. Our free support includes discussing and assessing options and opportunities, and how they fit with your objectives.

## Approval

We can work with you and the relevant authorities to help gain the permissions you might need for your project to become a reality.

## Funding

Funding options are available to support tree and wood planting and we can help you find the best funding opportunities to suit your needs.

## Benefits

Tree planting can bring further benefits including:

- Soil stabilisation
- Shelter for animals
- Reducing your carbon footprint
- Diversifying your business
- Reducing run-off

If you are looking for information or advice, or if you would like to get involved with tree planting please get in touch.
