Executive Summary

Executive Summary

The Northumberland PPG17 Assessment has been prepared to inform the preparation of policies in the Local Development Framework and provide evidence for considering planning applications and proposals for developments affecting open space, sport and recreational facilities.

The study will help the Council to plan positively, effectively and creatively to ensure that there is adequate provision of accessible, high quality open space, sport and recreation facilities that meets the needs and aspirations of local communities and people who work in or visit the County.

The study findings are drawn from a comprehensive technical assessment that assesses the quality, quantity and accessibility of open space, sport and recreational facilities in the County in accordance with Planning Policy Guidance Note 17 (PPG17) 'Planning for Open Space, Sport and Recreational Facilities' (2002) and the supporting Companion Guide 'Assessing Local Needs and Opportunities' (ODPM, now DCLG).

The study focuses on local needs and local provision and the need to make the most effective use of available resources both now and in the future. As such the focus has been the following:

- **To identify local needs**
- **To audit and digitally map local provision**
- **To set local provision standards based on the findings identified in the PPG17 assessment for quality, quantity and accessibility**
- **To apply the provision targets**

The study recognises the importance of National, Regional and Local policy context and the strategic vision for Northumberland.

The vision for Northumberland's open space has been developed through the consultation process and review of existing Council strategies and Green Space Strategies developed by the former District Councils. The Vision for open space and outdoor recreation is as follows:

'To have excellent, well used and valued open space, sport and recreation facilities that are safe, accessible and welcoming at the heart of all local communities that meet the needs of current and future generations'

In keeping with PPG17 guidance the study covers all open space, sport and recreational provision across the County. It is important to note that the audit has focussed on accessible greenspace provided in and around urban and rural settlements and as such standards are set only for the typologies listed below.

The analysis has been undertaken at a countywide level and also on Northumberland's three neighbourhood management areas (North, South East and West).

The study sets standards of provision for the differing types of open space, sport and recreational facilities within the County. The standards have been set using the baseline data from the quantity and quality auditing and the accessibility evidence of consultation with stakeholders, user groups and local residents. PPG 17 guidance states that local standards should include:

- **A quantitative component (how much provision may be needed)**
- **A qualitative component (against which to measure the need for enhancement of existing facilities)**
- **An accessibility component (including distance thresholds)**

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

Standards have been established on a single countywide basis, although it is acknowledged that the County has a defined rural/urban split with transport and accessibility issues in the rural areas. Deficiencies of accessible open space are more common in rural areas however, it is accepted that local people are less dependent upon open space from a visual perspective in rural areas, but conversely as dependent on access, given that a large part of rural Northumberland is agricultural land or forest. In relation to quantitative standards, it should be noted that the total figures could also mask possible variations at a more local level. A further point is that one would expect sports clubs to have lower than average membership numbers as one would need to have higher levels of provision per capita in rural than urban areas in order to provide equal opportunities to access facilities.

Consultation was carried out as part of the assessment process to establish how far users were prepared to travel to different facilities. This information was used to help determine the accessibility standards. Quantity standards have been set using the current level of provision for each typology. As part of the consultation process, the majority of local people confirmed they were happy with the current level of accessible open space in the County. The assessment criteria were developed as part of the assessment process and are based on the Green Flag Award criteria.

The standards that have been established as the minimum for the future are outlined below:

Typology	Quantity	Quality	Accessibility
Parks and Gardens	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 2.14 ha per 1,000 population</p> <p>Area analysis: surplus in the North and South East, deficiency in the West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 57% and to deliver all parks and gardens to a standard of good quality (61%)</p> <p>To achieve and maintain Green Flag status in 3 parks across the County (one in each neighbourhood area)</p> <p>All Country Parks to achieve Country Park Accreditation and a quality rating of 76% (Excellent)</p>	<p><u>Standard</u></p> <p>To provide access to good quality parks and gardens and for all households in the County to be within 1,000m or 12 minutes travel time</p>
Natural and Semi-Natural Greenspace	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 7.55 ha per 1,000 population</p> <p>Area analysis: surplus in the North, deficiency in the South East and West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 48% (current Countywide open space average) and to deliver all Local Nature Reserves to a minimum quality rating of 61% (good)</p>	<p><u>Standard</u></p> <p>To provide natural & semi-natural greenspace within 1,200m or 15 minutes travel time of where people live</p>

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

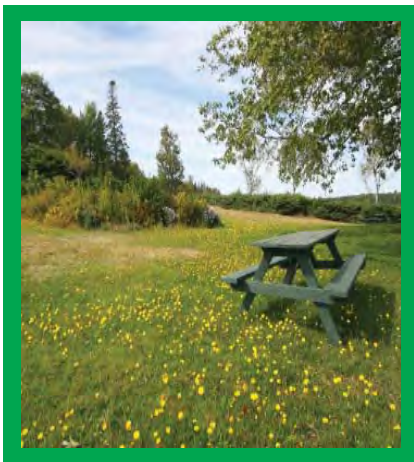

Typology	Quantity	Quality	Accessibility
Amenity Greenspace	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 1.09 ha per 1,000 population</p> <p>Area analysis: surplus in the North and South East, deficiency in the West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 48%. This includes ensuring facilities and infrastructure are ‘fit for purpose’</p>	<p><u>Standard</u></p> <p>To provide amenity greenspace within 600m or 8 minutes travel time of where people live</p>
Outdoor Sports Facilities	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 1.69 ha per 1,000 population</p> <p>Area analysis: Surplus in the North and West, deficiency in the South East</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61% (good quality).</p>	<p><u>Standard</u></p> <p>To provide outdoor sports facilities within 1,200m or 15 minutes travel time of where people live</p>
Provision for Children & Young People	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 0.50 ha per 1,000 children’s population (aged 0-15 years)</p> <p>Area analysis: Surplus in the North and West, deficiency in the South East</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61% and to ensure all fixed play design considers the play value of the provision as the key driver</p>	<p><u>Standard</u></p> <p>To provide fixed play provision within 800m or 10 minutes travel time of where people live</p>
Allotments	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 0.51 ha per 1,000 population</p> <p>Area analysis: Surplus in the South East, deficiency in the North and West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61%. This includes ensuring facilities and infrastructure are ‘fit for purpose’</p>	<p><u>Standard</u></p> <p>To provide an accessible allotment plot within 800m or 10 minutes of where people live</p>

Cemeteries & Churchyards	<u>Standard</u> No quantitative standard set	<u>Standard</u> All Council managed and maintained sites to achieve a quality score of 76% or above.	<u>Standard</u> No accessibility standard set

Section 1 - Introduction and Background

1 Introduction and Background

Introduction

- 1.1 Strategic Leisure, part of URS/Scott Wilson was appointed in December 2009 to undertake the development of a suite of green infrastructure, open space, sport and recreation documents for Northumberland. The documents will provide the evidence to underpin Planning Policy and inform the emerging Local Development Framework (LDF) and also meet the requirements for the South East Northumberland Growth Point (SENGP).
- 1.2 The documents that have been developed include:
- **A Green Infrastructure Strategy (GI Strategy) for the County- this strategy brings together existing data relating to the existing green assets that include land and water, biodiversity, landscape, historic landscape and designated sites. It uses comprehensive digital mapping (GIS) to assess the quality, quantity accessibility of provision to identify opportunities, surplus and deficiencies. It has developed a long term vision to inform emerging planning policy in relation to improving the provision, connectivity and multifunctional opportunities of green space.**
 - **A Green Infrastructure Plan for the South East Northumberland Growth Point. This document whilst being a stand alone plan sits beneath the wider Green Infrastructure Strategy for the County. It provides the baseline assessment to guide the future provision in the growth point area.**
 - **A revised and updated Playing Pitch Strategy. This strategy is compliant with Sport England 'Towards a Level Playing Field' guidance. It has considered the priorities of the governing bodies and the needs of local clubs through a thorough and comprehensive supply and demand assessment, pitch quality audit and extensive consultation with local teams clubs and stakeholders. It provides analysis of supply and demand at county and sub area levels.**
 - **This strategy which is an assessment of open space, outdoor sport and recreation provision in accordance with Planning Policy Guidance note 17 (PPG17) and has been completed to comply with PPG17 guidance.**
- 1.3 Over the last decade it has been increasingly recognised that aspects of the urban environment, including open space provision, has contributed to urban decline. There has been a lot of research into the importance and value of urban parks and green spaces and focus on increasing participation in sport and exercise, in the context of reducing health problems and obesity. In 2002 Planning Policy Guidance note 17: 'Open Space, Sport and Recreation' set out the Government's priorities and aims for high standard open space provision in the right locations. It requires local authorities to identify deficiencies in both open space and sport facilities and to remedy these deficiencies.
- 1.4 This PPG17 Assessment will help the Council to plan positively, effectively and creatively to ensure that there is adequate provision of accessible, high quality open space, sport and recreation facilities that meets the needs and aspirations of local communities and people who work in, or visit, the County.

A Vision for Open Space, Sport & Recreational Facilities in Northumberland

- 1.5 The vision for Northumberland's open space has been developed through the consultation process and review of existing Council strategies and Green Space Strategies developed by the former District Councils. The Vision for open space and outdoor recreation is as follows:

'To have excellent, well used and valued open space, sport and recreation facilities that are safe, accessible and welcoming at the heart of all local communities that meet the needs of current and future generations'

- 1.6 This will be achieved through transparent and robust planning policies that ensure open space contributes to everyday life of residents whilst supporting regeneration and maintaining the local character of the County. Working in partnership with local communities, parish/town councils and other partners will help to ensure the delivery of this vision.

Purpose of the Study

- 1.7 This work has been developed to provide Northumberland County Council (NCC) with a strategic framework that will guide the future planning and management of the County's open spaces.
- 1.8 The study addresses the Government's requirement for the Council to undertake a Planning Policy Guidance Note 17 (PPG17) 'assessment of local need' in relation to developing a comprehensive audit of local need and providing transparency in the Council's future planning policy.
- 1.9 The study has been developed in accordance with the stages outlined in the Companion Guide to PPG 17 'Assessing Needs and Opportunities' (2002) and has involved the following steps and tasks:
- **The development of an open space working group of internal and external stakeholders to work alongside the development of the PPG17 audit.**
 - **A review of existing strategies, policies and corporate information that may influence the provision of open space, outdoor sport or recreational facilities, this has involved a comprehensive review of existing planning policy administered by the Council in relation to existing provision.**
 - **A review of all data held by the Council in relation to current levels of open space, sport and recreation facilities within the County.**
 - **A digital mapping assessment that initially identified the range of provision by its specific type or purpose. This in turn has been built into a comprehensive dataset that has incorporated the quality and accessibility findings from the site audits and consultation. The Geographic Information System (GIS) digital map can be reviewed and updated to guide and support the Council to make informed spatial management decisions in the future.**
 - **Consultation with stakeholders across the Council, local people and relevant user groups and organisations.**
 - **The GIS data set has enabled the Council to test quantitative, qualitative and accessibility standards for each type of provision and at different levels from area based to county-wide analysis.**
- 1.10 PPG17 requires local authorities to develop and establish standards of provision for open space, sport and recreational facilities.

- 1.11 It also requires that when setting such standards, local authorities recognise the current levels of provision and also the needs of local people regarding both the present and future provision. There are three core elements of work required by local authorities, these being an audit of current provision, public consultation and the development of local standards.
- 1.12 The audit of current provision involves an assessment of quantity, quality and accessibility and for each element the information required is outlined as follows:
- **Quantity** - to identify the site by type and to develop a local typology that identifies what type of open space or facility it is, what is its primary purpose and how much is there?
 - **Quality** - what is the current physical condition of each site and its infrastructure and does it meet the purpose for which it was provided?
 - **Accessibility** - Is the right type of provision in the right place to meet local need or demand, which neighbourhoods or communities are not served by provision and what is an acceptable distance for local people to travel to the differing provision?
- 1.13 Consultation has to be undertaken with stakeholders, parish and town councils, governing bodies, local people, schools, sports clubs and people with an interest in open space, sport and recreational provision. This is necessary to establish the local levels of use made for each type of space or facility. It also lets people have their say as to whether provision meets their local needs and to what extent it meets their aspirations. It helps identify the barriers that may prevent people from using the space or facilities provided.
- 1.14 The development of local standards will help to guide the planning process in relation to identifying deficiencies in provision in terms of which neighbourhoods or local communities are not best served by open space, sport and recreational needs. The standards will establish clear thresholds for quantity, quality and accessibility of provision and guide the space and facilities required from development. The Playing Pitch Strategy produced in tandem with this report sets the standards and identifies the priorities for pitch provision (para 5.21 of Northumberland Playing Pitch Strategy 2011).
- 1.15 The audit or local assessment is based on the following guiding principles:-
- **The enhancement and improvement of the quality and accessibility of existing provision and facilities;**
 - **The development and delivery of a network of good quality open space and sports facilities that are sustainable;**
 - **Local need identified through consultation and the establishment of standards;**
 - **The value of open space for the wider benefits they bring through health, social interaction, community cohesion, biodiversity and the well being of local people.**
- 1.16 The outcome is the development of a robust evidence base of provision and standards for all types of open space, sport and recreation at a County level.
- 1.17 In addressing the requirements of PPG17, the study has established standards of provision to enable the Council to plan for the future provision of open space, sport and recreational facilities. In developing the standards, each type of provision has been categorised and a standard has been established based on quality, quantity and accessibility and to address local need both now and in the future.
- 1.18 The purpose of the study is to therefore fulfil the following objectives:
- **To produce a comprehensive audit and assessment of all indoor and outdoor open space, recreation and sports provision.**

- To identify surplus or deficiencies in existing quality, quantity and accessibility of provision and to set priorities for the future through the development of a clear rationale to guide future investment and provision.
- To identify clear and robust policy recommendations to allow the Council through the Northumberland LDF to provide the strongest protection for open space. This will enable the Council to resist development pressures that may diminish recreational provision and allow the protection of open space facilities.
- To use the audit and assessment to set locally derived open space and recreation provision standards, addressing accessibility (including disabled access), quality and quantity.
- To inform the delivery of accessible, high quality open space, sport and recreational facilities in the County and ensure an appropriate balance between new provision and the enhancement of existing provision.

1.19 The assessment of indoor sports provision, quantity, quality and accessibility has been undertaken as a separate study to this PPG17 assessment. As a consequence this PPG17 assessment must be read in conjunction with the findings and recommendations of the Northumberland Sports Sub-Regional Facilities Strategy 2008 and the Northumberland Sports Facilities Strategy 2010. Together with this document; they cover the requirements of a PPG17 assessment for Northumberland.

Strategic Context Summary

1.20 In developing the study, it is important to consider and recognise national and local planning policy and guidance. The relevant provisions are summarised below. A more detailed strategic context can be found in Appendix 2.

National Planning Policy Statements / Guidance (PPS/PPG)

1.21 National guidance seeks to ensure Local Authorities plan effectively for open space, sport and recreation by using a number of tools, including:

- **Assessments of needs and opportunities - Local Authorities are required to carry out open space assessments and to consult with local people to identify local needs;**
- **Setting standards - National standards such as the National Playing Fields Association (NPFA) standards for outdoor sport and children's play will be replaced by local standards set in development plans that must include quality, quantity and accessibility and are based on local needs;**
- **Maintaining an adequate supply of open space and sports and recreational facilities:**
 - Existing open space, sports and recreational buildings and land should not be built on unless the land can be shown as surplus to requirements (A key driver for PPG17 is not to dispose of sites, rather to ensure local people have access to a range of good quality provision)
 - High quality open spaces and those of particular value to communities should be protected through development plan policies;
 - Planning conditions or obligations can be used to enhance the quality of existing spaces or create new ones where an assessment recognises a deficit in provision of open spaces, sport or recreational facilities;

- Local Authorities should also ensure that commercial and industrial developments do not just include landscaping, but also consider visitors' needs such as accessibility and safety and ensure the development has an element of open space provision;
- Planning Obligation funding can also be used as investment in parks, open spaces and tourist areas to improve the quality and accessibility for local people;
- That provision should be based on local need and the crux of the guidance is not to provide more of the same, rather improve and enhance what is already there.

1.22 When planning new open space and sports and recreational facilities, local authorities should:

- **Develop and locate intensive recreational uses where they can contribute to town centre vitality and viability;**
- **Strive to avoid any significant loss of amenity to residents, neighbouring uses or biodiversity;**
- **Aim to improve quality through good design;**
- **Seek to promote accessibility by walking, cycling and public transport, and ensure that facilities are accessible for all;**
- **Continue to add to and enhance the range and quality of existing facilities;**
- **Seek to promote areas of open space in commercial and industrial areas;**
- **Consider using any surplus land for open space, sport or recreational use, weighing this against alternative uses;**
- **Assess the impact of new facilities on social inclusion and consider the recreational needs of visitors and tourists;**
- **Meet the regeneration needs of areas;**
- **Consider security and personal safety, especially for children.**

Planning Policy Guidance Note 17 (PPG17: Planning for Open Space Sport and Recreation, 2002)

1.23 The Government's policy objectives for open space, sport and recreation are set out in Planning Policy Guidance Note 17 (PPG17 – Planning for Open Space, Sport and Recreation, 2002). In terms of delivery the long term aims are to:

- **Ensure the provision of networks of accessible, high quality open spaces and sport and recreation facilities in both urban and rural areas, which meet residents and visitors needs, are economically and environmentally sustainable and are fit for purpose;**
- **To ensure an appropriate balance between new provision and the enhancement of existing provision;**
- **To provide clarity and reasonable certainty for developers and landowners in relation to the requirements and expectations of the local planning authority in respect of open space and recreational provision.**

- 1.24 A key aspect of PPG17 is that local authorities should undertake a local needs assessment and audit of existing provision. The objective is to move away from the use of national standards of provision and to establish local standards of provision that address quality, quantity and accessibility.

Regional Planning Policy

Regional Spatial Strategy for the North East (2008)

- 1.25 The Regional Spatial Strategy for the North East of England, (which still forms part of the statutory development plan following the ruling quashing the revocation), sets out a sustainable long-term vision for the development of the region and provides the regional framework for the determination of planning applications and planning appeals. It includes an undertaking to ensure that an improved environment is a high priority. (The coalition Government still plans to abolish the RSS through the Localism Bill).
- **Policy 2: Sustainable Development-Planning proposals and Local Development Frameworks should support sustainable development. Sub-sections of this policy embrace environmental and social objectives.**
 - Environmental Objectives include promoting the concept of green infrastructure, with a network of linked multi-functional green spaces in and around the Region's towns and cities.
 - Social Objectives include improving health and well being, and also ensuring good accessibility by walking and cycling as well as by public transport
 - **Policy 8: Protecting and Enhancing the Environment Strategies, plans, programmes, and planning proposals should seek to maintain and enhance the quality, diversity and local distinctiveness of the environment throughout the North East by (inter alia):**
 - Identifying and protecting existing woodland of amenity and nature conservation value, particularly ancient woodlands;
 - Encouraging and supporting the establishment of green infrastructure including strategic wildlife corridors.
 - **Policy 9.6: Environment One component of this policy seeks to support the establishment of strategic networks of green infrastructure that link existing and proposed greenspace with green corridors running through urban, suburban and urban fringe areas to the countryside and coast.**
 - **Policy 24: Delivering Sustainable Communities Proposals should assess the suitability of land for development in relation to the potential contribution to reducing health & social inequality through the provision of accessible health, sports, community & recreational facilities, including suitable provision for play space, in new development.**

- 1.26 In addition to the above policies 11.3c and 16 are highlighted as relevant to this work, and should be considered as appropriate.

Local Planning Policy

Releasing the Strength of our Communities – A Sustainable Community Strategy for Northumberland to 2021

- 1.27 The Strength of our Communities' provides the context for the developing local planning policy. The Sustainable Community Strategy sets out two fundamental principles. The first is recognising the importance of place.

- 1.28 To improve the local quality of life, there is a need to focus on improving whole areas rather than just individual services. The second is working together in partnership. To improve the local quality of life, there is a need to bring together and better align all activity to meet the needs of communities.
- 1.29 The Vision for the Sustainable Community Strategy is that by 2021, everyone in Northumberland will be able to:
- **Enjoy a good standard of living**
 - **Live safely and in comfort**
 - **Lead healthier lifestyles**
 - **Readily access the things they need**
 - **Take part in cultural activity**
 - **Care about our environment**
 - **Get involved and bring about change**

Northumberland Consolidated Planning Policy Framework (April 2009)

- 1.30 The Consolidated Planning Policy Framework for Northumberland was adopted by Northumberland County Council on 4 February 2009 and identifies the need to consider relevant policies and strategies adopted by the former County Council and District Councils e.g. former Core Strategies and Local Plans when considering planning applications and other development proposals. Consolidated Planning Policy Framework comprises two sections:-
- **Section A** : Schedule of Statutory Development Plan Documents
 - **Section B** : Schedule of Planning Policy Documents which do not form part of the Development Plan

Section A : Schedule of Statutory Development Plan Documents

- 1.31 This schedule includes Policy S5 of the adopted Structure Plan, adopted Local Development Framework documents which form part of the Statutory Development Plan, and local plan policies 'saved' either through regulation or Direction by the Secretary of State. Together with the North East of England Regional Spatial Strategy (RSS) these documents comprise the statutory Development Plan for Northumberland.

Section B : Schedule of Planning Policy Documents which do not form part of the Development Plan

- 1.32 This schedule is itself comprised of two parts. The first is concerned with those local development documents which are part of the Local Development Framework but do not form part of the statutory Development Plan and includes a number of Supplementary Planning Documents (SPDs). The second part comprises various planning policy documents which have been prepared by the seven former local planning authorities and which are used to provide guidance and advice in considering and determining planning applications. The documents in Part 2 are not individually identified in the policy framework in the Council's Constitution but are referred to as the 'Schedule of Planning Policy Documents which do not form part of the Development Plan'. The documents contained in Part 2, whilst prepared by predecessor councils, were also adopted by the Northumberland County Council on 4 February 2009.

- 1.33 As a precautionary note the Framework flags up that the documents contained within the Consolidated Planning Policy Framework need to be read in context. Where they were adopted some time ago, it is likely that material considerations, in particular the emergence of new national and regional policy- will be afforded considerable weight when determining planning applications.
- 1.34 As a precautionary note the Framework flags up the fact that some policies were adopted some time ago, as a consequence of which it is likely that other material considerations - in particular the emergence of new national and regional policy - will be afforded considerable weight when determining planning applications. In addition, the document makes it clear that there will be a need from time to time to rely on existing evidence-based documents to assist in the due consideration of assessing development proposals. These include:
- **Housing needs assessments**
 - **Retail capacity studies**
 - **Emerging evidence based studies**
 - **Open space and recreation assessments**
 - **Landscape character assessments**
 - **Employment land reviews**
 - **Wind capacity studies**
- 1.35 As a precautionary note the schedule flags up the fact that some policies were adopted some time ago, as a consequence of which it is likely that other material considerations - in particular the emergence of new national and regional policy - will be afforded considerable weight when determining planning applications. In addition, the Appendix documentation makes it clear that there will be a need from time to time to rely on existing evidence-based documents to assist in the due consideration of assessing development proposals.
- 1.36 The schedules also include a bibliography of the policy documents, including date of approval by the preparing authorities and an indication of their relevance by geographical coverage and spatial theme coverage.
- 1.37 Considerations to be taken into account in relation to “Spatial Theme Definitions” include.
- **For ‘Recreation & Open Space’ these may include parks and gardens, provision of new open space, sport and recreational facilities, children’s play, strategic open spaces, golf courses, countryside activities, recreational footpaths, cycleways and bridleways.**
 - **For ‘Natural Environment’, these may include sites of international and national importance for nature conservation, sites of local or regional nature conservation significance, protection of species, biodiversity and geo-diversity sites, wildlife networks, landscape character, areas of high landscape value, best and most versatile agricultural, trees and hedgerows.**
- 1.38 The Consolidated Planning Policy Framework for Northumberland is a ‘living’ document and the Council has signalled its intention to update the Framework when new planning policy documents are adopted. In relation to open space, sport and recreational facilities, there are a number of key issues resulting from the above context, and specifically the existing planning policies being applied. These are summarised below:

Key Planning Issue in Relation to Open Space, Sport & Recreational Provision	How it is Currently Dealt With	Impact of this Situation
Standards of Provision	Standards of provision are based on the former district approach, which varies across the county.	Standards of provision are inconsistent across the new unitary area, as a result of the previous approached under former authorities. The new Northumberland PPS and PPG17 will be used to inform the setting of standards relevant to the new unitary area. These will replace the existing ones developed by former authorities.
Quality of Provision	The requirement for quality of provision varies between all former districts. The basis on which quality of provision is determined also varies, as each former district undertook its own PPG17 at different times, methodologies also varied, as did the level of pitch quality audits. Approaches to grounds maintenance also varied in the former districts.	There is no consistent measure of quality across Northumberland in terms of open space, sport and recreational facilities. This needs to be addressed in future planning policy so that all providers have a quality level to aspire to, and all users have an understanding of what they can expect in return for hire fees.
Accessibility	There is inconsistency in relation to accessibility of open space, sport and recreational facilities.	Different areas of Northumberland currently have varying levels of accessibility; the critical issue about accessibility is that community provision should be available, and affordable to local communities.
SPDs	Not all former district authorities adopted and operated SPDs in relation to Sport and Play Provision.	In preparing the Northumberland LDF consideration needs to be given as to whether there is the need to prepare a Northumberland wide Sport and Play Provision SPD.

