

STSS Outcomes

When recording a Contact Note of type:-

CAT: end STSS – planned: goals achieved

CAT: end STSS – planned: goals not achieved

CAT: end STSS – unplanned: goals achieved

CAT: end STSS – unplanned: goals not achieved

it is essential to record one of the following Outcomes:-

No.	Contact Note Outcome	When should I use this outcome?
1	STSS ended – hospital admission	When the client has been admitted to hospital
2	STSS ended – res care arranged	When the client is admitted into permanent residential care, or at least for a trial period. Do not use this outcome for short breaks.
3	STSS ended – res care (private)	When the client is admitted into residential care as a private arrangement
4	STSS ended – nursing care arranged	When the client is admitted into permanent nursing care, or at least for a trial period. Do not use this outcome for short breaks.
5	STSS ended – nursing care (private)	When the client is admitted into nursing care as a private arrangement
6	STSS ended – Non-res support arranged	When further long term support is arranged at home or in the community (including short breaks).
7	STSS ended – Non-res support (private)	When further long term support is funded by the client at home or in the community (including short breaks).
8	STSS ended – Further support declined	When further support is needed, but it is declined
9	STSS ended – family/carers will support	When further support is needed, and it is provided informally by family or carers
10	STSS ended – No support needed from anyone	When no further support is needed at all
11	STSS ended – died	When the client has died
12	STSS ended – Inappropriate referral	When the referral was inappropriate