Key Planning Issue in Relation to Open Space, Sport & Recreational Provision	How it is Currently Dealt With	Impact of this Situation
Responsibility for Provision	The former County Council was not responsible for sport and leisure provision in its widest sense. Provision was previously the responsibility of the former district authorities.	The new unitary authority now has responsibility, albeit non-statutory, for open space, sport and recreation facilities. It is important that future planning policy aligns the level of responsibility with appropriate local priorities, so that the contribution of this type of provision to the NCC corporate agenda is clear, and can be addressed appropriately in future planning policy.

Growth Point Status

- 1.39 The Northumberland Growth Point (NGP) initiative for South East Northumberland was approved by government in 2008. The initiative is designed to accelerate growth in housing, regeneration and economic prosperity.
- 1.40 A key target identified is to realise an increase in housing by over 20% over the period 2008-2017, with the total new housing provision expected to be over 6,300. The initiative is also tasked with ensuring that the uplift in housing is complemented by an improvement to the residential neighbourhood and the quality of place. As a result, specific attention is drawn to the role and function of green infrastructure in the delivery of these aspirations.
- 1.41 Growth Point status represents a joint commitment between government and the new Growth Point Partnership to increase the level of housing provision in the sub region and accelerate its delivery. However it is not solely about housing numbers; it is also about:
- **Widening the opportunity of housing choice**
 - **Improving the liveability and quality of life for local people**
 - **Developing ‘greener’ housing provision in accordance with the Housing Green Paper**
 - **Improving the quality of the housing and the design of new development**
- 1.42 The NGP proposal for the south east is based around six identified potential “growth areas”:
- 1.43 The Growth Point Area comprises the whole of Wansbeck and Blyth Valley and it extends westward to include the market town of Morpeth (The main settlements being Ashington, Blyth, Cramlington and Morpeth) and north to include the Rural Coalfield Area.
- 1.44 The submission for Growth Point status was on the back of new housing largely being achieved through increased residential development on Brownfield regeneration sites or through urban extension at Ellington, Lynemouth, East Ashington, Blyth Estuary, Cambois, North Morpeth and Cramlington South West Sector.

Existing Strategic Planning for Open Space & Sports Pitches: Key Review Findings

- 1.45 In the years leading up to the formation of the unitary authority, several of the constituent authorities developed relevant studies and strategies. We have reviewed these documents, with the key implications highlighted in Figure 1.2. A summary of the status of our review of key authorities' documents is shown in Figure 1.1.
- 1.46 Additional to existing Playing Pitch Strategies and PPG17 Open Space Assessments, a number of County Wide Assessment and Strategy documents were reviewed.

Figure 1.1 : Playing Pitch and Open Space Strategy Review

Former Authority	Playing Pitch Strategy	Open Space Assessment
Alnwick	✓ (joint Strategy with Berwick)	✓
Berwick-upon-Tweed	✓ (joint Strategy with Alnwick)	✓
Blyth Valley	No separate strategy but detailed assessment included in PPG17 Audit and Assessment	✓
Castle Morpeth	X	X
Tynedale	✓	✓
Wansbeck	✓ (Referenced from other docs)	✓ (Referenced from other docs)
County Wide Strategies	<ul style="list-style-type: none"> • Strategic Review of School Sports Facilities • Northumberland Sports Facilities Strategy (2010) 	

Figure 1.2 : Summary of Key Issues from Existing Strategies

Document	Key Findings/Issues
Strategic Review of School Sports Facilities	<p>The review was commissioned to assist the County Council to plan for the re-provision of playing fields and sports provision against the backdrop of changes in the schools portfolio across Northumberland. Six sub-studies were commissioned – one for each local authority area. The reports note the impact of the closure of some schools which provide playing pitches and suggests that on sites where schools are to be retained, that any encroachment should be offset by re-provision and/or improvements to existing facilities. In the case of sites considered 'surplus', the existing playing pitches should be maintained with a view to encouraging community use. The backdrop to most local studies is a noted deficiency of playing pitch space.</p>
Northumberland Sports Facilities Strategy (2010)	<p>The strategy refers to indoor and outdoor facilities. Key issues summarised across the county in terms of outdoor pitches include qualitative issues – poor changing, poor drainage, lack of floodlit training facilities and lack of female changing facilities. Other themes include the need for new AGPs (Alnwick, Blyth Valley and Wansbeck priorities) on school sites and a need to focus on multi-pitch sites.</p> <p>Grass pitch improvements identified include:</p> <ul style="list-style-type: none"> • Alnwick – Longhoughton PC pitches and changing rooms, Alnwick Sporting Club pitches and changing rooms • Castle Morpeth – Ponteland pitch work, Morpeth Common drainage improvements • Tynedale – Hexham Duke House Wood, 4 x pitches and changing rooms • Wansbeck – Investment in pitches and changing facilities at Newbiggin Hall and Bomarsund Welfare <p>Swimming Pools</p> <p>Currently there is unmet demand across the County, particularly in the West. There is also underutilisation of existing facilities in some areas, this is possibly linked to accessibility and poor quality facilities. This may be overcome by developing a standardised Community Use Agreement that can be tailored to local circumstances. Furthermore, the possibility of exploring options relating to transport / access to Council owned facilities may improve underutilisation.</p> <p>Sports Halls</p> <p>There is currently an unmet demand in Northumberland equivalent to 11 badminton courts across the County. There is also possible underutilisation of existing facilities in rural areas. This may be improved by increasing opportunities to access sport in smaller facilities in order to address accessibility issues in rural areas.</p>

Document	Key Findings/Issues
	<p>Athletics Tracks</p> <p>In the former authority of Berwick there are currently no athletics tracks. Furthermore, Northumberland's one and only synthetic track falls below the correct standard of provision. The actions to improve this situation are, to build a new outdoor 6/8 lane synthetic track in Morpeth at the King Edward VI School, and develop a facility improvement plan.</p> <p>Artificial Grass Pitch (AGP)</p> <p>In the former district of Alnwick there are currently no full size AGP facilities, Northumberland requires a further four full size AGP's in order to be in line with the national average. The action which is to be taken in order to overcome the AGP issues in Northumberland is to work with England Hockey to identify priorities for provision of new or refurbished sand based AGPs subject to the Playing Pitch Strategy</p>
<p>Northumberland Sports Facilities Strategy (2010) (continued)</p>	<p>Health and Fitness</p> <p>Within rural communities there are accessibility issues regarding health and fitness facilities. The current quality of existing facilities needs to be maintained. In order to achieve this, a plan needs to be devised and implemented in which fitness facilities and equipment is replaced to reflect market expectations.</p> <p>Indoor Tennis</p> <p>The LTA has identified a number of gaps in the provision of indoor tennis facilities in the north east of Northumberland, in order to improve this provision there will be an investigation into the potential development of an indoor tennis facility in conjunction with the LTA.</p> <p>Golf</p> <p>Northumberland currently has the highest number of courses per 1,000 population of the four North East sub-regions. Based on this current level of provision there are no recommended actions to be taken.</p> <p>Indoor Bowls</p> <p>Facilities are occasionally underutilised during the summer and so a review of indoor bowls is needed where appropriate and then an alternative strategy developed and implemented.</p>

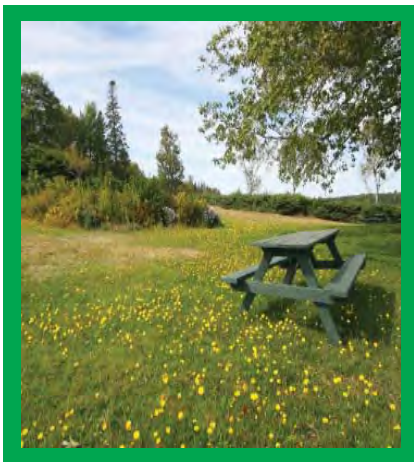

Document	Key Findings/Issues
North Northumberland Playing Pitch Strategy (Alnwick and Berwick-upon-Tweed District Councils) (2003)	<p>Study commissioned by Alnwick and Berwick-upon-Tweed District Councils. Key issues identified in both Berwick and Alnwick include:</p> <ul style="list-style-type: none"> • Generally poor changing accommodation • Only one rugby club in each district with generally poor pitch quality • No dedicated artificial hockey pitches • The need to upgrade around 22 pitches in Alnwick and 16 in Berwick • No significant quantitative shortfalls identified
PPG17 Open Space, Sport and Recreational Facilities Study – Alnwick and Berwick-Upon-Tweed District Councils	<p>Study commissioned after the 2003 Playing Pitch Strategy. Consultation issues relating to outdoor sports facilities highlighted include:</p> <ul style="list-style-type: none"> • The poor quality of provision, particularly in Alnwick and Amble • A need identified by 47% of sports clubs for a synthetic turf pitch • Demand for an indoor bowling green in Alnwick <p>The quantitative assessment undertaken suggests there are 157 hectares of outdoor sports provision (2.61 ha/1,000 in Alnwick and 2.92 ha/1,000 in Berwick). Recommended quantity standards are to remain at the current level, with a focus on qualitative improvements.</p> <p>The report notes significant variation in terms of quality.</p>
Blyth Valley PPG17 Assessment (2007)	<p>Study refers to all open space types. Consultation with sports clubs was not comprehensive, with a poor response rate noted. Key issues relating to sports pitch provision include:</p> <ul style="list-style-type: none"> • Access to playing pitches is based on 900m walking distance – all settlements have this access except for the northern part of Cramlington (Beaconhill Green) and the northern part of Seaton Sluice where, given the population demographics, there is no need for pitches. • Cricket and rugby participation in Blyth Valley is more or less constant, but adult football is still in decline; some junior football clubs have also disbanded in recent years • Part of the problem with adult football is that most “clubs” are actually single teams; this means they lack continuity and are not developing a pool of players for the future

Document	Key Findings/Issues
	<ul style="list-style-type: none"> • A number of football teams are “fragile” and may disband at any time, with the main threats to their future being a lack of volunteers willing to run them and the unwillingness of players to pay a realistic charge for their sport • Each of the constituent parts of Blyth Valley currently has sufficient cricket, adult football and adult rugby pitches to accommodate both current demand and a 10% increase in participation rates for all three pitch sports. However, there is a shortfall in junior and mini provision which means that some adult pitches are used by younger players. The Council should keep the demand balance between adult, junior and mini-pitches under review and remark adult pitches as necessary to achieve the best “fit” between supply and demand. • Clubs and the governing bodies are critical of the quality of pitches and changing provision in the District but do not regard the number of pitches as being in any way inadequate • There is likely to be a growing need for floodlit artificial turf pitches in the District as players abandon weekend football and move to mid-week play. These pitches should reduce the demand for grass pitches, particularly for mini-soccer and min-rugby. • Priority recommendations for the then Council to improve quality of pitches and changing provision; and to work with schools to open up education sites; although additional playing pitches are needed, there is limited need for new pitch development given the opportunities to improve the quality of existing provision and open up existing facilities, particularly on school sites • The Council should provide planned pitches at South Beach, Blyth and develop an AGP with Blyth Community College; the aim should be to provide an AGP with secured community use at each secondary school • Consultation with the FA’s development officer suggested the need for an additional floodlit third generation AGP • Audit suggested adult football in decline, in line with national trends • Cramlington, Alexandra Park is outdated, but the AGP at Cramlington High School is close to this site <p>The report references the Blyth Valley PPS (2001) (not reviewed) which forecast the need for an additional 7 adult football, 19 junior football and 24 mini football pitches.</p>

Document	Key Findings/Issues
	<p>Key sites for potential development are identified as:</p> <p>Blyth - South Beach – requires drainage to support increased usage</p>
<p>Tynedale Open Space, Sport and Recreation Study (2005)</p>	<p>This study breaks the authority area into 21 sub areas and sets out an approach to the provision and improvement of open space, sport and recreation facilities. It builds on the 2001 Recreational Open Space Strategy and reviews sports, children's play and informal open space.</p> <p>The study is not PPG17-compliant in so far as it does not apply locally-derived standards, adopting the NPFA recommended standards for open space and children's play areas. Playing pitches however are subject to a separate PPS, as reviewed below.</p> <p>The study concludes that:</p> <ul style="list-style-type: none"> • Each of the main towns (Hexham, Prudhoe and Haltwhistle) should continue to provide 'an adequate amount of outdoor sports facilities including playing pitches' • Both Hexham and Prudhoe should have a full size floodlit AGP. Floodlit MUGAs should also be provided • Tynedale Rugby Club should be supported to develop district-wide facilities including a floodlit AGP
<p>Tynedale Playing Pitch Strategy (2004)</p>	<p>Strategy covers cricket, football, rugby and hockey in line with 'Towards a Level Playing Field' guidance.</p> <p>One of the conclusions of the strategy is the need to accommodate the likely move towards more sport being played on artificial pitches. Key objectives include:</p> <ul style="list-style-type: none"> • Deficiencies in playing pitches identified should be addressed, including a focus on improving the stock of synthetic turf pitches in the District • Main towns and local centres should provide key sports facilities including those of a District level • There should be an appropriate network of more localised sports facilities in villages across the District • Facilities at high and middle schools should be developed and enhanced for wider community use, in particular the potential replacement of school buildings over the next decade is an opportunity to provide top quality sports facilities for school and community use

Document	Key Findings/Issues
	<ul style="list-style-type: none"> • Sports facilities should be to a standard suitable for their role and include changing / ancillary facilities as appropriate
Wansbeck Playing Pitch Strategy (2002)	Although not available for review, the document is referenced in Wansbeck's 2007 Local Plan, which states that a local standard of 0.8 hectares of playing pitches per 1,000 people should be adopted for planning purposes. The plan highlights that "The Playing Pitch Strategy is in the process of review as part of an assessment of open space, outdoor sport and recreation in the District."
Wansbeck Open Space Assessment (2007)	<p>Whilst there is adequate provision in terms of the number playing pitches, the quality of pitches varies; 26% were rated as poor. Changing rooms are present on 55% of sites and the quality also varied.</p> <p>There is a wide range of existing indoor sport and leisure facility provision but significant investment is required to improve quality and increase capacity.</p>

Section 2 - Overview of Northumberland

2 Overview of Northumberland

Northumberland Profile

- 2.1 Northumberland is England's most northerly county. The population of the County is 310,970 (Source: ONS, mid-year estimates 2007). A substantial part of the county's overall area is designated National Park and is managed by the Northumberland National Park under the remit of maintaining its cultural and physical heritage, with sustainable policies and creating a thriving community and economy. In broad terms:
- **The north of the county is open and sparse - the principal towns of Alnwick, Berwick and Morpeth serve large catchments that are also partially influenced by both Edinburgh to the north and Tyneside to the south;**
 - **The west of the county is largely rural, but 'split' by major road and rail transport corridors running into Newcastle and Gateshead, with many of the communities characterised by an economic and cultural interdependence with the Tyneside conurbation; and**
 - **The southeast corner of the county is a compact coastal lowland intersected by several river estuaries, which has been substantially changed by extensive mining activity. It is distinctly built up with the county's largest settlements of Ashington, Blyth and Cramlington sited in protected corridors on the northern fringe of Tyneside. Many of the communities living in this area are characterised by high levels of deprivation following the decline of coal mining industries. South East Northumberland encompasses the former districts of Blyth Valley and Wansbeck and extends westward to include the market town of Morpeth and to the North into the former Rural Coalfield area and has been designated as Growth Point Status.**
- 2.2 Northumberland County Council is the new unitary authority for Northumberland which became effective from 1 April 2009. The new Northumberland County Council is made up of the six former District Councils – Alnwick, Berwick-upon-Tweed, Blyth Valley, Tynedale, Castle Morpeth and Wansbeck. The County covers an area of 507,732 hectares.
- 2.3 The County has a rich and diverse history and industrial heritage, however the decline in traditional industries such as coal extraction has severely impacted on the economic prosperity of the County's local communities and has led to social, economic and health problems amongst these communities.
- 2.4 Settlement distribution in Northumberland has historically established due to key factors including access to transport and trade routes, topography, the presence of available resources and defence. As a result the settlement pattern focuses on the following areas:
- **"The valleys of the River Tyne, River Till, River Coquet, River Aln, River Allen, River Tweed, River Wansbeck and their associated tributaries.**
 - **The Coast and Coastal Plain where the land was suitable for farming, the coast for fishing and where minerals were relatively easy to extract.**
 - **The foothills and more sheltered areas of the North Pennines and Cheviot Hills".**

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 2.5 For the purposes of local administration and planning Northumberland is considered to have three main areas based on demographic, geographic, cultural, and heritage differences, and the varying influence of their neighbouring communities. The areas are:
- **North Area**
 - **West Area**
 - **South East Area**
- 2.6 According to the Office of National Statistics, the County's population has seen a 1.2% increase between 2001 and 2008 and a further 5% increase is predicted by 2018. There are a number of proposed developments that are planned as a consequence of the Council gaining growth point status for the South East area of the County.
- 2.7 The population trends within the County also reflect the split between the more rural areas of North Northumberland which has a great appeal to second homeowners and those seeking the more rural lifestyle and the more densely urban southern areas adjoining Tyneside and the City region around Newcastle. A key issue from the Core Strategy is how to rebalance the population profile that exists in the County.

North Area

- 2.8 The north of the county is distinctly open and sparse. Rich archaeological features reflect its troubled borderland past. The principal towns of Alnwick, Berwick and Morpeth serve large catchments that are also partially influenced by both Edinburgh to the north and Tyneside to the south. Many of the communities living in this area are characterised by physical remoteness and rural disadvantage.
- 2.9 From the GIS digital mapping the North Area is the second largest of the three areas covering 240,685 hectares. It has a population of 89,017 people. Compared with the county as a whole, the North Area has a lower proportion of children, a lower proportion of people of working age, and a higher proportion of people of retirement age and over.

The main towns in the Area are:	Other key settlements are:
<ul style="list-style-type: none">• Berwick• Alnwick• Morpeth• Amble	<ul style="list-style-type: none">• Rothbury• Wooler• Widdrington Station• Belford• Seahouses• Pegswood• Hadston

West Area

- 2.10 The West Area is the largest of the three areas, covering an area of 246,757 hectares. It has a population of 74,453 compared with the county as a whole, the West Area has a lower proportion of people aged 16 to 29, a lower proportion of people of working age, and an equal proportion of children.
- 2.11 The west of the county is distinctly rural, albeit split by major road and rail transport corridors running into Newcastle and Gateshead. The towns of Ponteland and Hexham are desirable places to live and visit, placing considerable demands on their services and infrastructure. Many of the communities living in this area tend to have an economic and cultural interdependence with Tyneside.

The main towns in the Area are

- Hexham
- Prudhoe
- Ponteland
- Haltwhistle

Other key settlements are:

- Bellingham
- Corbridge
- Haydon Bridge
- Allendale

South East Area

- 2.13 The South East Area is the smallest of the three areas, covering 15,084 hectares. It has a population of 147,500. Compared with the county as a whole, the South East Area has a higher proportion of children, a higher proportion of working age, and a lower proportion of retired people.
- 2.14 The southeast corner of the county is a compact coastal lowland intersected by several river estuaries; its natural landscape has been substantially changed by extensive mining activity. It is distinctly built up with the county's largest settlements of Ashington, Blyth and Cramlington sited in protected corridors on the northern fringe of Tyneside. Many of the communities living in this area are characterised by high levels of multiple deprivation following the decline of coal mining industries.

The main towns in the Area are

- Ashington
- Blyth
- Cramlington
- Bedlington/Bedlington Station

Other key settlements are:

- Newbiggin-by-the-Sea
- Seaton Delaval
- Guidepost/Stakeford
- Ellington
- Lynemouth

- 2.15 Each settlement has a shopping centre and a range of other services and facilities, the coastal villages of Ellington and Lynemouth also act as service centres.

- 2.16 Further increases in population are projected beyond 2015 and these can be used to model the likely needs and levels of surplus and deficiency in open space provision.

The Growth Agenda

- 2.17 The Government's vision for towns and cities is of prosperous and cohesive communities offering a safe, healthy and sustainable environment for all. A vital ingredient for sustainable communities is an adequate supply of good quality housing offering a choice of types and tenures, including affordable housing for key workers and those in lower income groups.
- 2.18 The former Labour government, through its Homes for the Future (2007) Green Paper, wanted to promote the fact that good quality housing is not simply reliant on the design of the buildings, rather it relies on integrating the design and layout of the built environment with the natural environment. As such development needs to consider the green infrastructure as a key mechanism to delivering environmental improvements and as such are central to developing sustainable communities as they enhance the opportunity for residents to have a good quality of life. The Green Paper also identifies the opportunity to improve the urban rural fringe through the restoration and protection of the countryside, improving local access to nature and ensuring that green space is recognised as an integral part of the environment.
- 2.19 Applications were invited from local authorities with a predicted increase in housing of 500 new properties per annum. The former government announced twenty-nine locations to be supported as Growth Points, and to share in an initial £40m fund for infrastructure projects and essential studies to support sustainable growth. Following the success of the first round of Growth Points, a second round of the initiative was announced in the Housing Green Paper on 23 July 2007, which, for the first time, allowed areas in northern England to bid for Growth Point Status. Twenty-one second round Growth Points were announced on 16 July 2008; South East Northumberland gained Growth Point Status as part of this initiative.

Key Issues – Population

- 2.20 A number of key issues with regard to the population characteristics of Northumberland are shown below. Each has implications in terms of the current and future supply and demand for pitches and outdoor sports facilities.
- 2.21 **Ageing Population** – In relation to population breakdown, Northumberland's population is weighted towards the older age groups as is the case nationwide. Northumberland's population is "greying" faster than that of England as a whole, and in some rural areas the balance has already shifted dramatically away from the pattern elsewhere – for instance in the former Berwick district, it is estimated that over-50s will this year become the majority of the population. This may have implications for the type of sports played and subsequently the facilities demanded. By 2021, all (former) districts in the County will have a higher proportion of over-85s than the English average, including Wansbeck (3.1%) and Blyth Valley (3.0%), which are expected to have the lowest proportions within the County.
- 2.22 **A Growth in the Elderly Population** - A large proportion of the population is approaching retirement and services/facilities will increasingly need to take account of these demographic changes when planning, delivering and financing future priorities. This trend will have implications in terms of the demand for specific types of outdoor facilities – for example a decline in demand for pitch space for 'contact sports'.
- 2.23 **Falling numbers of Younger People** – As is the case across many parts of the country, Northumberland has a falling proportion of younger people. However, this issue could be more significant because of the increasingly large older population. This has an impact on the type and level of need for future indoor and outdoor sport facilities, in addition to the levels of disposable income (retired people have greater disposable income than younger people) which can be spent within the local economy on services and use of facilities.

- 2.24 **Population Sparsity and Distribution** - Northumberland has a very low population density, except in the urban areas. This population distribution together with a low population density makes delivering services effectively and efficiently more challenging in some cases.
- 2.25 It is therefore crucial that there is a good spread of different types of open space, outdoor sport and recreational facilities across the County in and around urban areas and the more remote rural settlements throughout the county. Good quality, accessible provision covering a range of local needs should be provided within rural areas, especially where poor transport services are available.
- 2.26 One of the key challenges the Council faces is to ensure that the places where people live and work are attractive and provide a good quality of life whilst also encouraging people to visit and potentially invest. A further challenge is to ensure that the natural environment is sustainable and can adapt to the wider global influences such as predicted climate change.
- 2.27 The Council and its partners are determined to ensure that the County's economic growth, investment and community life support a vibrant quality of life the sense of place, whilst also ensuring that the quality of the natural environment for both existing and new communities is enhanced and improved. A key opportunity to achieving this is through the further provision, enhancement and protection of the natural open space resources or the green infrastructure asset.
- 2.28 It is therefore key for the Council to work in partnership and support a variety of stakeholders, national organisations and local people to ensure the delivery of a good quality sustainable environment that in turn provides an attractive place in which to live, work, visit and invest.

Housing Need in Northumberland

- 2.29 It is understood that a Housing Strategy for 2011-2016 will be implemented. Before this is developed an Interim Housing Strategy for 2010 has been put forward. The guiding principles of this strategy (which are quite likely to be taken forward in the formal strategy from 2011) include the need to accommodate a changing market and the need for flexibility in terms of policies to best reflect the needs of the population.
- 2.30 While it can be anticipated that the housing needs will be consistent with the overall Core Strategy and Local Development Framework (which will identify major areas for development and growth) it will be necessary for pitch and sports facilities provision to take account of the nature of future proposed communities in terms of their likely demographic makeup.

Demographic Profile

- 2.31 It is important to consider the demographic make up of the County as key demographic and socio-economic characteristics are known to influence demand characteristics. For example, certain age-groups are known to register higher participation rates in a number of sport and leisure activities; deprived communities often experience issues relating to access to services and opportunities; cultural backgrounds may result in some passive and active recreation pursuits being favoured over others; car ownership levels can impact on the range of facilities that can be accessed.
- 2.32 The population of the County is 310,970 (Source: ONS, mid-year estimates 2007), for the purpose of this study these figures are utilised.

Deprivation Indices

- 2.33 The Deprivation Indices are primarily a means of comparing the level and extent of deprivation within an area and is formulated by comparing one authority or neighbourhood with another.

- 2.34 In 2004 this was revised to create new geographic comparisons or – Super Output Areas (SOAs). This is a lower (more detailed) level of geography than previously. The Indices are formed of 7 domains (Income deprivation; Employment deprivation Health deprivation and Disability; Education, Skills and Training; Barriers to Housing and Services; Living Environment deprivation; Crime) as well as one overall Index of Multiple Deprivation (IMD) made up of the combined domains.
- 2.35 Northumberland is ranked 87th most deprived County in England (1 is the most deprived and 149 is the least deprived). Northumberland is overall the least deprived County in the North East. At a local level:
- **Tynedale is the least deprived of the former districts in the region.**
 - **18% of the Northumberland population live in the most deprived Super Output Areas in England.**
 - **Blyth and Wansbeck are the most deprived of the former districts in Northumberland.**
 - **Wansbeck ranks amongst the most deprived 50 districts in England 39% of Wansbeck's population live in the most deprived Super Output Areas in England.**
 - **Berwick-upon-Tweed has only 1 Super Output Areas amongst the least deprived 30% of Super Output Areas in England; all other districts have at least 3.**
 - **Castle Morpeth having 13 Super Output Areas is amongst the least deprived.**
 - **30% of all Super Output Areas of Deprivation is concentrated in the more urban South East of Northumberland.**
 - **The exceptions to this are the Barriers to Housing and Services and Living Environment deprivation where deprivation is concentrated in the more rural parts of the County.**

Health Profile

- 2.36 The health profile of people in Northumberland is similar to the England average. Levels of deprivation are lower than the England average. For men, life expectancy is similar to the England average; for women it is slightly worse than the England average.
- 2.37 There are inequalities within Northumberland. For example, life expectancy for men living in the most deprived areas is 8 years lower than for men living in the least deprived areas. For women it is 5 years lower. Over the last ten years, the death rates from all causes and early death rates from cancer and from heart disease and stroke have all improved and are similar to the England average.
- 2.38 The percentage of physically active children in Northumberland is higher than the England average. The percentage of mothers initiating breast feeding is lower than the England average. The incidence of skin cancer and the rate of hip fractures in people aged over 65 are similar to the England averages.
- 2.39 The estimated percentage of binge drinking and the rate of hospital stays for alcohol related harm are higher than the England average. Tackling this is a priority. **(Source: APHO and Department of Health, 2009).**

The Importance of Open Space, Sport & Recreational Facilities

- 2.40 The following information identifies how open space, sport and recreational facilities are important to local people and how they contribute to wider social agendas of, Local Pride, Health, Education and the Environment and its importance locally in Northumberland. Good quality open space, sport and recreational facilities have an important contribution to make to the delivery of the Sustainable Community Strategy.

Sense of Place and Civic Pride

- 2.41 Open space, sport and recreational facilities are important to community cohesion because they can facilitate bringing people together, by providing meeting venues and social spaces for events and activities. They are an essential part of urban heritage and the urban fabric that makes up an area. As such they have an integral role in providing balanced and sustainable communities.
- 2.42 Well managed, good quality open spaces improve the appearance of an area, not least because they attract tourists and visitors. An urban area with good quality open spaces and areas for wildlife creates a positive image and can be a factor that helps attract inward investment from the relocation of businesses. In turn this increases employment opportunities for local people and supports physical regeneration. At the local level they stimulate local pride and make people feel good about where they live.

Health

- 2.43 The health benefits of open space, sport and recreational facilities are well documented. Access to good quality, well maintained open space has significant impact on our physical health and mental well being. Open spaces of all kinds provide opportunities to enjoy the natural world and to get involved in a wide range of leisure activities; they encourage people to walk more, to participate in sport or to simply enjoy the green and natural environment. The more attractive and accessible the green space is, the more likely it is to be used by a wide range of people.
- 2.44 Physical activity is a major contributor to good health and can reduce coronary heart problems, diabetes, certain cancers and mental health problems. Trees and woodlands help reduce the effect of urban pollution and allotments provide opportunity for more sustainable organic lifestyles, as well as improved health from the regular exercise involved.

Education

- 2.45 Open space, sport and recreational facilities provide a valuable resource for education as outdoor classrooms, and also spaces for training in vocations such as nature conservation, horticulture, community work, landscaping, forestry and sports development. They also provide an important environment for children to learn, take part in physical activity and play through social interaction.

Environment

- 2.46 Open spaces are essential to supporting the species diversity of the County, providing habitat and access to a rich variety of flora and fauna in an increasingly urbanised society where urban expansion has meant that true countryside becomes increasingly distant from most people.
- 2.47 Open space has an increasingly important role to play in mitigating the effects of climate change. As urban areas get hotter the cooling effect of open space and the shade they provide will become increasingly valuable. Open spaces can act as flood storage and wildlife corridors that allow the migration of plants and animals from one area to another, thereby acting as important stepping stone links between urban and rural areas ensuring wildlife in both can connect.

Informing the Local Development Framework

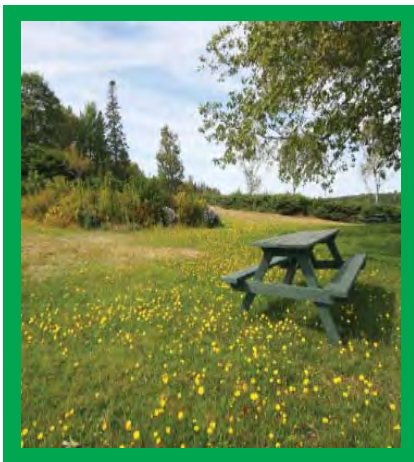

- 2.48 The benefits derived from having a wealth of both quantitative and qualitative open space, sport and recreational facilities is embedded in a range of advisory documents. PPG17 states: “Open spaces, sport and recreation all underpin people’s quality of life. Well designed and implemented planning policies for open space, sport and recreation are therefore fundamental to delivering broader Government objectives.
- 2.49 Thus PPG17 (together with its Companion Guide) emphasises the role of the planning system in assessing not only opportunities and needs for sport and recreation provision, but also safeguarding open space and facilities which have recreational value.
- 2.50 Accordingly, PPG17 helps ensure that, when reviewing strategic policy and preparing development plans, councils have a robust framework against which adequate land and water resources for organised sport and informal recreation can be allocated. Local planning authorities have a duty to take account of the community’s need for recreational space, and in so doing must have regard to current levels of provision and deficiencies. Likewise, there is a need to balance the competing demands of pressure for development of open space and the potential conflict with the wider public interest.
- 2.51 A key component of this study is to ensure that it offers a clear and consistent strategic approach to open space, sport and recreational facilities that supports the Local Development Framework. Indeed, the increased focus on spatial planning and ‘place making’ evolving from the 2004 changes to the planning regime makes it essential that the Council takes forward its policies on open space, sport and recreation in a robust manner.
- 2.52 By commissioning this study the Council has taken a major step towards underpinning and reinforcing the robustness of its approach to the provision, use and management of open space, sport and recreational facilities. This is because the Companion Guide to PPG17 makes it clear that, provided local authorities have undertaken assessments of need and audits of existing facilities compliant with PPG17, any locally determined provision standards will meet the tests of “reasonableness” set out in DoE Circular 05/2005, (relating to Planning Obligations).
- 2.53 This means that authorities will be justified in using them as the basis for planning conditions or obligations in appropriate circumstances.
- 2.54 However, there will be a need to apply any policy with pragmatism, certainly in the short term where the use of planning agreements might be contemplated. This is because the present economic climate has alerted local planning authorities to the risk of development being stifled by unreasonable demands on planning gain that could effectively be the difference between a project either being brought forward or being rendered unviable.
- 2.55 That said, PPG17 (paragraphs 23 and 33) reinforces the message that obligations can be used to reduce or prevent both quantitative and qualitative deficiencies in provision. Accordingly, a key purpose underlying this study has been to ensure this test of reasonableness can be met and thereby to provide Northumberland - as local planning authority - with the information necessary to draft plans and policies including supplementary planning guidance.
- 2.56 When formulating and framing policies, local planning authorities will need to reflect the Government’s objectives referred to earlier and as set out in the prologue to PPG17. These are:
- **“Supporting an urban renaissance** - local networks of high quality and well managed and maintained open spaces, sports and recreational facilities help create urban environments that are attractive, clean and safe. Green spaces in urban areas perform vital functions as areas for nature conservation and biodiversity and by acting as ‘green lungs’ can assist in meeting objectives to improve air quality.”

- **“Supporting a rural renewal** - the countryside can provide opportunities for recreation and visitors can play an important role in the regeneration of the economies of rural areas. Open spaces within rural settlements and accessibility to local sports and recreational facilities contribute to the quality of life and well being of people who live in rural areas.”
- **“Promotion of social inclusion and community cohesion** - well planned and maintained open spaces and good quality sports and recreational facilities can play a major part in improving people's sense of well being in the place they live. As a focal point for community activities, they can bring together members of deprived communities and provide opportunities for people for social interaction.”
- **“Health and well being** - open spaces, sports and recreational facilities have a vital role to play in promoting healthy living and preventing illness, and in the social development of children of all ages through play, sporting activities and interaction with others.”
- **“Promoting more sustainable development** - by ensuring that open space, sports and recreational facilities (particularly in urban areas) are easily accessible by walking and cycling and that more heavily used or intensive sports and recreational facilities are planned for locations well served by public transport.”

2.57 Extending the advice in PPG17 and its Companion Guide to ensure that the Council's evolving strategy and policies embrace the concepts of sustainability and place-making espoused by the 2004 Planning Act, the following additional considerations will be relevant:

- **How to protect and/or enhance existing open spaces and sport/recreational facilities valued by the local community.**
- **Situations where the local planning authority may wish to allow the redevelopment of existing open space or sport/recreational facility. PPG17 offers guidance and establishes the circumstances where this approach can be acceptable.**
- **Opportunities for relocation of poorly located but necessary open space or sport/ recreation facilities.**
- **An assessment of what additional onsite or offsite provision may be required as a result of new developments.**

Section 3 - Methodology

3 Methodology

- 3.1 This Strategy has been developed to provide the evidence base that will ensure Northumberland County Council (NCC), through robust planning policy, delivers the right type of provision in the right place to meet local need. It is designed to provide transparent and clear guidance on what type of provision is needed and where and as such is in accordance with the government's Planning Policy Guidance Note 17 (Planning for Open Space, Sport and Recreation- PPG17) and the companion guidance outlined in 'Assessing Needs and Opportunities'. Both documents require local authorities to undertake a comprehensive audit and assessment of open space, sport and recreation with the view to:
- **Identifying current and future need at local, neighbourhood and council wide levels**
 - **Identifying the current level and potential future use and demand**
 - **Developing a robust strategic framework that ensures the delivery of the right amount of good quality accessible open space, outdoor sport and recreational facilities at the local level**
- 3.2 The Guidance outlines 5 basic but essential stages to the development of robust assessments, these are:
- **Stage 1 Identifying Local Need (Consultation and Strategic Review)**
 - **Stage 2 Identify and Audit Local Provision**
 - **Stage 3 Use the evidence to establish local standards of provision**
 - **Stage 4 Apply the provision standards**
 - **Stage 5 Make recommendations and draft policies based on stages 1-4**
- 3.3 In developing the assessment a range of tried and tested techniques and methods have been applied and these are explained in more detail in the following sections of this strategy.

Stage 1 Identifying Local Need

Public Consultation

- 3.4 In order to assess local need a public consultation exercise in the form of an online survey was established in February 2010 and was published on the Council's website. The survey was publicised through the Council with reception areas in council buildings encouraging people to participate and have their say. The consultation was live for five months.
- 3.5 The public consultation survey follows best practice and has been used on a number of previous studies undertaken by other local authorities across the UK. It is designed to identify local need and public opinion as to the quality, quantity and accessibility of greenspace; it is also designed to identify the levels of use by local people of the different types of greenspace provided across the county.
- 3.6 The results of the public consultation have also been benchmarked against previous consultation undertaken in PPG17 studies by the former District Councils. These were considered still relevant in most instances as they had been completed within the last five years.

Stakeholder Consultation

- 3.7 Consultation has been run in parallel with the development of the Green Infrastructure Strategy and Playing Pitch Strategy that have also been undertaken as part of the evidence base to allow informed decisions in relation to planning policy with regards to future and planned provision of open space, sport and recreational facilities.
- 3.8 The consultation has involved face to face meetings with national agencies, governing bodies, parish and town councils, council officers and voluntary organisations these have include Natural England, Sport England, The Forestry Commission, English Heritage, Planning Services, Countryside Service, Leisure and Cultural Services, the Leisure Trusts, Groundwork North East, Northumberland Wildlife Trust and organisations such as the Northumberland National Park Authority, Kielder Partnership and Hadrian's Wall Heritage Ltd.
- 3.9 It has also involved consultation with local schools, private providers and sports teams to establish the range and demand for facilities across the County.

Strategic Review

- 3.10 In order to assess the range and level of existing facilities, open space, outdoor sport and recreation provision a number of policies and plans have been reviewed. This has included national guidance and best practice advocated by organisations such as CABI space, Natural England and Sport England. A detailed review of National Regional and Local strategies, policies and plans that have an influence on the provision of open space, outdoor sport or recreational provision in Northumberland is included in the appendices.
- 3.11 The reviews includes an assessment of the local planning policy in relation to open space, outdoor sport and recreation. Each of the former District Councils had progressed or completed some form of PPG17 based Greenspace Strategy which included various degrees of local needs assessment, qualitative analysis or setting of quantitative standards. Unfortunately each strategy had been completed to differing degrees and has used different consultation or site auditing methods. They have however provided a foundation on which this strategy has built in terms of consistency, detail and analysis.
- 3.12 At more local level this has involved reviewing plans and initiatives that may have an influence over the current and future quantity, quality or accessibility of provision.

Stage 2 Site Audit

Site Audit

- 3.13 A comprehensive audit was undertaken between February and April 2010; the audit examined the range and quality of provision in the County's parks and open spaces, natural green spaces, allotments, children's play areas, outdoor sports facilities, cemeteries, and recreational facilities. It has involved a site visit to 1300 sites across the County. All of these sites have been digitally plotted using a Geographical Information System (GIS) mapping process.
- 3.14 Each site was visited and evaluated by experienced auditors to determine its type and its quality. In order to do this each site was assessed against best practice methodologies such as the Green Flag Award – the national quality standard for parks. Each site was assessed from a visitor's perspective against a wide range of criteria that include:
- **“Access to the Site**
 - **How ‘Welcoming’ the site is**

- **How well maintained and managed the site is in terms of the quality of its infrastructure**
- **How safe the site is to use”**

- 3.15 The audit also assessed the quality of facilities within each site, including fixed play areas, skate-parks, ball courts, tennis courts, bowling greens, sports pitches, toilets etc.
- 3.16 The results of the audit were considered and analysed against feedback from the consultation to enable standards of provision to be set for each type of open space, sport and recreational facility in the County. The consultation feedback includes responses from local residents who regularly use open space, sport and recreational facilities.
- 3.17 The outcome is a PPG17 study that is firmly based on local evidence and a robust assessment of need.

Audit and Digital Mapping

- 3.18 A key stage in developing the study was to collate the information currently held by the Council and governing bodies into a digital database. The database pulls together the threads of information and captures sites by creating digital layers for each of the different typologies. It will enable the Council to regularly update the information for use as a management tool to guide future decisions for planning and management of open space.
- 3.19 In developing the PPG17 study a comprehensive qualitative audit of open space, sport and recreation has been undertaken to support the quantitative data captured as part of the digital mapping. This qualitative audit has assessed each site against best practice in terms of both the physical condition of the site and the infrastructure within them.
- 3.20 Digital maps have been produced from the database and are an important element in providing the information that has guided the development of this study.
- 3.21 The study covers all open space, sport and recreational provision across the County. It is important to note that the audit has focussed on accessible greenspace provided in and around urban and rural settlements and as such standards are to be set only for the typologies listed in Figure 3.1.
- 3.22 The setting and application of standards is discussed in more detail later, however it is important to outline what has and what has not been included in the quality and quantity assessment.

Figure 3.1 : Quality and Quantity Assessment Inclusions

Sites assessed and included	Sites not included or assessed
Parks and Gardens	Historic Country Estates such as Alnwick Castle and Gardens, Belsay Hall
Natural and Semi Natural Greenspace	Coastal features beaches, headlands and major sand dune systems, large open access areas such as Heathland or moorland Extensive woodland, large water bodies Public rights of way
Outdoor Sports Facility	Sites without formal community use e.g. some school playing fields

Sites assessed and included	Sites not included or assessed
Amenity Greenspace	Roadside verges and highway grass areas
Provision for Children and Young People	Play areas associated with private business such as public houses
Cemetery and churchyards	Private land with no community use
Allotments	

- 3.23 There is no doubt that the sites excluded from the assessment and audit make a significant contribution to the recreational opportunity and visual attractiveness of the Northumberland landscape. As such they are an important part of the County's green infrastructure, biodiversity interest and tourism value and are discussed as part of the Green Infrastructure Strategy that has been developed as an accompanying document to this assessment.
- 3.24 The primary reason for not including these generally larger areas of open space, is that in some cases they are a historic provision for example the Historic gardens and estates which are not freely accessible, or they are a natural landscape feature such as beaches, coastline or moors and heathland. Given these factors they cannot be included in any calculation for the development of standards.
- 3.25 The primary purpose of developing standards is to guide planning policy as a result of proposed future growth. It is a means of guiding planners in their work with developers to secure the appropriate level of open space provision as a result of increased population due to new housing development. Therefore if a developer builds 500 new homes then planning officers need to be in a position, if needs be, to identify exactly what types of open space or recreational facilities need to be provided to sustain/enhance the quantity standards for the County. As such they cannot realistically ask a developer to contribute to the development of heathland, moor or beach as part of a new development.

Stage 3 Establish Local Standards of Provision

- 3.26 Guidance from Central Government advises that all Local Authorities in England should undertake the development of Local Standards of Provision for open space, sport and recreation. The guidance advocates that the standards set need to embrace three core elements for each type of provision:
- **Quantity Standard** - set by analysis of the existing quantity or provision by type and with due consideration to the views of the local community in terms of the current provision against demand or level of use. Quantity Standards also need to recognise future growth and to be realistic in terms of being achievable
 - **Quality Standard** - these are derived from the quality audit and outline the level of quality for each type of provision based on best practice and the views of the local community. It is important to set quality standards that are achievable based on countywide and neighbourhood area average quality ratings.
 - **Accessibility Standard** – these have been derived from best practice and national guidance that includes Natural England's Access to Nature (ANGst) recommended distance thresholds and from the public consultation.

- 3.27 It is important to note that the standards set are the minimum standards that are acceptable. This assessment establishes standards for open space, sport and recreational provision in Northumberland in accordance with the PPG17 companion guidance.
- 3.28 Open space policy in Northumberland has been influenced by national standards that have been produced by national bodies. The most influential has been the standards set through Fields in Trust (formerly the National Playing Fields Association (NPFA)) and Sport England. Other national bodies such as Natural England (formerly English Nature), the Lawn Tennis Association and the Association of Leisure and Allotment Gardens have all promoted standards of provision. Crucially, PPG17 advocates the development of locally determined provision standards based on local needs that are sustainable and more importantly reflect local circumstance.

Assessing Quantity

- 3.29 The assessment and subsequent analysis of provision has been undertaken on a Countywide and neighbourhood area basis. The analysis and standards will allow the Council to benchmark and to make informed decisions about the supply and demand of provision across the County.
- 3.30 In accordance with the PPG17 guidance, standards have been set following a robust assessment that considered the quality and quantity of open space provision across the County by type.

Typology

- 3.31 The County's provision of open space, sport and outdoor recreation can be classified into seven core types as set out in Figure 3.2.
- 3.32 The objective of placing a site into a typology is to provide an understanding of the amount of that specific type of open space that is available to local people on a County and Sub Area basis. This involves assigning each space to a specific type of provision according to its main purpose. For example the main purpose of a site with sports pitches, changing facilities and tennis courts is Outdoor Sport and is categorised as such.
- 3.33 The typologies for Northumberland are identified in Figure 3.2 and mirror the typologies advocated by PPG17 guidance and also the typologies of the former District Greenspace Strategies. This latter point is a deliberate approach to link previous work with this study as part of an integrated approach to the emerging LDF.

Figure 3.2 : Northumberland PPG17 Typologies

Typology	Primary Purpose
Parks and Gardens	Accessible, high quality opportunities for informal recreation and community events, horticultural display and experiencing wildlife. The typology includes urban parks, country parks, formal public gardens and recreation grounds.
Natural and Semi-Natural Greenspace	Natural and semi-natural areas providing access to wildlife, environmental education and awareness, biodiversity and nature conservation. The typology includes woodlands, scrubland, wetland and nature conservation areas.
Amenity Greenspace	Open space in residential areas, village greens and informal recreational space. Opportunities for informal activities close to home or work or enhancement of the appearance of residential or other areas. This typology includes civic space.

Typology	Primary Purpose
Outdoor Sports Facilities	Sites specifically intended to meet demand for formal participation in outdoor sports including pitch sports, tennis, bowls, athletics or countryside and water sports.
Provision for Children and Young People	Areas designed primarily for play and social interaction involving children and young people, such as equipped play areas, multi-use games areas and skateboard parks.
Allotments	Opportunities for those people who wish to grow their own produce as part of the long term promotion of sustainability, health and social inclusion. Allotments also offer opportunities for community gardens and biodiversity value.
Cemeteries and Churchyards	Quiet contemplation and burial of the dead, often linked to the promotion of wildlife conservation, biodiversity and to provide a link to the past. Also includes closed burial grounds used for informal recreation.

- 3.34 In order to set local standards existing and previous consultation concerning open space has been considered. Further consultation has taken place with key stakeholders, schools and colleges, local residents and user groups. The assessment has also considered existing policies, strategic documents and national, regional and local policy.

Assessing Quality

- 3.35 To ensure the study complies with PPG17 guidance, a quality assessment has been undertaken for the County's open space, sport and recreational facilities. The quality audit essentially has four recognised purposes these are:
- **To gauge the quality of each site at a given time, through the evaluation of the site infrastructure its condition and quality. The sites are measured in a consistent and objective way and the audit reflects the condition of sites from a visitors perspective;**
 - **To identify site characteristics and features that result in some sites being low quality and to provide information regarding the opportunity for improvement;**
 - **To establish a quality standard for the County's open space provision;**
 - **To identify sites that the Council should protect and those that would benefit from improvement.**
- 3.36 Quality relates to the range of facilities and physical infrastructure contained within individual sites, the audit considers factors such as accessibility, safety, management, maintenance and overall impression.
- 3.37 Although the audit was primarily driven by PPG17, the information collated will provide the County with a comprehensive overview of the condition of provision and will provide a level of management information not previously available. The information will enable the County to make informed decisions with regards to the resources required to undertake improvements in management and maintenance.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 3.38 A comprehensive audit of 1300 individual sites has been undertaken based on the variety of open space, sport and recreation provision across the County. The sites were identified and agreed with the Council prior to the audit being undertaken. The audit also gives a clear and robust overview of the physical condition of open space across the County and within defined areas.
- 3.39 Quality Inspections have been undertaken via a site visit and the completion of a scored proforma. The quality assessment proforma is based on a number of key criteria encompassing the quality aspects of the Green Flag Programme, ILAM Parks Management Guidance and the Tidy Britain Scheme. The quality assessment results are attached as Appendix 1 and the quality criteria are set out in Appendix 3. The site scores are translated into a percentage and then measured against the quality line rating as illustrated below:

Quality Line

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

- 3.40 The quality audit provides an indicative rating of quality out of 100%. It is important to note that the quality score represents a “snapshot” in time and records the quality of the site at the time of the visit audit.

Assessing Accessibility

- 3.41 An assessment of accessibility has been undertaken to identify the extent to which local residents are able to access the various differing forms of provision across the County. This is based on travel time and travel method to the variety of provision. Distance thresholds have been calculated for each typology, responses from consultation alongside a benchmarking exercise with the former District Authorities.
- 3.42 Accessibility analysis has been undertaken using two methods, firstly the average travel time identified from the consultation with local people (based on an average walking speed of 3 mph as recommended in PPG 13) and secondly by application of accessibility thresholds based on a derivative of standards recommended by Natural England in their Nature Nearby ANGst Standard and by the Town and Country Planning Association (TCPA) Bio-diversity by Design Guidance.
- 3.43 From a PPG17 perspective the ANGst model recommends standards that people living in towns and cities should have and as such is seen very much as the target the council and its partners will aspire to deliver:
- **That no person should be located more than 300m from their nearest area of natural greenspace of at least 2ha in size; (5 minutes walking distance)**
 - **Provision of at least 1ha of Local Nature Reserve per 1,000 population;**
 - **That there should be at least one accessible 20ha site within 2km from home;**
 - **That there should be one accessible 100ha site within 5km; and**
 - **That there should be one accessible 500ha site within 10km.**
- 3.44 The main emphasis of the ANGst model is that local people have easy access to natural and semi natural greenspace close to where they live.

- 3.45 ANGst recognises that these sites are an important resource that provide local communities with the opportunity to get close to nature and biodiversity as part of an everyday experience and therefore plays a positive role in contributing to their health and well being.
- 3.46 To reflect the significant variance in the County four tiers of scale have been adopted and derived from the TCPA and Natural England advice, these are:
- **Sub-Regional (sites or habitats over 500Ha)** these are the major Green Infrastructure assets such as the Coast, woodlands moors and larger country estates. The size threshold reflects the upper limits defined by both Natural England and TCPA
 - **Area (sites or habitats over 100Ha)** these are large parks and countryside sites, woodlands and designated sites such as National Nature Reserves
 - **Neighbourhood (Sites and habitat over 20 ha)** these are the main network of sites across the county such as the larger country parks
 - **Local (Sites over 0.2ha)** that are provided at the local level and a short distance from where people live
- 3.47 PPG17 advocates that the ANGSt model is an appropriate and generally accepted professional measure. However, it is important to note that the model is very much a quantitative rather than a qualitative measure that does not consider factors such as site quality, capacity or site fragility. Nor does it consider the role and function that the extensive linear rights of way network plays in the provision of accessible green infrastructure.

Assessing Needs

- 3.48 Consultation has taken the form of questionnaire surveys to the public and user groups, face to face consultation, telephone and questionnaire surveys of key stakeholders and other interested bodies.

Analysis

- 3.49 Analysis has been undertaken at the County wide (Northumberland as a sub-region) level and also at the Sub Area level to provide an insight at a more local level.
- 3.50 Analysis has involved:
- **“The interpretation and examination of the various consultations undertaken to identify issues, accessibility thresholds and levels of use**
 - **Interpretation and detailed analysis of the site quality audits**
 - **Detailed mapping and analysis that has involved the development of a comprehensive digital data set and the creation of individual mapping layers to illustrate the provision in terms of quantity, quality and accessibility”**

Area Analysis

- 3.51 In order for the study to reflect the differences in provision and spatial distribution of facilities within local communities the strategy considers provision on two levels. Firstly the quantity, quality and accessibility of provision at a County-wide provision level and secondly by the analysis at the neighbourhood management level. Each area represents the emerging Neighbourhood Management Areas and by undertaking the analysis on this basis it ensures each area has a fair distribution of provision made accessible to all.

3.52 By making use of the 3 areas the PPG17 study:

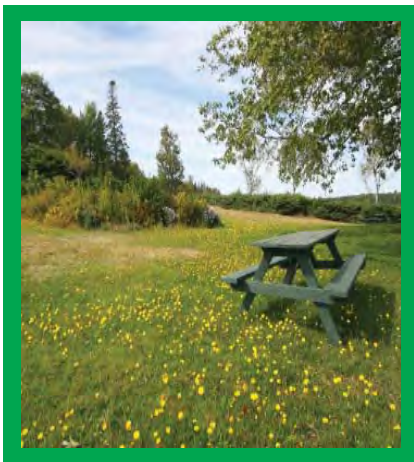

- **Allows a comparison to be made between the different areas of the County;**
- **Identifies the spatial distribution and accessibility of facilities within each Area compared to the County overall;**
- **Provides an insight into what facilities or provision needs investment, replacement or new provision when negotiating financial contributions with developers.**

3.53 The data collected in developing the PPG17 study has been developed in such a way as to enable the Council to drill down further and to undertake analysis if needed at a ward level.

3.54 For the purpose of this study the following definitions are relevant:

- **Countywide** – everything within the administrative footprint of Northumberland County Council
- **Neighbourhood Area** – the three sub areas identified within the County i.e. North, West and South East
- **Wards** – the electoral boundaries represented by elected Members

Section 4 - Consultation

4 Consultation

- 4.1 From the Consultation undertaken to inform this study a number of issues have been raised concerning the provision, management and maintenance of open space, sport and recreation facilities in Northumberland. The key issues are outlined below.

Public Consultation

- 4.2 In order to develop a strategy and set local policies from it, it is essential to consult with the local community to gain an insight into local needs and aspirations. It is also important to ascertain the views of local communities as part of the community planning process. The Council undertook consultation with the residents and County Council staff living or working within Northumberland. This took place through a standard questionnaire approach as follows:

- **Online Questionnaire** – this went ‘live’ in February 2010 and was published on the Council’s website. The survey was publicised through the Council with reception areas in council building encouraging people to participate and have their say. The consultation was live for five months. The survey was advertised in the local press, on the Council Web Site, public libraries and internal intranet.
- **Paper Questionnaires** – a paper copy of the questionnaire was available from Council Offices on request.
- **Freephone Consultation** – The Council advertised the opportunity to provide comments and complete the public survey via a free-phone telephone line made available throughout the consultation process.

- 4.3 Consultation with the public attempted to identify local needs and aspirations and importantly the issues at a local level to enable informed decisions about the future management and provision of open space to be developed. The questionnaire responses have been analysed, and a database has been established that will provide the Council with detailed analysis for types of open space and areas of residence. Evidence gathered from other Council-initiated consultation has also been used to strengthen the development of this study.

- 4.4 The survey was designed to assess views of residents, their attitudes and aspirations concerning open space, sport and recreation facilities across the County. In particular the survey set out to identify and establish the following:

- **The usage of open space, sport and recreational facilities by residents within the County**
- **The value local people attach to open space, sport and recreational facilities**
- **The attitude of local residents towards open space, sport and recreation facilities**
- **Attitudes to the level of existing provision and facilities**
- **The frequency of use by local residents to the differing types of provision**
- **Main mode of transport local resident use to access open space, sport and recreational facilities**
- **The views of residents on the accessibility of open space, sport and recreational facilities**
- **The barriers that prevent or reduce local use of open space, sport and recreational facilities**
- **Local needs and expectations**

Public Consultation Summary

- 4.8 The following provides a summary of the public consultation in Northumberland. Despite publicity and promotion of the online survey and the availability of hard copy surveys with free post and the free phone, the consultation response was unexpectedly low with only 204 local people completing the survey.
- 4.9 It is important to note that not all respondents answered each question. 33% of respondents identified themselves as male, 64% identified themselves as female, and 3% did not disclose their gender. The key findings from the responses given are:
- **Most people use amenity greenspace on a daily basis; parks and gardens are also used regularly with most respondents stating they use them at least once a week (34% of the respondents who answered the question in relation to use of parks stating they use them at least once a week).**
 - **Local people will make use of the more natural and semi natural sites on a weekly or monthly basis.**
 - **As expected from a public survey the more specialist provision such as outdoor sports facilities and allotment are used less frequently by the general public. This is because users tend to be part of a team or have paid a subscription or rental fee.**
 - **The majority of respondents stated they use open space provision primarily to go for a walk and exercise, keeping fit and improving their health.**
 - **People also identified using their local space to relax and think, to take the family, to walk the dog or to see wildlife. Less of a response was given to more specialist uses such as attending events, environmental education or being involved as an environmental volunteer.**
 - **In terms of the reason for not using open space provided, local people stated that the level and extent of dog fouling was the primary reason, lack of facilities and quality of facilities was also given as a key reason. Factors such as personal safety, anti social behaviour and vandalism are not such a concern for the majority of respondents.**
 - **Walking is identified as most normal means of getting to sites (parks, provision for children and young people, amenity greenspace), although the greatest number of respondents stated they would expect to drive to natural and semi natural greenspace, outdoor and indoor sports facilities that they use most regularly.**
 - **Very few respondents identified cycling or using public transport as a means to access their local greenspace.**
 - **Local residents were also asked to identify how long it takes them to travel to facilities in the County. The majority of respondents gave an average travel time of up to 20 minutes. Natural and semi natural sites and outdoor sports facilities were identified as being those to which most respondents travel for the longest periods of time. This is probably a reflection of the remoteness of many of these sites.**
 - **As well as asking how people travelled to the range of provision in the County, local people were also asked if travel time was acceptable and from the responses given local people do find their travel time acceptable.**
 - **72% of respondents who answered the question believe there is enough open space in the County.**

- From the consultation people who do not think there is enough provision identify that facilities and provision varies across the county and that there is a need for more indoor facilities, especially those catering for young people and children in the more rural villages.
- Respondents in general want to see more accessible built facilities in the rural areas; respondents also feel that the rural areas do have less accessible open space, despite being surrounded by countryside.
- People believe that public transport provision is poor and this can be a factor limiting access to open space.
- Local residents identified that the river corridors are not readily accessible.
- Most provision was rated as average to good in terms of its quality, design and overall appearance, and the range of facilities. Standards of cleanliness of open space and built facilities were deemed to be average to good.

Previous Studies

4.10 As identified earlier the former District Councils had, to varying degrees, completed PPG17 assessments. Of those that were complete local needs assessments identified issues characteristic to that District and its communities. In the main the problems and issues highlighted by local people were primarily concerned with the urban –rural split in provision.

- In the more populated areas the issues expressed were concerned with the quality, anti social behaviour and design of provision. People wanted to see more planted areas and less bland grassed areas provided as open space. Priorities for improvement include surfaced paths, better lighting, more litter bins and more diverse planting leading to greater bio-diversity.
- In the rural settlements and communities accessibility is a key issue and this is often exacerbated further through relatively poor public transport services.
- There is a need to continue the improvement to fixed play provision and facilities for teenagers across the District.
- For the sports pitch provision there is a need to focus on improving the general stock of pitches, especially the synthetic artificial pitches and that the main towns and large local centres need to focus on providing the key sports facilities with an appropriate network of more localised provision being made to serve the rural village communities.
- Priorities should include improving the quality of open space, sport and recreation facilities throughout the County.
- There is a need to engage schools, especially the middle and higher schools in wider community usage of their facilities. This may prove extremely useful in the more rural areas where the stock of open space and sports facilities are limited.
- The popularity of open space such as parks, amenity greenspace, natural and semi natural sites is highlighted in all the assessments.
- There are concerns at the local level in relation to the quality of provision and issues such as dog fouling, anti social behaviour and off road motor bikes are mentioned through the studies.

Key Stakeholders

- 4.11 Consultation has been undertaken with internal consultees at the Council, regional agencies and other relevant individuals. The consultees are all people who in some way or another have an influence or involvement in the provision management, maintenance or public use of open space, sport or recreational facilities across the County. Key perceptions and issues derived from respondents are summarised below.

Key Issues

- A full PPG17 audit and assessment is required to review the existing Supplementary Planning Document (SPD) for open space and improve the evidence base behind requiring the collection of developer contributions / Section 106 (S106) agreements.
- There is a real lack of management information (detail and consistency) in relation to open space due to the abolition of the former District Councils.
- There is a need to enforce S106 contributions to assist facility improvements; however these are being relaxed to encourage development in the current economic downturn.
- There is a desire to simplify the existing management arrangements for indoor facilities, where possible and to reduce the number of operators of facilities inherited from the former district authorities.
- The need to demonstrate value for money in relation to the operation of leisure facilities and sports and leisure development services.
- The diverse nature of the current service delivery between operators of indoor provision across the county and the differing pricing structures, membership systems etc in place.
- The Council is considering a range of options in relation to the leisure management of indoor facilities across the County.
- The requirement to achieve and demonstrate best value in relation to the procurement of sports facilities and where possible to identify and achieve efficiencies.
- The need to have one organisation delivering the County Wide Sport Development function, both strategically and operationally.
- The need to ensure that whatever arrangements are implemented moving forward all financial and legal implications for NCC have been considered.
- There is real concern regarding the future of indoor facilities and the need for rationalisation.
- Annual budget cuts are impacting on the ability to deliver across all departments.
- Changing facilities at Council owned playing pitch sites are in a very poor condition.
- Council facilities suffer from lack of investment; the Council tends to offer small community recreation facilities and locations are not always appropriate.
- There is scope to improve community access at school sites across the County.

- There is no centrally held open space data set instead individual sections within the Council have control of their specific element and as such data sets are at various stages with some being regularly updated whilst others are not. The data sets are being operated on different systems and may or may not be compatible with each other.
- There is a lack of control of handover from developers and the longer term suitability and sustainability of sites suffers.
- There are a number of agencies involved in local projects to improve the quality, biodiversity value of greenspace but it is not well co-ordinated and there are individual agendas.
- There needs to be wider consideration of the landscape and historic environment and the impact development may have.
- There is a need for greater connectivity between sites, and the River Corridors may prove a key asset to resolving this.

Priorities

- Development of a common vision to which the Council and all of its partners work towards.
- Regeneration should be high on the agenda, especially if this benefits the overall community.
- There is a real need for a coordinated approach to management, development and delivery of parks and open space in the County.
- There is a need for a 'greenspace champion' and working group to encourage inter-departmental working, continue the work of the greenspace strategy and implement PPG17 findings.
- There is a need to obtain Section 106 contributions wherever possible to ensure the delivery of the quality of provision required by the local community.
- Priorities should include improving the quality of open space, sport and recreation facilities throughout the County.
- Links to education and improved use of indoor and outdoor facilities as part of the Building Schools for the Future (BSF) programme. (During the development of this study, the BSF Programme was cancelled by the coalition Government).

Parish / Town Councils

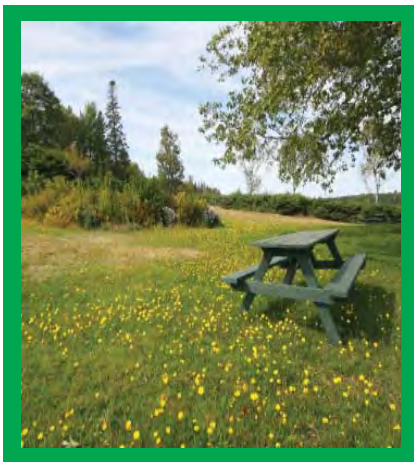

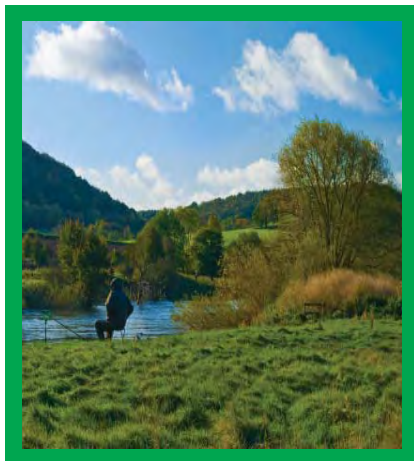

- 4.12 Parish and Town Councils in the County were consulted to discuss the current provision and quality of open space and local issues in the parish. 54 of 148 parish/town councils responded to the survey, a 36% response rate. 14 of the 54 parish/town councils reported they did not own or manage any open space. The remaining 40 councils reported to own or manage between 1 and 6 sites, on average 3 sites per council.
- 4.13 Parish and town councils were asked to rate the quality of their facilities. Of the 57 sites rated, 14 sites were rated as excellent (24%), 21 sites rated as very good (37%), 11 sites rates as good (19%), 9 sites rated as average (16%), 1 site rated as poor (2%) and 1 site rated as very poor (2%).

- 4.14 In recent years parish councils have sourced external funding with successful bids to improve open space from Playbuilder, UK Coal and the former District authorities. Despite these successes, common issues cited by parish and town councils include the lack of both capital and revenue funding to develop and maintain open space facilities. A number of parish councils referenced the importance of volunteers within the community to fundraise, run events and encourage ownership of local open space.

Summary

- 4.15 Based on the consultation feedback summarised above it is clear there are a number of key and recurring themes in terms of open space provision in the County. These primarily relate to accessibility (although people think there is generally sufficient open space), connectivity, and quality in terms of provision, alongside an expressed need for more provision in the rural areas for children and young people. In addition, there is a need to address issues such as dog fouling, site information and management information to ensure provision is maintained and improved in the future, for the benefit of local communities.

Section 5 - Audit Findings

5 Audit Findings

The Open Space Resource in Northumberland

- 5.1 This section looks at and considers the existing provision of open space, sport and recreational provision across the County. In doing so it is important to identify that PPG 17 is primarily concerned with classifying open space by its primary purpose or function. However many open spaces serve more than one function in the wider green infrastructure network that exists within the County.
- 5.2 Green Infrastructure is concerned with far more than the quantity, quality and accessibility of provision or the standards required as part of this PPG17 assessment. It is concerned with the multifunctional network that exists within the landscape and historic environment. It includes natural features such as the open moors of the North Pennines, Cheviots to the Coastal Plain and River Valleys. It also includes designated sites such as the Northumberland National Park, Kielder Water and Forest Park, Northumberland Coast and much more. It includes the County's Areas of Outstanding Natural Beauty, World Heritage sites, Registered Parks and Gardens (mainly being the large historic country estates) and National Nature Reserves. It is concerned with multi-functionality, biodiversity and accessibility in light of proposed growth and is considered in more detail in a separate Green Infrastructure (GI) Strategy developed in part on the evidence provided by this PPG17 assessment.

Quantity

- 5.3 Analysis of the urban and rural open space provided in and around local settlements, villages and towns shows that there is an **overall provision of 4180.19 ha of accessible greenspace in the County provided through 1281 sites, and an overall provision of 13.44 ha per 1000 population (note this does not include beaches, historic sites, open access land or the coast)**. Provision has been verified by Council Officers and via site visits in order to provide a comprehensive and robust assessment.
- 5.4 On an area basis the **provision varies significantly with the north area having the greatest provision at 18.3 ha per 1000 compared to the south east with 13.7 ha per 1000 and the west area of the county having significantly lower provision at 7.1 ha per 1000 population.**
- 5.5 The assessment provides key detail on the rich variety of open or greenspace provision available to the public such as the grassed amenity spaces provided for recreation in densely populated urban areas, allotments, play areas, school playing fields, sports pitches, natural and semi-natural greenspace and parks.
- 5.6 The analysis also identifies that the County as a whole is well provided for in terms of Local Nature Reserves when compared to the Natural England recommended standard of 1ha of provision per 1000 population. The county currently has 40 sites occupying 640 ha that are designated Local Nature Reserves these provide 2 ha per 1000 population across the county.
- 5.7 In terms of green space provision by type the PPG17 assessment has identified the following greenspace that serves the urban and rural settlements. Figures given are for the total number of sites, the total area these sites occupy in hectares and the provision in hectares per 1000 people who live in the County.

Northumberland County Council
Open Space, Sport & Recreational Facilities – PPG17 Assessment

Figure 5.1 : Quantity of Open Space in Northumberland by Typology

Typology	Number of Sites	Total Area (ha)	Provision per 1,000 population (ha) Based on a County population of 310,970
Parks and Gardens	63	666.08	2.14
Natural and Semi Natural Greenspace	261	2346.42	7.55
Amenity Greenspace	385	339.24	1.09
Outdoor Sports Facilities	202	526.80	1.69
Provision for Children and Young People (Stand Alone Provision)	116	16.16	0.50*
Provision for Children and Young People (Within other typologies)	108	10.74	
Allotments	126	160.07	0.51
Churchyards and Cemeteries	128	125.42	0.40
County Total	1281	4180.19	13.44

* Combined provision including sites within other typologies – calculated using the children's population aged 0-15 yrs

- 5.8 Figure 5.1 shows the accessible greenspace provided in and around settlements across the county. It is important to note that the above figure does not reflect the overall provision of green infrastructure in the county as it does not take into account open access land, beaches, coast, historic sites, public rights of way or larger designated sites such as the County's national nature reserves, Kielder Water or Kielder Forest. If such sites were included in calculations to identify future provision as part of new residential development they would significantly skew calculation figures.
- 5.9 In calculating the provision of provision for children and young people it is important to note that many fixed play areas are contained within the footprint of other types of provision such as a park or an amenity space. As such there is an element of double counting to reflect the investment in such fixed play provision per 1000 population of children and young people aged 0-15 years. If play sites within other types are excluded from the quantity then the figures would not be a true reflection of the actual provision.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 5.10 Quantifying the accessible greenspace by typology shows that the county has the following provision per 1000 population (Figure 5.2).

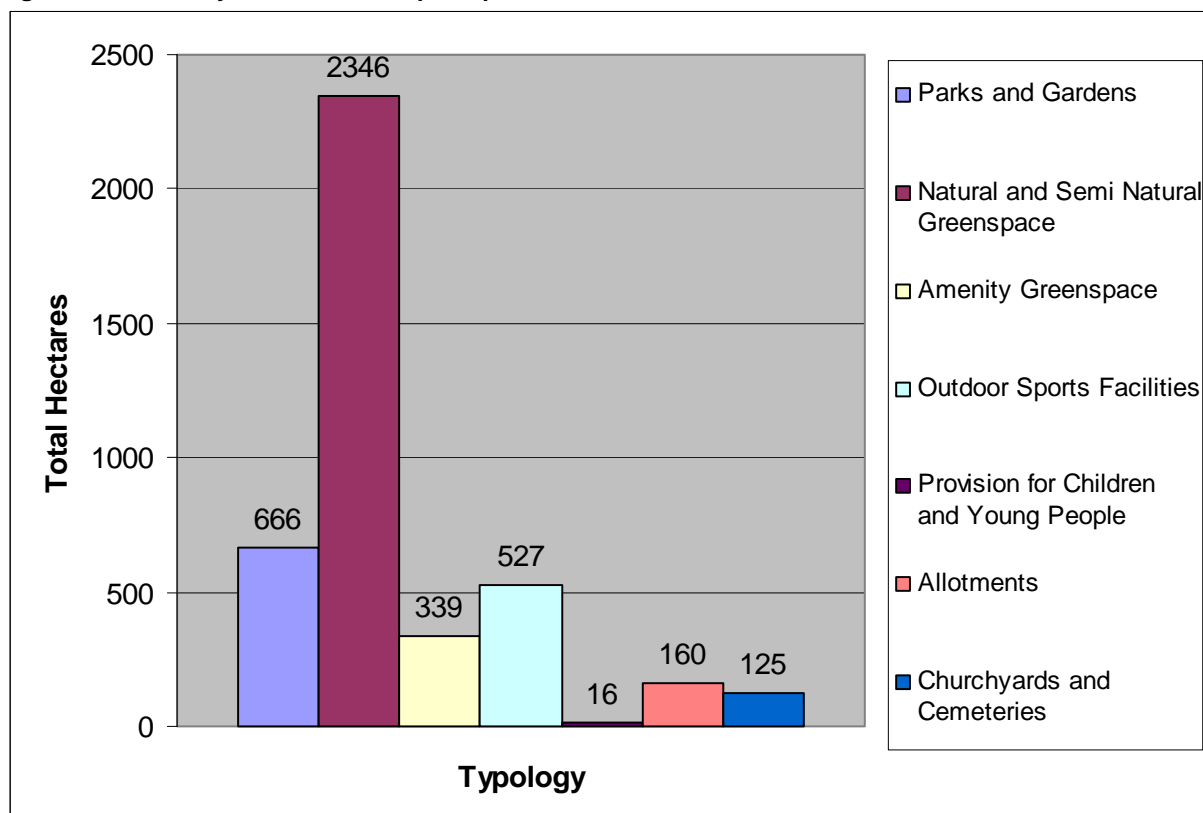

Figure 5.2 : Quantity of Open Space in Northumberland by Area

Typology	North		South East		West		TOTAL	
	No.	Ha	No.	Ha	No.	Ha	No.	Ha
Parks and Gardens	24	208.23	25	380.05	14	77.8	63	666.08
Natural and Semi-Natural Greenspace	146	1009.84	71	1105.52	44	231.06	261	2346.42
Amenity Greenspace	161	107.58	186	206.11	38	25.55	385	339.24
Outdoor Sports Facilities	87	191.68	61	178.89	54	156.23	202	526.80
Provision for Children and Young People (Stand Alone Provision)	44	5.46	27	4.15	45	6.55	116	16.16
Provision for Children and Young People (Within other typologies)	37	2.81	47	5.04	24	2.89	108*	10.74
Allotment	48	36.90	59	99.63	19	23.54	126	160.07
Churchyard and Cemeteries	85	60.03	21	44.56	22	20.83	128	125.42
Total	595	1619.72	450	2018.91	236	541.56	1281	4180.19

*108 PLAY SITES ARE WITHIN THE OVERALL TOTAL AS THEY ARE CONTAINED WITHIN SITES ALREADY ACCOUNTED FOR

- 5.11 From Figure 5.2 the west area of Northumberland has significantly less provision of open space than the other areas in the County. The south east area has the greatest amount of provision at 2018.91 ha or 48% of the total provision. This section sets out the relevant audit findings and key issues for each of the typologies in terms of the quantity, quality and accessibility of provision.
- 5.12 All identified sites have been plotted using GIS (Geographical Information System) and the total size of these sites (hectares) has been determined via this method, to provide an indication of the level of provision across the County and within the 3 Neighbourhood Management Areas (NMA). Quantity, quality and accessibility analysis has been undertaken on a County and area basis. From this information standards have been set for each of the neighbourhood areas and for the County as a whole.

Figure 5.3 : Quantity of Accessible Open Space in Northumberland

- 5.13 From Figure 5.3 the spatial distribution of open space by typology varies significantly in both the number of sites and the amount of land provided. This in turn leads to a variance per 1,000 population according to the type of provision. The largest amount of provision is natural and semi-natural greenspace which occupies 2346.42 ha or 56% of the total open space provision across the County and a provision of 7.55 ha per 1,000 population. The least provision in terms of land occupied is that of the play provision for children and young people occupying 26.90 ha or 0.50 ha per 1,000 population of children and young people (aged 0-15 years).
- 5.14 The 126 allotments sites equate to 160.07 ha across the County (0.51 ha/1,000 population) and the total area for the 128 identified cemeteries and churchyards equates to 125.42 ha (0.40 ha per 1,000 population). The 202 outdoor sports facility sites equate to 526.80 ha (1.69 ha/1,000 population). 63 park and garden sites occupy 666.08 ha (2.14 ha per 1,000 population).
- 5.15 The audit identified 385 amenity greenspace sites comprising 339.24 ha; this equates to 8% of the total open space provision across the County. These sites are generally found in residential areas and tend to be small but important resources at the local level as they are often the spaces nearest to where people live.
- 5.16 It is important to recognise that provision for children and young people involves an element of double counting due to the provision of fixed play, skate parks and ball courts being located within other typologies such as parks. It is also important to note that outdoor sports facilities such as grass pitches, tennis courts and bowling greens are also provided within other typologies such as parks and as such the figures quoted for outdoor sport reflect the provision of sites dedicated as stand alone sports facilities.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 5.17 The provision identified by type in each of the areas should also be seen as the minimum from which future provision should be based. This will ensure that the character, openness and nature of the neighbourhood areas and the County in general is maintained and protected.
- 5.18 The County wide provision per 1,000 population by typology should be utilised to ensure that future provision of open space overall and by particular typology does not fall below this threshold. The distribution and implications of current provision are discussed in more detail by typology later in this report.

Quality

- 5.19 The quality audit provides an indicative rating of quality out of 100%. It is important to note that the quality score represents a “snapshot” in time and records the quality of the site at the time of the visit.

Quality Line

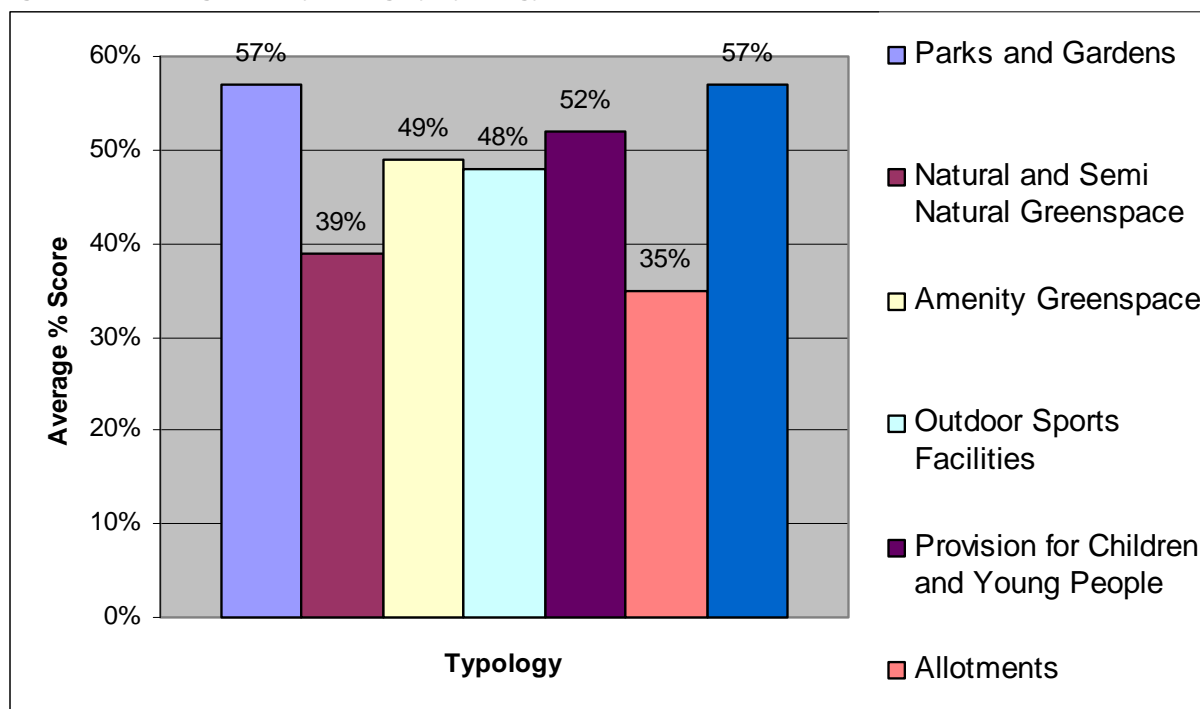

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

- 5.20 Figure 5.4 identifies the significant variance in the range of quality both within individual typologies and across the different classifications of open space with an overall County wide rating of 48% or a rating of ‘average’ in accordance with the quality line above.

Figure 5.4 : Summary of Quality Across All Accessible Open Space in Northumberland

Typology	Number of Sites	Quality Range (%)	Average Quality Score (%)
Parks and Gardens	63	26 - 83%	57%
Natural and Semi Natural Greenspace	261	5 - 87%	39%
Amenity Greenspace	385	11 - 86%	49%
Outdoor Sports Facilities	202	6 - 98%	48%
Provision for Children and Young People	116	16 - 91%	52%
Allotments	126	8 - 90%	35%
Churchyards and Cemeteries	128	19 - 90%	57%
County Total	1281	5 - 98%	48%

Figure 5.5 : Average Quality Rating by Typology

- 5.21 Figure 5.5 demonstrates the average quality scores for each typology. The key factor that affects the quality scores is the quality of individual infrastructure elements or the lack of basic infrastructure such as signage, benches and bins.
- 5.22 Quality open space is usually fit for purpose, it is welcoming, well maintained and safe (key elements of the Green Flag Award site assessment), one of the strengths of good quality open space provision is the nature in which sites can provide multi-functional activity.
- 5.23 The quality of open space is dependent upon the ownership and good stewardship. The decline in quality and function of open space is well documented and the reasons for the decline are not a key element of this study. What is considered is what people think and need at local level.

Parks and Gardens

“Accessible, high quality opportunities for informal recreation and community events.”

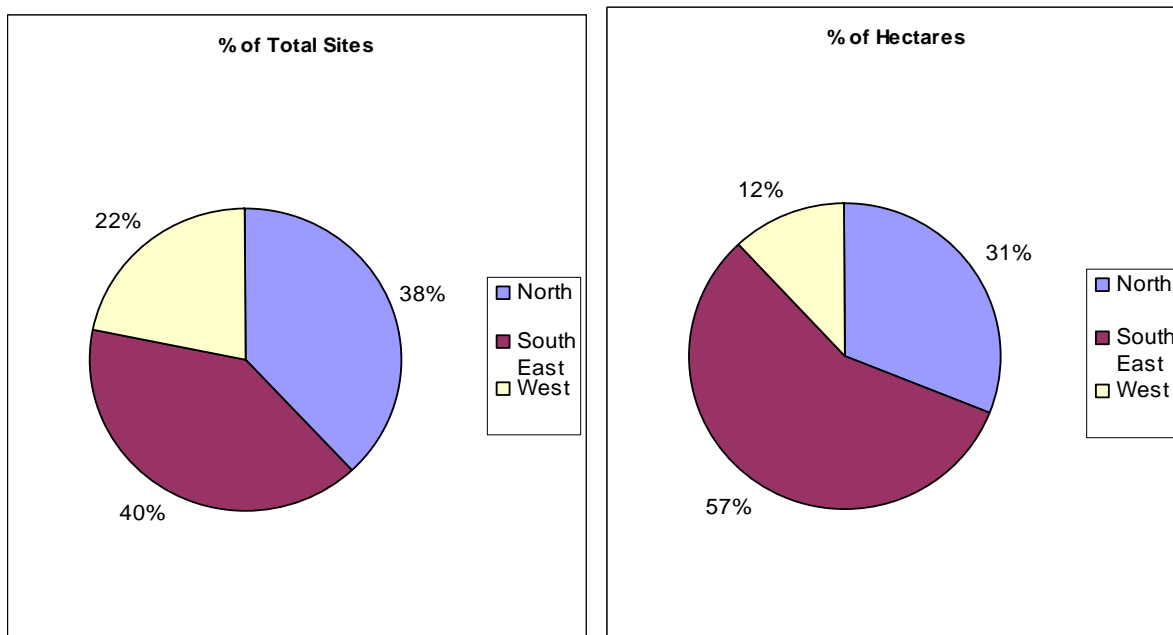

Quantity

- 5.24 Northumberland has 63 parks and garden sites covering 666.08 hectares, and therefore an overall provision of 2.14 ha per 1,000 population. Northumberland's parks and gardens provide a wide range of facilities and are capable of providing space for a large number of formal and informal activities. Some sites include facilities for sport such as grass pitches, tennis or bowls; others provide fixed play equipment or multi-use games areas for children and young people. The distribution of parks and gardens is outlined in Figure 5.6.

Figure 5.6 : Parks and Gardens Provision Across the County

Area	Population	No. of Sites	Total Ha	Ha Per 1,000	Average Site Size (ha)	%of Total Sites	% of Total Hectares
North	89,017	24	208.23	2.34	8.68	38%	31%
South East	147,500	25	380.05	2.58	15.20	40%	57%
West	74,453	14	77.80	1.04	5.56	22%	12%
Total	310,970	63	666.08	2.14	10.57	100%	100%

Figures 5.7 : Parks and Gardens Provision across the County

5.25 Figure 5.6 and Figure 5.7 illustrate the spatial distribution of parks and gardens by area; the data can be summarised as follows:

- **There is a similar amount of provision between the North (24 sites) and the South East (25 sites) both in terms of number of sites and provision per 1,000 population. Both areas have a provision per 1000 that is above the County wide proposed standard of 2.14 ha per 1,000 population.**
- **The North has the second largest proportion of parks and gardens (24 sites in total) in Northumberland. These sites occupy 38% of the total area available as parks and gardens.**
- **The South East is very similar to the North and has the largest proportion of parks and gardens with a total of 25 sites. This area has 40% of the total amount of parks and garden space in Northumberland.**
- **The West has the least provision of parks and gardens with only 14 sites equating to 1.04 ha per 1,000 population. Only 12% of the total number of hectares allocated to parks and gardens is in this area. This is well below the proposed County wide standard of 2.14 ha per 1,000 population.**
- **It is important to stress that although the West area appears to have below the County wide standard of provision, the National Park covers a large part of the West area, and therefore there is provision of, and access to, a park within the area. The issue is that the National Park is not included in the supply and demand analysis as it would skew the calculations for standards of provision, as clearly a National Park cannot be provided in every area. The National Park, whilst being excluded from the calculations for standards, needs to be taken into account at local level, as it does provide for local people, without them having to access parks outside Northumberland. Given the geography of this part of Northumberland and adjoining local authority areas, there are few easily accessible parks and gardens, and so the role of the National Park is important.**

5.26 The assessment of park and garden provision has shown a significant variance in the level of provision across the three neighbourhood areas and an even greater variance if provision is considered at ward level.

5.27 In terms of the total land provided as parks and gardens 70% is provided through the country parks (Bedlington, Plessey Woods, QE2 Silver Jubilee, Wansbeck Riverside, Tyne Riverside, Tyne Green, Druridge Bay).

5.28 The assessment of provision has identified a current standard of 2.14 ha per 1000 population.

Quality

5.29 Site audits were undertaken to 61 of the County's parks and gardens provision, the quality audit provides an indicative rating of quality out of 100%. It is important to note that the quality score represents a "snapshot" in time and records the quality of the site at the time of the visit.

5.30 The overall quality findings from the site audits are outlined below with the average quality for parks and gardens across the County being 57% (average) when measured against the quality value line.

5.31 The quality audit has shown some variation in the quality of parks and gardens within the three areas. However, there is little variance in average quality score between the three areas in the County. The audit shows that the County's parks and gardens quality ranges from 26% (poor) to 83% (excellent). None of the facilities were rated as very poor. Only three sites were rated as poor, two of these were in the North and one in the West; therefore there are no sites in the South East which had a quality score less than 30%.

5.32 Figure 5.8 and Figure 5.9 identify the quality findings for parks and gardens provision in the County.

Figure 5.8: Quality Range of Parks and Gardens by Area

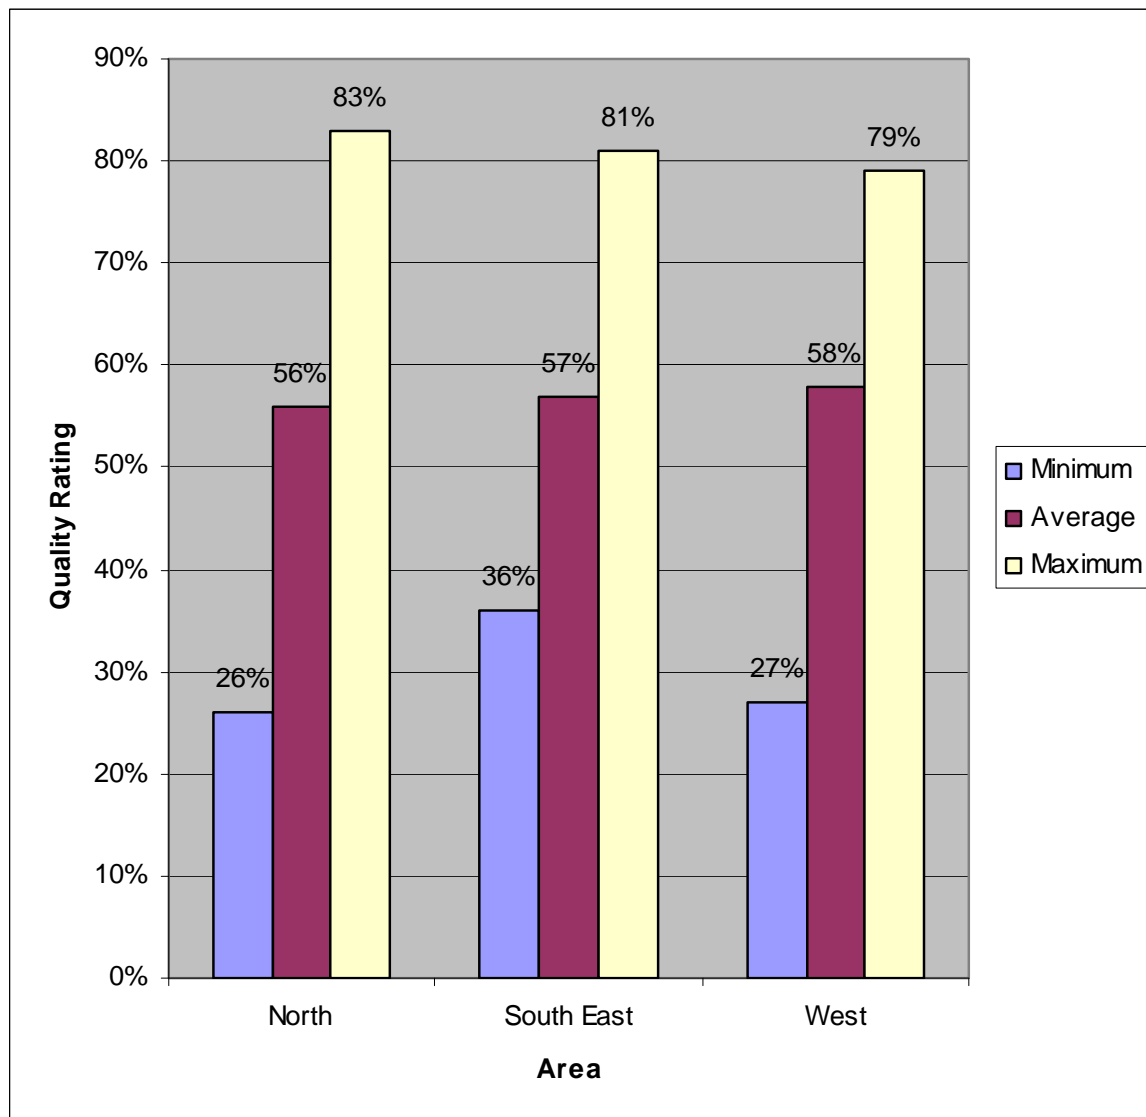

Figure 5.9: Quality of Parks and Gardens Provision

Area	Quality range	Quality Variance	Average Quality Score	Quality Rating
North	26% - 83%	57%	56%	Average
South East	36% - 81%	45%	57%	Average
West	27% - 79%	52%	58%	Average
County Wide	26% - 83%	57%	57%	Average

- 5.33 Figure 5.9 shows that there is a variation in quality score in the three areas and the strongest variation is in the North where there is a variance of 57% in the quality of parks and gardens. The least variance is in the South East (45%) with the lowest quality score being 36% and the highest being 81%.

Above Images from site audit to 2076 - Flagstaff Park

Above Images from site audit to Site 5071 - Hexham Parks

- 5.34 Launched in August 2009 by Natural England, the Country Parks Accreditation Scheme aims to identify and recognise those sites that actually do deliver the core facilities and services expected of Country Parks. At present one of the County's country parks (Tyneside Riverside Country Park) has been accredited as part of this Scheme.
- 5.35 Factors that have influenced the quality rating for parks are related to the quality of the infrastructure within the park itself. Basic elements such as the lack of signage, benches and litter bins combined with the condition of footpaths, fences, access all have an affect on the quality score.

Accessibility

- 5.36 Accessibility has been assessed using a variety of techniques including mapping exercises and consultation. The consultation key findings show that:
- 14% of respondents to the public questionnaire reported that they visit parks and gardens on a daily basis, 31% on a weekly basis, 28% monthly, 17% within the last 6 months to a year, 5% every year and 4% never use parks and gardens.

- 55% of those who visit parks and gardens in Northumberland walk, 43% drive, 1% cycle and 1% use public transport
- 26% of respondents reported it takes less than 5 minutes to travel to their nearest park or garden, 30% report 6-10 minutes, 22% report 11-20 minutes and 22% over 20 minutes
- Local people have identified that they travel for an average of 12.48 minutes to gain access to parks and gardens in Northumberland. This equates to 0.62 miles or 998 metres (for the purpose of analysis this has been rounded up to 1000 metres).

5.37 It is important to recognise that people will undoubtedly make use of the spaces nearest to where they live and that may not be a site classified as a park or garden.

5.38 Analysis using the above threshold of 1000m shows that 64% of all households in the County are within the accessibility threshold for parks and gardens. From the analysis the South East has 81% of all households within a 1000m of a site classed as a park or garden. The North and West Areas have 49% of all households within the defined catchment.

Figure 5.10 : Accessibility Analysis for Parks & Gardens

Area	Number of households in Area	No. of households within 1,000m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
North	45,396	22,361	49%	51%
South East	69,152	55,859	81%	19%
West	33,464	16,340	49%	51%
Total	148,012	94,560	64%	36%

5.39 It is important to note that people will make use of their nearest greenspace on a frequent basis as this is their local provision; it may be that people only have access to a local woodland and that may serve the same purpose for them as a park i.e. to participate in informal recreation and to improve health.

Standards

Standards for Parks & Gardens

Quantity

To ensure provision does not fall below the current level of 2.14 ha per 1,000 population

Quality

To achieve a minimum standard of 57% and to deliver all parks and gardens to a standard of good quality (61%). To achieve and maintain Green Flag status in 3 parks across the County (one in each neighbourhood area) and for all Country Parks to achieve Country Park Accreditation and a quality rating of 76% (Excellent)

Accessibility

To provide access to good quality parks and gardens and for all households in the County to be within 1,000m or 12 minutes travel time

Natural and Semi-Natural Greenspace

“Natural and semi-natural areas providing access to wildlife, environmental education and awareness, biodiversity and nature conservation. The typology includes woodlands, scrubland, wetland and nature conservation areas.”

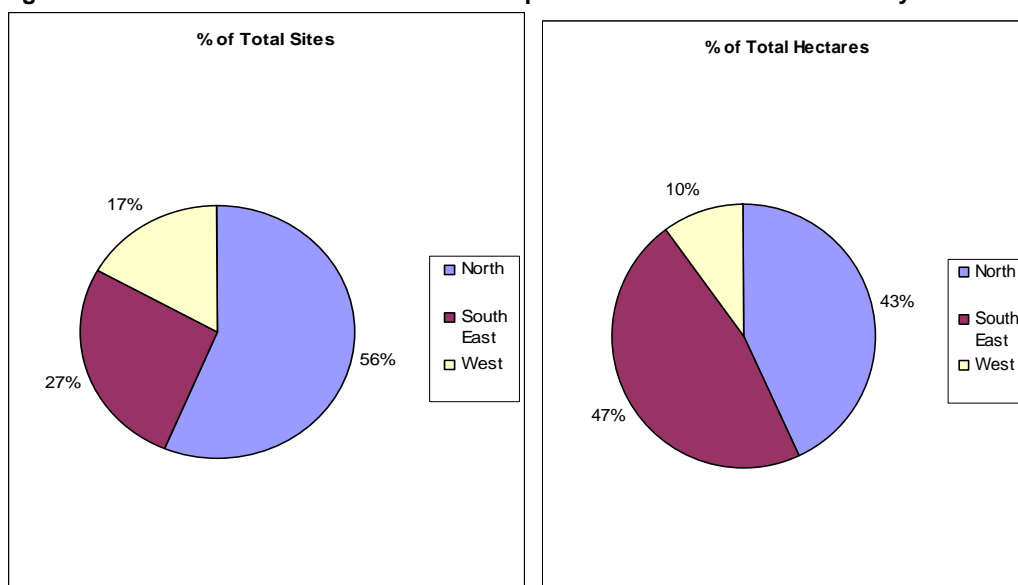

Quantity

- 5.40 Natural and semi-natural greenspace provides a wide variety of opportunities for people to relax in a more natural environment whilst also providing a natural habitat for wildlife. Sites include woodland, commons, natural areas and sites designated as local nature reserves.
- 5.41 Northumberland County has 261 open spaces defined as natural and semi-natural, totalling 2346.42 ha and this equates to 7.55 ha per 1,000 population. Figure 5.11 provides details of all the accessible open spaces designated as natural and semi-natural greenspace.

Figure 5.11 : Natural and Semi-Natural Greenspace Provision across the County

Area	Population	No. of Sites	Total Ha	Ha Per 1,000	Average Site Size (ha)	%of Total Sites	% of Total Hectares
North	89,017	146	1009.84	11.34	6.92	56%	43%
South East	147,500	71	1105.52	7.50	15.57	27%	47%
West	74,453	44	231.06	3.10	5.25	17%	10%
Total	310970	261	2346.42	7.55	8.99	100%	100%

Figure 5.12 : Natural and Semi-Natural Greenspace Provision across the County

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

5.42 From Figures 5.11 and 5.12 the key findings for each of the identified sub areas can be summarised as follows:

- **North** has the greatest provision with 146 sites identified as natural and semi-natural greenspace which equates to 1009.84 hectares with a provision level of 11.34 ha per 1,000 population. This is equivalent to 56% of the total number of natural and semi-natural greenspace sites and 43% of the total hectares in Northumberland. The provision of natural and semi-natural greenspace in the North is well above the County wide provision of 7.55 ha/1,000 population.
- **South East** has 71 sites of 1105.52 ha which equates to 7.50 ha per 1,000. This makes up 27% of the total number of natural and semi-natural greenspace sites in the County and 47% of the total number of hectares. The provision of natural and semi-natural greenspace in the South East is similar to the County wide provision of 7.55 ha/1,000 population.
- **West** has the least amount of provision with only 44 sites of 231.06 ha which equates to 3.10 ha per 1,000. This equates to 17% of the total number of sites and 10% of the total number of hectares for natural and semi-natural greenspace sites in the County. The provision of natural and semi-natural greenspace in the West is well below the County wide provision of 7.55 ha/1,000 population.
- **It is important to stress that although the West area appears to have below the County wide standard of provision, the National Park covers a large part of the West area, and therefore there is provision of, and access to natural and semi-natural greenspace. The issue is that the National Park is not included in the supply and demand analysis as it would skew the calculations for standards of provision, as clearly a National Park cannot be provided in every area. Given its existence, however, its role in providing access to semi natural and natural green space is important.**

Quality

5.43 Site audits were undertaken to 186 of the 261 natural and semi-natural greenspace provision, the quality audit provides an indicative quality rating out of 100%. It is important to note that the quality score represents a “snapshot” in time and records the quality of the site at the time of the visit.

5.44 The overall quality findings from the site audits are outlined below with an average quality for natural and semi-natural greenspace across the County being 39% or “below average” when measured against the quality value line.

Quality Line

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

5.45 The quality audit has demonstrated a significant variance in the quality of sites within the provision of natural and semi-natural greenspace sites. The audits show that quality in this typology ranges from 5% (very poor) to 87% (excellent).

5.46 The audit also noted that the quality of sites varied within and between the three areas. Figure 5.13 illustrates the variance between the areas:

Figure 5.13 : Quality Range of Natural and Semi-Natural Greenspace by Area

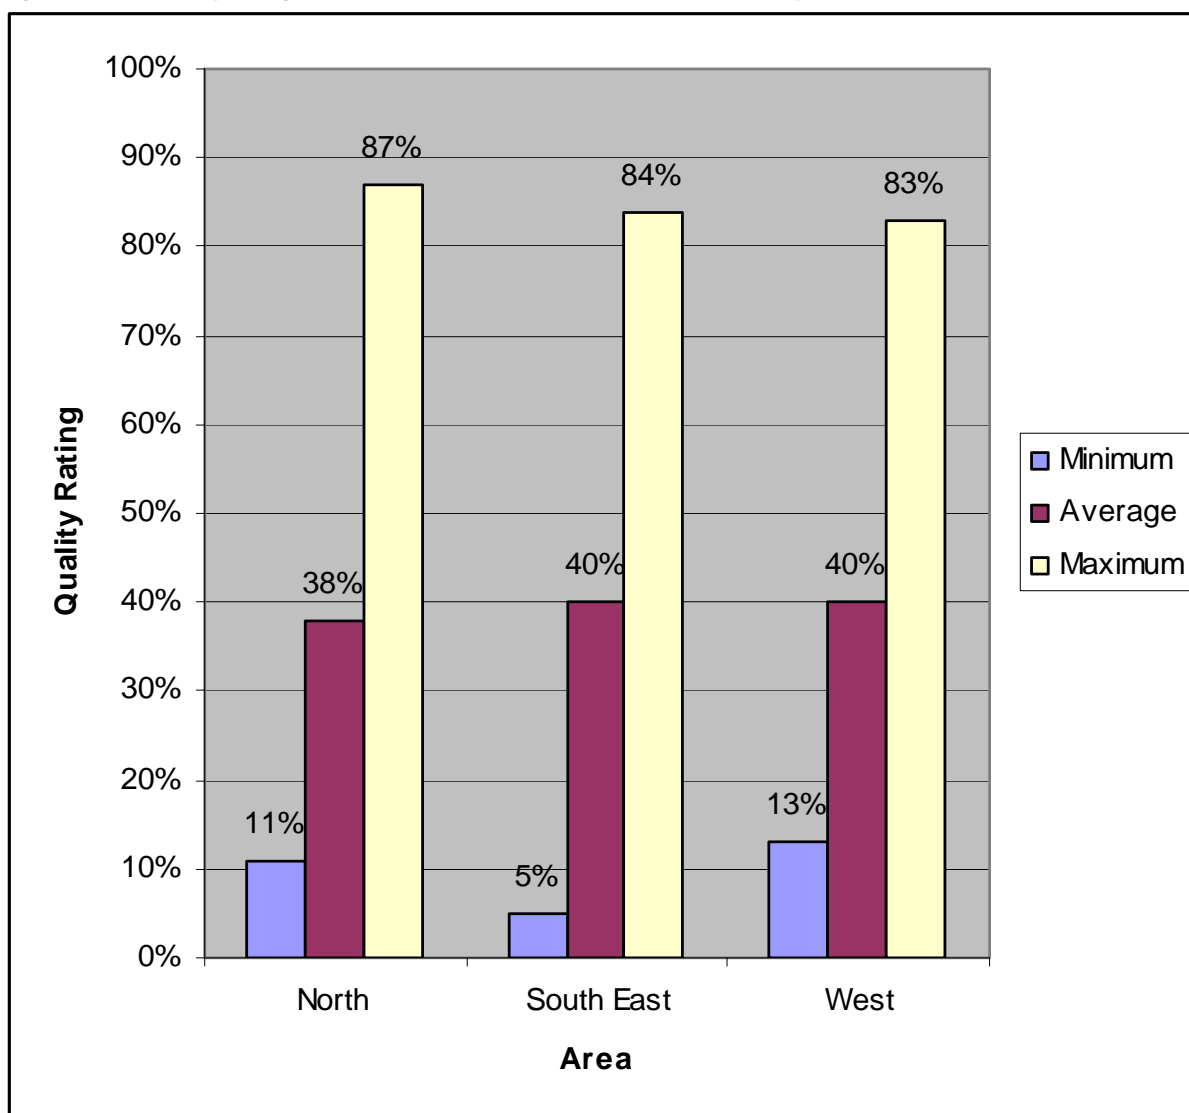

Figure 5.14 : Natural and Semi-Natural Greenspace Quality Rating

Area	Quality Range	Quality Variance	Average Quality Score	Quality Rating
North	11% - 87%	76%	38%	Below Average
South East	5% - 84%	79%	40%	Below Average
West	13% - 83%	70%	40%	Below Average
County Wide	5% - 87%	82%	39%	Below Average

- 5.47 Figure 5.14 shows a significant variance in the overall quality across the three areas however, this is more pronounced in the South East area where the variance in quality is 79%. All three areas are very similar in terms of average quality score and maximum quality score. The minimum quality scores are similar between the North and the West, but the South East clearly has the lowest quality score of the three areas (5%).

Above Images from site audit to Site 2006 Restoration Wood

Above Images from site audit to Site 1431 Hauxley Nature Reserve

Future Improvements

- 5.48 One of the great strengths of good quality natural and semi-natural greenspace provision is that it provides an amenity from which people can engage with natural environments and observe nature in a way that is, by necessity, less structured or managed. However, these sites still need to be fit for purpose, welcoming, well maintained and safe (key elements of the Green Flag Award Site assessment).
- 5.49 The audit suggests that natural and semi-natural greenspaces in Northumberland are not currently meeting all of the necessary criteria in terms of quality and as such improvements will be required across all the types of provision and across the different areas.
- 5.50 Figure 5.15 shows the number of sites that fall within the varying ranges for quality.

Figure 5.15 : Number of Natural and Semi-Natural Greenspace Sites by Quality Range

Natural and Semi-Natural	Very Poor	Poor	Below Average	Average	Good	Excellent	Total
	0-15%	16-30%	31-45%	46-60%	61-75%	76%+	
North	3	40	41	22	10	2	118
South East	6	4	16	6	2	3	37
West	1	7	13	7	2	1	31
Total	10	51	70	35	14	6	186

5.51 Only 20 sites in Northumberland (11%) out of 186 sites audited as natural and semi-natural greenspace rated an overall quality score that equalled “good” or “excellent”. 61 sites (33%) were rated as either “poor” or “very poor”, and 105 sites (56%) were rated as “below average” or “average”.

5.52 In terms of acting on the assessment findings it is evident that the quality standard needs to be raised across all areas. In order to set targets for improvement, it is suggested that the quality thresholds are set as follows:

- **All sites to achieve a minimum standard of 48% or above (Countywide open space average) and to deliver all Local Nature Reserves and Sites of Nature Conservation Interest achieving a rating of 61% or above as a quality score**

Accessibility

5.53 Accessibility has been assessed using a variety of techniques including mapping exercises and consultation. The consultation key findings show that:

- **11% of respondents to the public questionnaire reported that they visit natural and semi-natural greenspace on a daily basis, 22% on a weekly basis, 26% monthly, 22% every 6 months to a year and 19% every year**
- **35% of those who visit natural and semi-natural greenspace in Northumberland walk, 61% drive, 1% cycle and 3% use public transport**
- **17% of respondents who visit natural and semi-natural greenspace reported it takes less than 5 minutes to travel to their nearest site, 24% report 6-10 minutes, 27% report 11-20 minutes and 31% over 20 minutes**
- **Local people have identified that they travel for an average of 15.05 minutes to gain access to natural and semi-natural greenspace in Northumberland. This equates to 0.75 miles or 1207 metres.**

Figure 5.16 : Accessibility Analysis for Natural and Semi-Natural Greenspace

Area	Number of households in Area	No. of households within 1,200m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
North	45,396	34,297	76%	24%
South East	69,152	66,947	97%	3%
West	33,464	21,006	63%	37%
Total	148,012	122,250	83%	17%

- 5.54 The GIS analysis has identified that 83% or 122,250 residential households in the County are within the combined access catchments set for natural and semi-natural greenspace. Importantly 17% of households are not currently within the catchment areas.
- 5.55 It is important to recognise that people will undoubtedly make use of the space nearest to where they live and that may not be a site classified as natural and semi-natural greenspace.

Standards

Standards for Natural and Semi-Natural Greenspace

Quantity

To ensure provision does not fall below the current level of 7.55 ha per 1,000 population

Quality

To achieve a minimum standard of 48% or above (current Countywide open space average) and to deliver all Local Nature Reserves to a minimum quality rating of 61% (good)

Accessibility

To provide access to natural and semi-natural greenspace and for all households in the County to be within:

- 1200m of a Natural & Semi-natural Greenspace or 15 minutes travel time

Amenity Greenspace

“Opportunities for informal activities close to home or work or enhancement of the appearance of residential or other areas.”

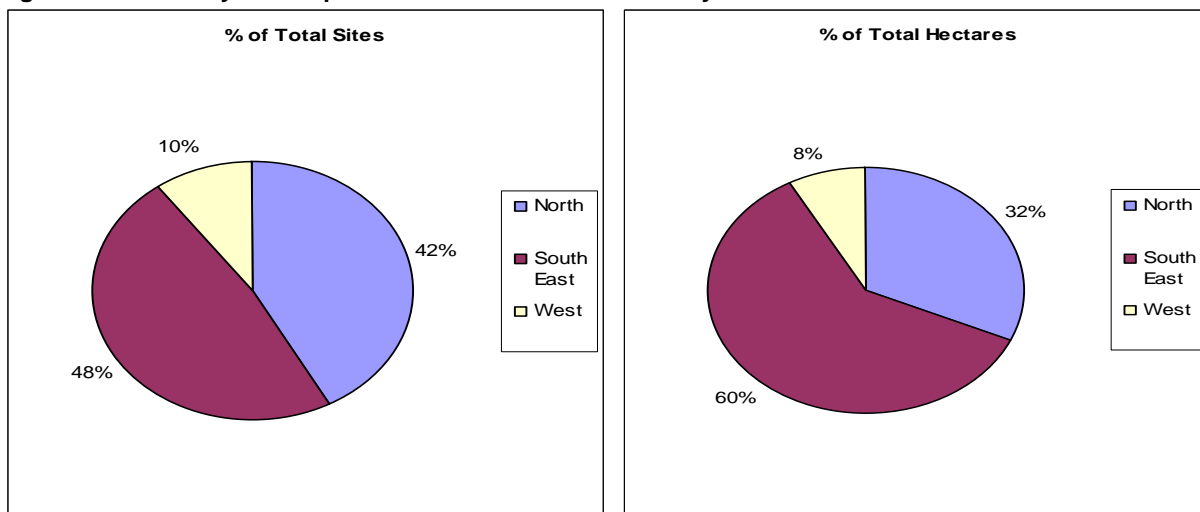

Quantity

- 5.56 The County has 385 sites identified as amenity greenspace, totalling 339.24 ha which equates to an overall provision of 1.09 ha per 1,000 population.
- 5.57 Amenity greenspace provides a number of functions, but primarily the sites take the form of less formal greenspace provided mainly in residential areas. This provision enables local people to take part in casual recreation close to home. This typology also includes civic space. A full list of sites can be found in the appendices of this report.
- 5.58 The distribution of amenity greenspace by the three areas is outlined in Figure 5.17, with a graphical presentation in Figure 5.18.

Figure 5.17 : Amenity Greenspace Provision Across the County

Area	Population	No. of Sites	Total Ha	Ha Per 1,000	Average Site Size (ha)	%of Total Sites	% of Total Hectares
North	89,017	161	107.58	1.21	0.67	42%	32%
South East	147,500	186	206.11	1.40	1.11	48%	61%
West	74,453	38	25.55	0.34	0.67	10%	8%
Total	310970	385	339.24	1.09	0.88	100%	100%

Figure 5.18: Amenity Greenspace Provision Across the County

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

5.59 From Figure 5.17 the key points relating to the spatial distribution of amenity greenspace by sub area can be summarised as follows:

- **North** has 161 sites identified as amenity greenspace which equates to 107.58 hectares with a provision level of 1.21 ha per 1,000 population. This is equivalent to 42% of the total number of amenity greenspace sites and 32% of the total hectares in Northumberland.
- **South East** has the greatest provision with 186 sites of 206.11 ha which equates to 1.40 ha per 1,000. This makes up 48% of the total number of greenspace sites and 61% of the total number of hectares.
- **West** has the least amount of provision with only 38 sites of 25.55 ha which equates to 0.34 ha per 1,000. This equates to 10% of the total number of sites and 8% of the total number of hectares for amenity greenspace in the County.
- **Although there is less provision of amenity greenspace in the West, it is also important to highlight the fact that this is the second largest area, with the lowest population of the three sub areas in Northumberland. Given the lower population, there is less demand for amenity greenspace, however there is a need to ensure there is sufficient provision to meet the current and future demand for amenity greenspace. Given the nature of amenity greenspace ie local green spaces, close to people's homes, and the geography of the area, it is not really practical to propose that communities in the West use amenity greenspace in a neighbouring local authority area. Wherever possible additional provision should be developed to provide local access, and in addition, access to the National Park should be optimised so it can provide and function as local greenspace for those people for whom it is their 'doorstep' open space.**

5.60 The average size of current provision is a valuable indicator when considering the need for future provision and setting benchmarks. Using the data collected the average size of amenity sites considered in this audit is shown to be 0.88 ha, with sites in the South East being the largest on average. Using this average size as a guide will ensure that spaces in future serve a valuable purpose as informal spaces which are big enough to cater for recreation without causing nuisance or conflict with nearby residents.

Quality

5.61 Site audits were undertaken on all of the 375 of the 385 sites which were classified as amenity greenspace. It is important to note that the quality score represents a "snapshot" in time and records the quality of the site at the time of the visit. The overall quality of findings from the site audits are outlined below.

Quality Line

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

5.62 Quality greenspace is normally fit for purpose, welcoming, well maintained and safe (key elements of the Green Flag Award Site assessment). One of the great strengths of good quality greenspace provision is the capacity of sites to provide opportunities for various activities.

5.63 Amenity greenspace sites are often the sites closest to where people live and as such need to be maintained to a minimum of a good overall standard. At present the average quality across Northumberland achieves an average overall score of 48% which falls below the required standard of "good".

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

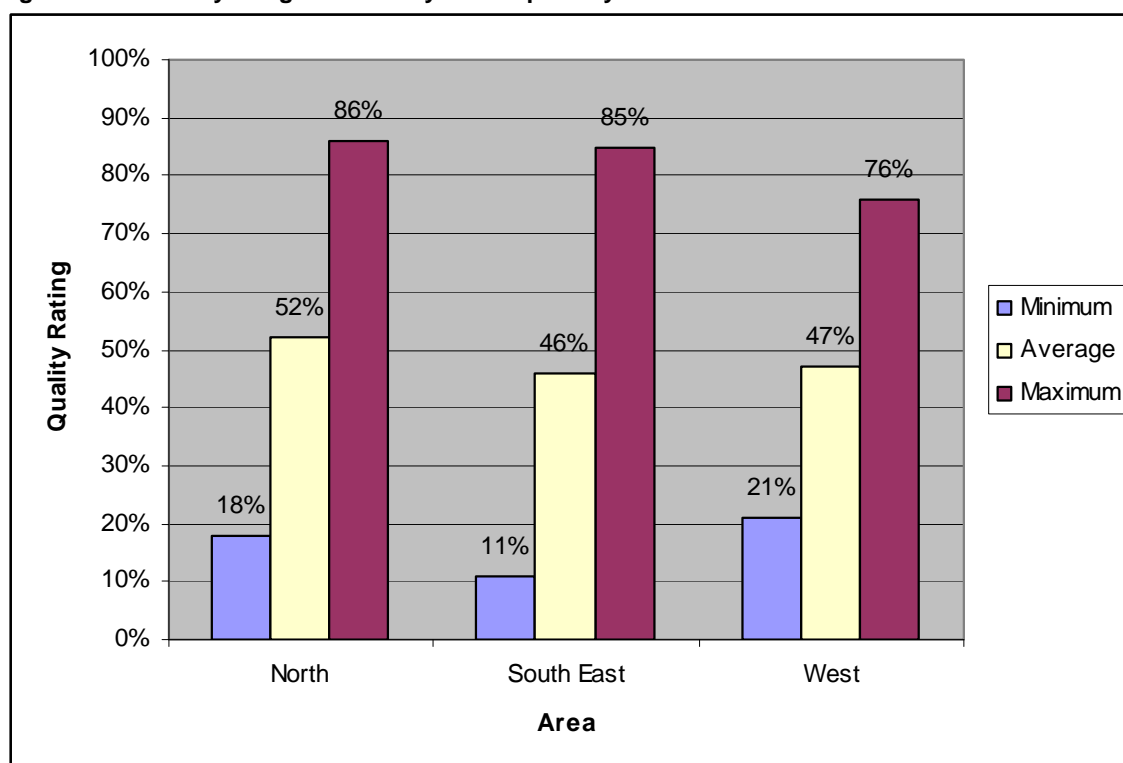

- 5.64 In total 146 sites were rated as “average” this equates to 39% of all the 375 amenity greenspace sites across the County. 150 were scored as either “very poor”, “poor”, or “below average” (40% of the sites). A total of 79 sites were scored as “good” or “excellent”, this equates to 21% of the sites.
- 5.65 Figure 5.19 demonstrates on an area basis, the quality of amenity greenspace provision across the County.

Figure 5.19 : Amenity Greenspace Quality Rating

Area	Quality Range	Quality Variance	Average Quality Score	Quality Rating
North	18% - 86%	68%	52%	Average
South East	11% - 85%	74%	46%	Average
West	21% - 76%	55%	47%	Average
County Wide	11% - 86%	75%	48%	Average

- 5.66 The figure shows that in terms of percentages and ratings, all three areas are of “average” quality.
- 5.67 The average quality scores do not range much for area to area and all three show that the majority or sites were rated as “average”. The quality audit also noted that quality varied within the three areas. Figure 5.20 identifies the variance in quality by area.

Figure 5.20 : Quality Range of Amenity Greenspace by Area

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 5.68 The figure shows that the South East has the greatest range in quality with a variance of 74% from the lowest score to the highest score and the North has the second greatest range of 68%.
- 5.69 Amenity greenspace demonstrates some variance in the overall quality across the County, but generally sites are of an “average” quality.
- 5.70 The lowest overall average quality scores were found in the South East area (46%)

Above Images from site audit to Site 1410 Land to West of Chapel Lands

Above Images from audit to Site 1045 Alnmouth Playground

- 5.71 The average rating of 48% is the minimum quality rating to which amenity greenspace should be managed and maintained to achieve. As such there are over 132 amenity greenspace sites that fall below this threshold and these need to be improved over the next two years to drive the quality up and provide local people with access to improved quality greenspace close to where they live.

Accessibility

- 5.72 Accessibility has been assessed using a variety of techniques including mapping exercises and consultation. The accessibility thresholds are outlined in Figure 5.21 and the maps in Appendix 4. The consultation key findings show that:
- **55% of respondents to the public questionnaire reported that they visit amenity greenspace. Of those that do visit, 38% do so on a daily basis, 29% on a weekly basis, 13% monthly, 11% in the last 6 months to a year and 8% over a year.**

- 84% of those who visit amenity greenspace in Northumberland walk, 14% drive, 2% cycle and none use public transport
- 56% of respondents reported it takes less than 5 minutes to travel to their nearest amenity greenspace, 22% report 6-10 minutes, 13% report 11-20 minutes and 10% over 20 minutes
- Local people have identified that they travel for an average of 7.58 minutes to gain access to amenity greenspace in Northumberland. This equates to 0.38 miles or 612 metres.
- Northumberland Council should be setting the access standard at 600 metres and aspire to improve the current provision and ensure that it does not fall below 600 metres.

5.73 It is important to recognise that people will undoubtedly make use of the space nearest to where they live and that may not be a site classified as amenity greenspace.

5.74 Analysis using the above threshold of 600m shows that 78% of all households in the County are within the accessibility threshold for amenity greenspace. From the analysis the south east has 98% of all households within 600m of a site classed as amenity greenspace, the north area has 75% of all households within the defined catchment whilst the west is significantly worse off in terms of accessibility to amenity greenspaces, with only 42% of all households being within the catchment threshold.

Figure 5.21 : Accessibility Analysis for Amenity Greenspace

Area	Number of households in Area	No. of households within 600m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
North	45,396	34,260	75%	25%
South East	69,152	67,514	98%	2%
West	33,464	14,064	42%	58%
Total	148,012	115,838	78%	22%

5.75 The above reflects the rural nature of parts of the county with the west area having 58% of all households outside the defined catchment compared to only 2% in the more densely populated urban areas of the south east. The analysis shows that 22% of all households are outside the identified accessibility threshold for amenity greenspace.

Standards

Amenity Greenspace Standards

Quantity

To ensure provision does not fall below the current level of 1.09 ha per 1,000 population

Quality

To achieve a minimum standard of 48%. This includes ensuring facilities and infrastructure are 'fit for purpose'

Accessibility

To provide amenity greenspace within 600m or 8 minutes travel time from where people live

Outdoor Sports Facilities

“Sites specifically intended to meet demand for formal participation in sport including pitch sports, tennis, bowls and athletics or countryside and water sports.”

- 5.76 This section considers the wide range of outdoor sports provision in the County. It includes specific sites developed to focus resources and to promote sport and recreation. A more detailed assessment of grass pitch provision can be found in the playing pitch strategy which sits alongside this document.

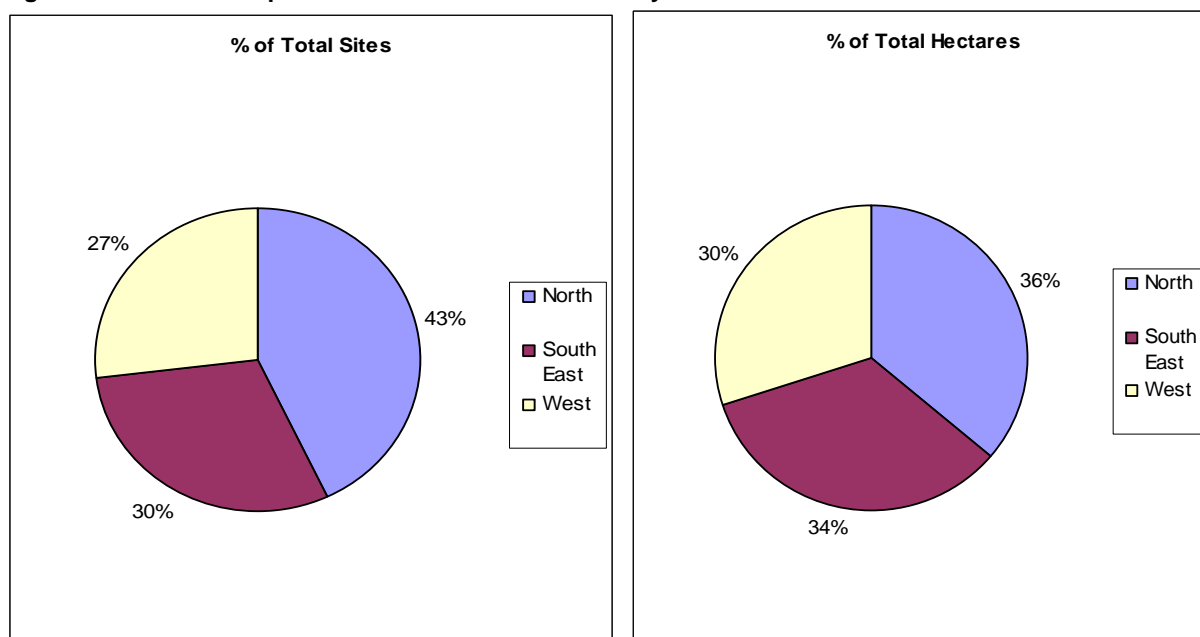

Quantity

- 5.77 This section considers those facilities classified as outdoor sports facilities as advocated by PPG17 and the associated guidance. The quantity audit has revealed the following provision in accordance of outdoor sport in the County and on an area basis. These are shown in Figure 5.22.
- 5.78 The audit has identified 202 outdoor sports facility sites in the County, which equates to 526.80 hectares and provide 1.69 ha per 1,000 population.
- 5.79 Figure 5.22 provides details of all the accessible open spaces designated as outdoor sports facilities.

Figure 5.22 : Outdoor Sports Provision Across the County

Area	Population	No. of Sites	Total Ha	Ha Per 1,000	Average Site Size (ha)	%of Total Sites	% of Total Hectares
North	89,017	87	191.68	2.15	2.20	43%	36%
South East	147,500	61	178.89	1.21	2.93	30%	34%
West	74,453	54	156.23	2.10	2.89	27%	30%
Total	310970	202	526.80	1.69	2.61	100%	100%

Figure 5.23 : Outdoor Sports Provision Across the County

- 5.80 From Figures 5.22 and 5.23 the distribution of sites provided for outdoor sports across the County is uneven in terms of number of allocated sites, however the amount of land provided for outdoor sports facilities is fairly even amongst the three areas.
- 5.81 The figures also demonstrate the variation in the amount of land allocated as outdoor sports by area across the County. These figures do not include golf courses across the County.
- 5.82 On the basis of the standards proposed for this type of provision, the South East has fewer facilities, and therefore less provision per head of population. This is an issue as the South East is the most heavily populated area in Northumberland. In terms of access to outdoor facilities, local communities are able to use facilities in neighbouring Newcastle or North Tyneside; consultation evidence supports the fact that people are already travelling, for example, to use Artificial Grass Pitches (AGPs)/MUGAs in neighbouring authorities. Obviously such access is dependent on either having private transport, or access to good public transport. There are AGP and MUGA facilities close to the border with North Tyneside at a number of schools, and local authority leisure centres eg the Parks Leisure Centre. Equally there are bowls and tennis facilities in neighbouring authorities; in terms of use of such provision, the issue for Northumberland communities is access and cost of travel.

Quality

- 5.83 The quality audit provides an indicative rating of quality out of 100%. It is important to note that the quality score represents a 'snapshot' in time and records the quality of the site at the time of the visit. The key criteria for outdoor sport include:
- **Entrance areas**
 - **Presence and quality of signage and information**
 - **Presence and quality of parking and lighting**
 - **The quality of key furniture including seats and bins**
 - **The quality of grassed areas**

- **Cleanliness**
- **The quality of specific facilities including pitches, bowling greens and tennis courts**

- 5.84 The audit of provision has revealed that the quality of outdoor sports grounds varies significantly; the average quality of Council provision is 51% (Average). The audit has also revealed that quality varies across provision and quality varies by area.
- 5.85 Quality inspections have been undertaken at the 184 sites which were accessible. The quality assessment is based on a number of key criteria encompassing the quality aspects of the Green Flag Award, ILAM Parks Management Guidance and the Tidy Britain Scheme.
- 5.86 For sports pitches these are considered in more detail in the Council's separate Playing Pitch Strategy. Further information can be found in the Appendices.
- 5.87 Figure 5.24 identifies the quality findings for sports facilities across the County.

Figure 5.24 : Quality of Outdoor Sports Provision

Area	Quality Range	Quality Variance	Average Quality Score	Quality Rating
North	6% - 85%	79%	47%	Average
South East	27% - 98%	71%	53%	Average
West	6% - 87%	81%	45%	Below Average
County Wide	6% - 98%	92%	48%	Average

Above Images from site audit to Site 1290 Alnwick West Disused Tennis Courts

Above Images from site audit to Site 5207 Newton Cricket Club

- 5.88 The quality of formal outdoor sports facilities in Northumberland can be summarised as follows:
- **Quality of sites varies significantly from 6% (very poor) to 98% (excellent).**
 - **The average quality rating of formal outdoor sport sites in the County is 48% rating as 'average' on the quality line.**
 - **The south east has the highest average quality score of 53%. This area also has the smallest variance in quality scores.**
 - **The average quality score and variance for the north are between the figure for the south east and west.**
 - **The west has the lowest average score of 45% rating as 'below average', and the highest variance in score (81%).**
- 5.89 There are currently 106 sites that fall below a rating of Good.
- 5.90 It is important that these facilities are provided, managed and maintained to the minimum of a Good quality rating (61% or above) as these are facilities that people often have to pay to play on or make use of. They are also a key element that contributes to wider agendas such as social inclusion, healthy lifestyle and community cohesion as they encourage active participation through sport and often require local people to participate as part of a team.

Bowls – Audit & Assessment

- 5.91 Lawn bowls is a sport which maintains continuing popularity, with recreational play particularly significant among older groups. As a low-intensity activity, bowls is regarded as an important sport to target individuals who may be less well conditioned physically, encouraging an active lifestyle. The sport itself is typically organised on a club basis, although many facilities are owned by local authorities.
- 5.92 Bowling greens as sports facilities accommodate a range of formal and casual use. Demand manifests itself through differing uses, such as formal bowling teams using facilities for league games, or for individuals to bowl on a more casual or informal basis.
- 5.93 According to Sport England's Active People survey, bowls has encountered a decline in overall participation in recent years, particularly between Active People Survey 2 (AP2) and Active People 4 (AP4), the most recent survey.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 5.94 The audit of bowls provision across the County has identified a total of 34 bowling greens with community use.
- 5.95 The breakdown of these greens and their quality are outlined in Figure 5.25, specific site details can be found in Appendix 1.

Figure 5.25 Audit of Bowls Facilities in Northumberland

Area	Population	No. of Bowling Greens	Quality Range	Mean Quality Score (%)
North	89,017	13	44% - 84%	66% (Good)
South East	147,500	17	60% - 89%	71% (Good)
West	74,453	4	44% - 64%	51% (Average)
Total	310,970	34	44% - 89%	66% (Good)

- 5.96 The table shows the distribution across the County, and whilst the County appears reasonably well served the distribution across the neighbourhood areas is uneven with the North and South East having 88% of bowls provision and the West only having 12%.
- 5.97 The quality of bowling greens has been assessed via club consultation and via site visits, using a non-technical visual assessment. A number of criteria have been examined, specifically:
- **Presence of floodlighting**
 - **Surface / turf**
 - **Benches**
 - **Condition of gullies / backboards**
 - **Whether the facility is served by a pavilion and staffed**
 - **Appropriate fencing**
- 5.98 From Figure 5.25 it is clear to see that bowls facilities in the South East rated the best with an average quality score of 71% (good) and a range of 60 - 89%. The 4 bowls facilities in the West rated the worst with an average quality score of 51% (average) and a range of 44 - 64%.
- 5.99 As with other natural surfaces, the quality of the playing surfaces has an impact upon the level of usage, as well as overall satisfaction and quality of playing experience. Poorly designed and drained greens cannot recover from inclement weather, and require additional maintenance. Those greens that are used outside of the months between April and September also suffer due to wear and tear outside of the growing season.
- 5.100 Participation in bowling is enhanced and supported by the provision of indoor facilities, which complement outdoor greens and provide winter play opportunities. Indoor rinks can be found at Ashington, Cramlington, Berwick and Hexham.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 5.101 21 bowls clubs were identified and contacted as part of the study, 15 clubs responded to the consultation, a 71% response rate. Of the clubs consulted, membership numbers range from 20 to 91 members with an average of 51 members per club. Almost all clubs anticipated these numbers to stay relatively static.
- 5.102 Clubs were also consulted about their ratings of the quality of the bowling greens and the associated facilities they use. 60% of clubs rated their facilities good or excellent, 20% thought their facilities were average and 20% considered them to be poor. Poor quality pavilions and general playing facilities were generally cited as reasons for rating their bowls facilities poor.
- 5.103 In terms of accessibility and travel time, clubs suggested that the majority of members travel by car, and an acceptable distance to facilities varied considerably from 5 to 30 minutes travel time. Assuming that members do indeed travel by car, this does have an impact on perceived accessibility.
- 5.104 In general terms, a number of factors affect the accessibility of bowling greens. These include the geographical location of facilities and travel required, in addition to the membership policy on offer and the capacity to cater for new members.
- 5.105 Our consultation with clubs and other stakeholders has not identified any additional demand for bowls in the area in terms of school development programmes etc. or through initiatives such as New Age Bowls (a programme which aims to target young people and beginners). Similarly, we are not aware of any particular issues in terms of latent or displaced demand with potential participants being required to play outside of the County.
- 5.106 In order to assess the supply/demand balance of bowling greens, a model has been developed which uses localised population data and the national participation rate for bowls (Active People Survey 3, Sport England), along with assumptions on assumed session length and peak hours, to estimate the demand for space, based on bowling greens being at peak capacity.

Figure 5.26 : Supply and Demand Analysis - Bowls

	North	South East	West	County Total
Population age 16+	75,019	120,779	61,719	257,517
Participation rate	1.01%	1.01%	1.01%	1.01%
Number of participants	758	1,220	623	2,601
Number of greens needed (capacity 16 persons, 2 hr sessions)	5	8	4	17
Over/undersupply (based on current provision)	+ 8	+ 9	0	+ 17

- 5.107 Figure 5.26 demonstrates that based on the above assumptions, demand for bowling greens is less than or equal to current levels of supply in each neighbourhood area and there are sufficient bowling greens across the County to serve demand for bowls.
- 5.108 Other factors to consider include the slight decline in participation rates (which have been observed nationally), and the ageing population in Northumberland, which will see more people aged 55 or more (key participation group for bowls). While it is unlikely that this will have a significant impact on demand for greens (the two counter-trends should provide some balance). It is important that the current provision is maintained (both in quantitative and qualitative terms).

Tennis – Audit & Assessment

- 5.109 Tennis is a sport which is still largely dominated by delivery through a network of county tennis associations and private members' clubs, supplemented by parks tennis, with local authority courts which provide free-to-play or pay-and-play opportunities, although private members'/racquets clubs such as David Lloyd have also become significant as multi-court hubs and centres of excellence throughout the country.
- 5.110 Despite numerous recent initiatives and programmes co-ordinated and promoted by the Lawn Tennis Association, there has been no evidence of sustained participation increases. Cost of facility hire, cost of equipment, lessons, and access to private facilities are all challenges facing the sport on a national level. Participation in tennis can take a variety of forms, from casual pay and play between friends and family, to competitive club matches.
- 5.111 The audit of tennis provision across the County has identified a total of 84 tennis courts with community use. The breakdown of these courts and their quality are outlined in Figure 5.27, specific site details can be found in Appendix 1.
- 5.112 The quality of tennis courts has been assessed via club consultation and via site visits, using a non-technical visual assessment. Based on a simple scoring system, each facility has the potential to score a maximum of 100%. A number of criteria have been examined, specifically:
- **Presence of floodlighting**
 - **Quality and condition of the playing surface and fencing**
 - **Access to ancillary facilities and relevant information**
 - **Nets**
 - **Line markings**
 - **Secured entrance**
 - **Adequate run offs**

Figure 5.27 : Audit of Tennis Facilities in Northumberland

Area	Population	No. of Tennis Courts	Tennis Court	
			Range	Mean Quality Score (%)
North	89,017	46	23% - 92%	60% (Average)
South East	147,500	14	30% - 82%	58% (Average)
West	74,453	24	33% - 72%	57% (Average)
County Wide	310,970	84	23% - 92%	58% (Average)

- 5.113 From Figure 5.27 the average quality of tennis courts does not vary significantly between areas however the quality range varies significantly from 23% (Poor) to 92% (Excellent).
- 5.114 It is important to note that audits were carried out in the winter months when sites may not be subjected to appropriate maintenance regimes, these may affect quality scores. The north area has the highest number of courts with 55% of all provision and the South East the least with only 17% of all tennis court provision.
- 5.115 15 tennis clubs were identified and contacted as part of the study, 9 clubs responded to the consultation (60% response rate). Of the clubs consulted, membership numbers range from 16 to 243 members with an average of 108 members per club. 6 of the 9 clubs consulted anticipated membership numbers would increase in the next 5 to 10 years, the other 3 clubs anticipated membership numbers to remain the same.
- 5.116 Clubs were consulted about their ratings of the quality of the tennis courts and the associated facilities they use. 56% of clubs rated their facilities good or excellent, 22% thought their facilities were average and 22% considered them to be poor or very poor. Poor quality playing surfaces were cited as the main reason for rating the facilities they use as poor.
- 5.117 In order to assess the supply/demand balance of tennis courts, a model has been developed that uses localised population data and the national participation rate (taken from Sport England's Active People survey 3), along with assumptions on assumed session length and peak hours, to estimate the demand for tennis court space. It should be noted that any supply/demand assessment for tennis courts does not take account of other use of tennis courts – the peak supply figure is difficult to account for given alternative uses e.g. netball.

Figure 5.28 : Supply and Demand Analysis - Tennis

	North	South East	West	County Total
Population age 6-55 years	49,459	90,343	41,801	181,603
Participation rate	2.37%	2.37%	2.37%	2.37%

	North	South East	West	County Total
Number of participants	1,172	2,141	991	4,304
Number of courts needed (capacity 3 persons, 1 hr sessions)	20	36	17	72
Over/undersupply (based on current provision)	+26	-22	+7	+12

- 5.118 Figure 5.28 shows that based on the above assumptions, there is a theoretical oversupply of tennis courts based on the assumed level of demand across the County. However, this oversupply takes place in the North and West neighbourhood areas and there is a theoretical deficiency of tennis courts in the South East area.

Accessibility

- 5.119 Accessibility of Outdoor Sports Provision has been assessed using a variety of techniques including mapping exercises and consultation. The consultation key findings show that:

- **3% of respondents to the public questionnaire reported that they visit outdoor sports facilities on a daily basis, 18% on a weekly basis, 9% monthly, 26% every 6 months to a year and 44% every year**
- **22% of those who use outdoor sports facilities in Northumberland walk, 77% drive, none cycle and 1% use public transport**
- **17% of respondents who use outdoor sports facilities reported it takes less than 5 minutes to travel to their nearest site, 28% report 6-10 minutes, 32% report 11-20 minutes and 23% over 20 minutes**
- **Local people have identified that they travel for an average of 14.71 minutes to gain access to outdoor sports facilities in Northumberland. This equates to 0.74 miles or 1191 metres.(this has been rounded up to 1200 metres for analysis purposes)**

- 5.120 Analysis using the above threshold of 1200m shows that 84% of all households in the County are within the accessibility threshold for outdoor sports facilities. From the analysis the south east has 97% of all households within 1200m of a site classed as outdoor sports facilities; the north area has 74% of all households within the defined catchment whilst the west shows a similar pattern in terms of accessibility to outdoor sports facilities with 72% of all households being within the catchment threshold.

Figure 5.29: Accessibility Analysis for Outdoor Sports Facilities

Area	Number of households in Area	No. of households within 1,200m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
North	45,396	33,747	74%	26%

Area	Number of households in Area	No. of households within 1,200m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
South East	69,152	66,856	97%	3%
West	33,464	24,143	72%	28%
Total	148,012	124,746	84%	16%

- 5.121 The analysis shows that 16% of all households are outside the identified accessibility threshold for outdoor sports facilities. This needs to be considered alongside the revised Playing Pitch Strategy and the current supply and demand for grass based pitch provision.

Standards

- 5.122 The demand for outdoor sports facilities needs to be considered in conjunction with the County's Playing Pitch Strategy. This demonstrates the need for pitches more accurately based on demand and future population levels; it also recognises the pitch facilities within other typologies such as parks. A summary can be found below.
- 5.123 Quantity standards for the Playing Pitch Strategy have been set on the basis of the assessment results and estimations of future demand. The proposed standards reflect the assessment results and findings of local consultation. Standards have been set to reflect pitch requirements to meet peak demand and are proposed for all types of natural turf pitches assessed.
- 5.124 For the purpose of setting standards, the assessment has been undertaken for each pitch sport and appropriate sub-categories where different types or specification of pitch are required. This specifically concerns soccer where mini teams and youth teams require appropriately sized pitches. The local standards recommended are based on the actual number of pitches required to meet estimated future demand.

Figure 5.30 : Application of Playing Pitch Quantity Standards

Area	Current Provision						Required Provision i.e. the total provision required to meet recommended standards of provision; the actual level of additional provision required is the difference between each green column and each yellow column e.g. need for an additional 4 mini soccer pitches (12-8)					
	Mini Soccer	Youth Football	Adult Football	Cricket	Rugby	AGP (full size - hockey)	Mini Soccer	Youth Football	Adult Football	Cricket	Rugby	AGP (full size - hockey)
North	8	7	57	21	18	2	12	19	16	23	17	2
West	10	9	36	19	18	0	33	31	23	30	12	1*
South East	14	10	64	8	13	2	33	45	50	17	8	2

**suggested need for a pitch suitable for hockey to enable development activity*

- 5.125 It is important to highlight that application of the Local Standards suggests that the number of rugby pitches in the West and South East sub areas could be reduced; this is not recommended given that the calculated surpluses are only theoretical, given the significant demand for, and impact of training. Factoring in this impact actually results in deficiencies in current and future levels of rugby pitch provision.
- 5.126 Quality standards for pitches have been set on the basis of the quality assessment results and the categorisation of scored pitches using the electronic toolkit accompanying “Toward a Level Playing Field”. The quality standard is based on all pitches being rated within the “Good” classification. In simple terms, the standard for playing pitch provision is “all pitches available for the community to use will be of a good standard”.
- 5.127 For the PPG17 assessment standards for sites classified as Outdoor Sports Facilities have been set using the current provision as the baseline, to guide the development of standards for the future.

Standards

Outdoor Sports Facility Standards

Quantity

To ensure provision does not fall below the current level of 1.69 ha per 1,000 population

Quality

To achieve a minimum standard of 61% (good quality)

Accessibility

All households to be within 1200m or 15 minutes travel time

Provision for Children and Young People

‘Areas designed primarily for play and social interaction involving children and young people, such as equipped play areas, multi-use games areas (MUGA), and skateboard parks’.

- 5.128 Provision for children and young people consists of equipped play areas and specialist provision for young people, including skateparks and multi-use games areas (MUGAs). The provision of facilities for children and young people is important in facilitating opportunities for play and physical activity and the development of movement and social skills.
- 5.129 A variety of types of open space can provide children and young people with these opportunities, but the audit uses the principle of ‘primary purpose’, so provision for children and young people focuses on equipped play areas.
- 5.130 Northumberland County Council realises the need to work in partnership and maximise opportunities of external funding. The Northumberland County-wide Play Partnership will not only be the drive for communication, cooperation and delivery but also monitoring and evaluation of the Council’s work.
- 5.131 It is recognised that ‘play’ is greater than the element of fixed, equipped play dealt with in the play strategy. Play can also encompass open space, sport, organised activity schemes and even ‘Home Zones’ in residential developments. These are covered by other Council strategies and policy.

Quantity

- 5.132 The audit undertaken has revealed that there are 224 sites that have provision for children and young people, occupying 26.90 hectares. The provision is split between sites that are specifically provided for children and young people (i.e. stand alone play areas) and provision within other typologies e.g. parks. The total number of play areas classified as ‘stand-alone sites’ is 116, with the remaining 108 play areas located on sites classified within other typologies.
- 5.133 The quantity standards for children and young people are based on the population of children aged 0-15 years. Figure 5.31 provides a summary of provision for children and young people within Northumberland, and Appendix 1 contains the sites identified as provision for children and young people. The provision is as follows:
- **108 play areas within other typologies (10.74 hectares)**
 - **116 stand alone play areas (16.16 hectares)**
- 5.134 It is important to note that the 10.74 ha of land occupied by play areas within other typologies has already been calculated within the typologies they occupy. To provide a true reflection of provision across the County it is important that these areas are also included within this section and are reflected in the standards set.

Figure 5.31 : Provision for Children & Young People

Neighbourhood Management Area	Children's Population aged 0-15 years	Site Type	No. of Sites	Total Ha	Hectares per 1,000 C&YP's Population
North	13,997	Within other typology	37	8.27	0.59
		Stand alone	44		
South East	26,721	Within other typology	47	9.19	0.34
		Stand alone	27		
West	12,734	Within other typology	24	9.44	0.74
		Stand alone	45		
Total	53,452	Within other typology	108	26.90	0.50
		Stand alone	116		
		Total	224		

5.135 The identified provision for children and young people in total covers 26.90 ha across the County. From Figure 5.31 a number of observations can be made:

- Throughout Northumberland there is 0.50 hectares of provision per 1,000 population of children and young people
- The South East has the least provision per 1,000 population with 0.34 ha / 1,000 population
- The West has the most provision with 0.74 ha / 1,000 population
- The North has the most number of play sites with 81 sites in total
- It must be noted that the quality and accessibility of provision is more important than the amount of provision, given the small amount of area the sites generally cover

- There is a need to develop additional provision where possible in the South East, to improve the current standard of provision. This is important given that play provision is local in nature and should be safely and easily accessed. Although there are play sites in neighbouring authorities which could be used by Northumberland residents, this is not really practical, given that children and young people should be able to access play provision close to where they live. Accessing larger play sites in North Tyneside or Newcastle, intended to provide for more than an immediate local community, is, however, an option for residents living in the South East, given that children would usually be accompanied to such sites.

5.136 Figure 5.32 summarises the type of provision in each area. This includes Multi-Use Games Areas (MUGAs), skate parks and BMX tracks.

Figure 5.32 : Summary of provision by area

Area	Children's Population aged 0-19 years	No. of equipped play areas	No. of MUGA	No. of skate parks	No. of BMX tracks
North	13,997	72	11	5	0
South East	26,721	67	17	8	1
West	12,734	64	9	2	3
Total	53,452	203	37	15	4

5.137 Of the 224 sites containing equipment for children's play, the following provision could be found:

- **203 equipped play areas**
- **37 MUGAs (multi-use games areas)**
- **15 skate parks**
- **4 BMX tracks**

Quality: Equipped Play Areas

5.138 Quality Inspections have been undertaken via a site visit to 147 of the 224 sites with play equipment. The quality assessment proforma for play areas has been based on the Royal Society for the Prevention of Accidents (ROSPA) "Play Value Assessment" and looks at a variety of criteria including the overall appearance of the site, the ambience and the type of equipment by age range. The quality inspections consider the following:

- **Balancing**
- **Climbing**
- **Crawling**
- **Gliding**
- **Jumping**
- **Rotating**
- **Sliding**
- **Rocking**

- **Group Swinging**
- **Single Swinging**
- **Ball Play**
- **Agility Bridges**
- **Viewing Platform**
- **Wheeled Play**

5.139 In summary the criteria have been used to rate quality and value of local play facilities. Appendix 1 contains the quality rating for the provision of children and young people.

5.140 It is important to note that play provision is not simply providing equipment; it is also about the environment that equipment is situated in. The audit considers elements that best practice play areas have been found to promote. These include diversity in textures, use of wildflowers and landscaping. In supporting the generation of a sense of place it considers whether the play area is locally related to reflect some local significance. This could be, for example, if the site is near the seaside, then the play area's design could reflect this through themed equipment designed around the sea.

5.141 Site scores not only consider the condition of the equipment they also consider the play value of the entire designated play area. This includes consideration for the different types of activity that the play area allows including:

- **Overall site features** including access gates, whether the area is pollution and noise free, presence of shade, access for the disabled, appropriate signage, locally related features and seating
- **Equipment for Toddlers, Juniors and Teenagers** have been assessed as discrete elements within the overall play value assessment

5.142 The audit allows compilation of a quality score (presented as a percentage) to reflect variances in the quality of facilities across the County. The score can be rated against a value line that reflects the overall quality of the site. The value line is outlined below.

Quality Line – Provision for Children & Young People

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

5.143 The quality audit provides an indicative rating of quality out of 100%. It is important to note that the quality score represents a 'snapshot' in time and records the quality of the site at the time of the visit. A summary of the quality assessment ratings for each site are shown in Figure 5.33.

5.144 The images below show the contrast in the quality of provision for children and young people showing some of the lowest and highest scoring sites for quality.

Above Images from audit to Site ID 5152 Castle Lea, Low Prudhoe

Above Images from audit to Site ID 5131 The Sele Play Area

- 5.145 As part of the public consultation local residents were asked to rate the quality of each typology. 41% of respondents considered provision for children and young people to be above average (very good or good), 37% average and 22% below average (poor or very poor).

Figure 5.33 : Quality of Equipped Play Areas

Area	No. of Sites Audited	Average Quality Score (%)	Range (%)	Quality Variance
North	50	27%	5 – 84%	79%
South East	53	40%	21 – 77%	56%
West	44	28%	3 – 49%	46%
Total	147	32%	3 – 84%	81%

5.146 Key findings relating to the overall quality of children's play areas include:

- The average rating of sites across the County is 32% - this rates as 'below average' when compared to the quality value line
- Overall scores range from 3% (very poor) to 84% (excellent)
- Play sites in the South East on average rated better than those in the North or West

Quality: Multi-Use Games Areas (MUGAs)

5.147 26 of the 37 multi-use games areas were assessed for quality as part of the overall site assessment. The quality ratings are shown below. The quality inspections consider the following factors:

- Surface quality
- Fencing
- Posts
- Nets
- Goals
- Line markings
- Secured entrance
- Correct size
- Floodlighting
- Information boards/contact details
- Vandalism

Quality Line – MUGA

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

Figure 5.34: Quality of MUGAs

Area	No. of MUGA's Audited	Quality Range (%)	Average Quality Score (%)
North	7	51 – 82%	65%
South East	12	25 – 100%	59%
West	7	16 - 100%	55%
Total	26	16 – 100%	59%

5.148 Key findings relating to the audited MUGAs include:

- There are a total of 37 MUGAs across the County.
- 70% of provision was audited.

- The average rating of MUGAs across the County is 59% (average).
- The quality range of MUGAs across the County varies immensely from 16% (poor) to 100% (excellent).

Accessibility

5.149 Accessibility has been assessed using a variety of techniques including mapping exercises and consultation. The accessibility thresholds are outlined in Figure 5.35 and the maps in Appendix 4. The consultation key findings show that:

- 52% of respondents to the public questionnaire reported that they visit play areas. Of those who visit, 5% do so on a daily basis, 31% on a weekly basis, 27% monthly and 37% occasionally.
- 70% of those who visit provision for children and young people walk, 28% drive and 2% cycle.
- 30% of respondents who visit provision for children & young people reported it takes less than 5 minutes to travel to a play area, 34% report 6-10 minutes, 25% report 11-20 minutes and 11% over 20 minutes.
- Local people have identified that they travel for an average of 10.41 minutes to gain access to sites for children and young people in Northumberland. This equates to 0.52 miles or 837 metres.
- Setting the access standard at 800 m would indicate an aspiration on the part of Northumberland Council to ensure all residents live within 800 m of a site containing provision for children and young people.

Figure 5.35 : Accessibility Analysis for all sites containing Provision for Children and Young People

Area	Number of households in Area	No. of households within 800m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
North	45,396	32,957	73%	27%
South East	69,152	64,512	93%	7%
West	33,464	22,729	68%	32%
Total	148,012	120,198	81%	19%

5.150 The GIS analysis has identified that 81% or 148,012 residential households in the County are within the access catchment set for provision for children and young people. Importantly 19% of households are not currently within the catchment areas.

Standards

Standards - Provision for Children & Young People

Quantity

To ensure provision does not fall below the current level of 0.50 ha per 1,000 children's population (aged 0-15 years)

Quality

For all play sites to achieve a minimum standard of 61% and to ensure all fixed play design considers the play value of the provision as the key driver.

Accessibility

To provide access for all households in the County to be within 800m of provision for children and young people or 10 minutes travel time.

Allotments

“Opportunities for those people who wish to grow their own produce as part of the long term promotion of sustainability, health and social inclusion”

- 5.151 This section considers the provision of both public and private allotments across the County. Allotments provide a key type of provision within the overall portfolio of open space facilities. The accessibility of open space varies greatly dependent upon the type of provision, and it is by their very nature that allotments are only accessible with restrictions in that you must be a tenant or plot holder.
- 5.152 From the consultation undertaken, the value of allotments is significant, providing facilities for physical activity in addition to the promotion of health eating and educational value. The provision of allotments is a statutory function for local authorities under a number of legislative acts including the 1950 Allotment Act.
- 5.153 Allotments, like other open space, can provide a number of wider community benefits and achieve a number of sustainability targets, in addition to their primary purpose of growing produce. These include:
- **Conservation** - Allotments can be an important genetic resource for the conservation of rare species
 - **Recycling** - Allotments holders are encouraged to recycle and offer the potential for community composting sites
 - **Transport** - Home grown food means there is less transport (less ‘food miles’) and less packaging
 - **Employment and Training** - New skills and opportunities whether promotional, managerial or cultivation
 - **Education** - Links with schools, special needs and adult learning. Close contact with wildlife can lead to a lifelong interest
 - **Leisure** - Promoting local tourism - arts, crafts and volunteering
 - **Sustainable neighbourhoods** - revitalising allotments and neighbourhoods
 - **Community Development** - Co-operation across ethnic, age and other demographic barriers. Allotment societies often play a wider role in community schemes, becoming involved with local schools as well as programmes for the mentally and physically ill or disabled, and providing people from different cultural backgrounds with the opportunity to meet and share experiences
 - **Health** - Increased consumption of fresh foods and more exercise and relief from stress, and therapy for those with mental health problems
 - Providing opportunity for **social inclusion** and cohesion
 - Creating opportunities for people to participate in **recreation**

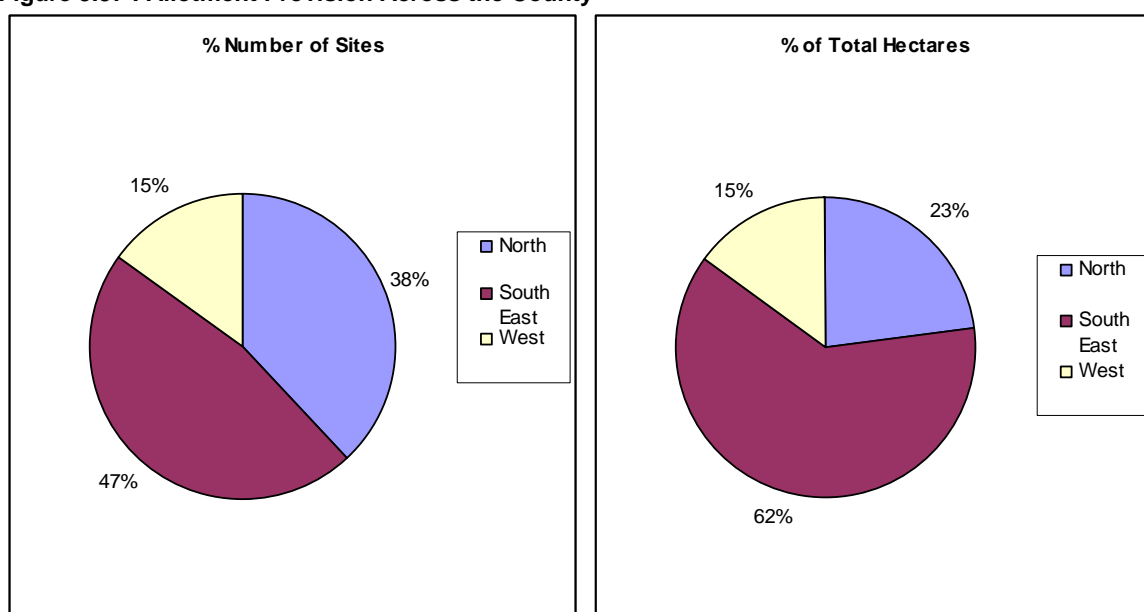

Quantity

5.154 The audit undertaken has revealed that there are 126 sites occupying 160.07 hectares and providing 0.51 ha per 1,000 population. Figure 5.36 identifies the overall provision in the County and by Neighbourhood Management Area.

Figure 5.36 : Allotment Provision Across the County

Area	Population	No. of Sites	Total Ha	Ha Per 1,000	%of Total of Sites	% of Total Hectares
North	89,017	48	36.90	0.41	38%	23%
South East	147,500	59	99.63	0.68	47%	62%
West	74,453	19	23.54	0.32	15%	15%
Total	310,970	126	160.07	0.51	100%	100%

Figure 5.37 : Allotment Provision Across the County

5.155 From Figure 5.37 the distribution of allotment provision across the County is uneven both in terms of the number of sites and the amount of land provided as allotment sites. This can be summarised as follows:

- The **North** has 48 allotment sites which equals 36.90 ha. This equates to 0.41 ha per 1,000 population.
- **South East** has the greatest provision with 59 sites of 99.63 ha which equates to 0.68 ha per 1,000.

- **West** has the least amount of provision with only 19 sites of 23.54 ha which equates to 0.32 ha per 1,000.
- 5.156 Allotments are relatively local in nature, and therefore it is not always practical in geographical, nor administrative terms, to access allotment provision in neighbouring authority areas. Given that there is a deficit in provision in the North and West, based on the proposed standards for Northumberland as a whole, there is a need to create, where possible, additional sites in the North and West, and ensure that management of plots are re-let efficiently and effectively.
- 5.157 To meet demands it is important that vacant plots are turned around quickly and where possible larger plots divided in half to allow new tenants access and reduce waiting list numbers. It is also important that current disused sites are brought back into operational use.

Quality

- 5.158 The quality audit provides an indicative rating of the quality out of 100%. It is important to note that the quality score represents a “snapshot” in time and records the quality of the site at the time of the audit.
- 5.159 Sites were assessed against a range of criteria including:
- **Entrance areas**
 - **The presence of water supply**
 - **Whether the site is served by toilets**
 - **Secure fencing around the site**
 - **Signage to identify management, usage arrangements, special events and the availability of plots**
 - **The presence of facilities such as composting bins, a shop and car parking**
- 5.160 Site audits were undertaken at 117 sites in the County, the remaining 9 were locked or inaccessible at the time of auditing and were not fully assessed for quality. Quality ranged from 8% to 90% across the 117 audited sites. The overall quality findings from the site audits are outlined below with the average quality score for allotments across the County being 35% or ‘below average’ when measured against the quality value line.

Quality Line

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

- 5.161 Only two of the allotment sites were rated as good or excellent in terms of quality. The majority of sites were rated either very poor, poor or below average.

Images from Site ID 1316 – Argyll Terrace Allotments

Images from Site ID 1421 – Vyner Park Allotments

5.162 The quality audit has revealed a slight variance in the quality of allotment sites across the 3 areas in the County; this is demonstrated in Figure 5.38.

Figure 5.38: Allotment Quality Rating

Area	Quality Range	Quality Variance	Average Quality Score	Quality Rating
North	13% - 64%	51%	37%	Below Average
South East	8% - 70%	62%	33%	Below Average
West	13% - 90%	77%	37%	Below Average
County Wide	8% - 90%	82%	36%	Below Average

5.163 From Figure 5.38 the quality of allotments across the County can be summarised as follows:

- In the **North** the overall average of allotment quality is 37%, joint equal with the West area.
- **South East** has an overall average of 33% (below average on the quality line rating) and this makes it the lowest average quality rating of all three areas.
- The average quality rating of allotment sites in the **West** is 37% (below average).

5.164 The allocated scores reflect the quality of the infrastructure of the sites within this typology at a point in time. It is recommended that the Council should aspire to deliver 'good' quality services and facilities.

5.165 When considering the quality of sites in this typology, best practice dictates that these sites are beneficial to people and their well being. As such they should, as a minimum, provide running water, signage, and a toilet facility.

5.166 Generally minor improvements to the infrastructure of sites within this typology would make significant differences. Tidy perimeters, including appropriate security measures such as gates and fencing improvements, signage and notice boards, waste management, and quicker re-letting of vacant plots would all change the overall impression.

Accessibility

5.167 Accessibility has been assessed using a variety of techniques including mapping exercises and consultation. The accessibility analysis is outlined in Figure 5.39. The consultations key findings show that:

- **37% of respondents to the public questionnaire reported that they use allotments – 4% on a daily basis, 7% on a weekly basis, 4% on a monthly basis, 10% every 6 months to a year and 10% yearly.**
- **20% of those who use allotments walk, 10% drive, 0% cycle and 1% use public transport.**
- **18% of respondents reported it takes less than 5 minutes to travel to their nearest allotment, 16% report 6-10 minutes, 12% report 11-20 minutes and 7% over 20 minutes.**
- **Local people have identified that they travel for an average of 10.46 minutes to gain access to allotment sites in Northumberland. This equates to 0.52 miles or 837 metres.**
- **Setting the access standard at 800 metres would indicate that Northumberland Council should aspire to improve allotment provision and ensure that it does not fall below 800 metres.**

Figure 5.39 : Accessibility Analysis for Allotments

Area	Number of households in Area	No. of households within 800m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
North	45,396	22,478	50%	50%
South East	69,152	58,177	84%	16%

Area	Number of households in Area	No. of households within 800m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
West	33,464	14,788	44%	56%
Total	148,012	95,443	64%	36%

5.168 The GIS analysis has identified that 64% or 95,443 residential households in the County are within 800m of an allotment site. Importantly 36% are not within 800m of an allotment site.

5.169 It is important to recognise that people will undoubtedly make use of the allotments that have a good reputation; this means that they may travel to a site that is further than the one nearest to their home.

Standards

5.170 The demand for allotments nationally is growing as people are seeking more healthy active lifestyles. Therefore it is suggested to sustain this standard until the Council develop a strategy (working in partnership with the Town and Parish Councils) to utilise and fill vacant or unmanaged plots and disused sites are brought back into operational use where possible. The standards have been set using the current provision as the baseline to guide the development of standards for the future.

Allotment Standards

Quantity

To ensure provision does not fall below the current level of 0.51 ha per 1,000 population

Quality

To achieve a quality standard of 'good' (61% or above). This includes ensuring that facilities and infrastructure are 'fit for purpose'.

Accessibility

To provide an accessible allotment plot within 800m or 10 minutes travel time of where people live

Cemeteries and Churchyards

“The primary purpose is for the burial of the dead and for quiet contemplation, but also for the promotion of wildlife conservation, biodiversity and to provide a link to the past. Also includes closed burial grounds used for informal recreation.”

- 5.171 Cemeteries and closed churchyards can provide a valuable contribution to the portfolio of open space provision within an area. For many people these spaces provide a quiet place for contemplation in addition to their primary purpose as a final resting place. They often have wildlife conservation and biodiversity value. In the context of this study it is important to acknowledge that cemeteries are not created with the intention of providing informal or passive recreation opportunities.
- 5.172 Cemeteries can make a significant contribution to the provision of greenspace, sometimes providing a sanctuary for wildlife in urban areas otherwise devoid of space. Although many have restricted access, they still provide a useful resource for the local community. A wide variety of habitats can often be found supporting other open space types such as, areas of natural and semi-natural greenspace.
- 5.173 Within urban areas, cemeteries are often amongst the few areas of greenspace where the local community is able to have some contact with the natural world. Within rural communities they often provide a strong link to the past.

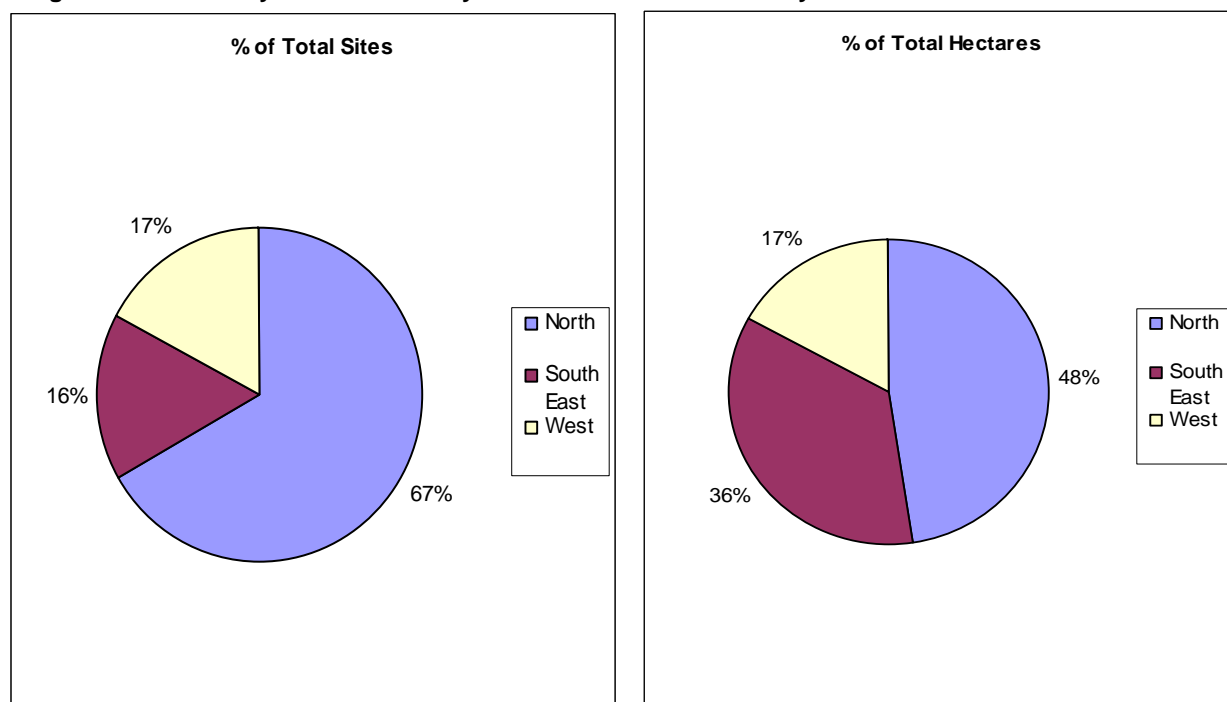

Quantity

- 5.174 There are 128 sites identified as cemeteries and churchyards in Northumberland, covering a total of 125.42 hectares which equates to an overall provision of 0.40 ha per 1,000 population.
- 5.175 The distribution of these sites on an area basis is highlighted in Figure 5.40.

Figure 5.40 : Cemetery and Churchyard Provision Across the County

Area	Population	No. of Sites	Total Ha	Ha Per 1,000	Average Site Size (ha)	%of Total Sites	% of Total Hectares
North	89,017	85	60.03	0.67	0.71	66%	48%
South East	147,500	21	44.56	0.30	2.12	16%	36%
West	74,453	22	20.83	0.28	0.95	17%	17%
Total	310970	128	125.42	0.40	0.98	100%	100%

Figure 5.41 : Churchyard and Cemetery Provision Across the County

5.176 From Figures 5.40 and 5.41 the key points relating to the spatial distribution of cemeteries by area can be summarised as follows:

- **North** has the greatest provision with 85 sites identified as churchyards and cemeteries which equates to 60.03 hectares with a provision level of 0.67 ha per 1,000 population. This is equivalent to 66% of the total number of churchyards and cemeteries and 48% of the total hectares in Northumberland.
- **South East** has the least amount of provision with only 21 sites of 44.56 ha which equates to 0.30 ha per 1,000. This makes up 16% of the total number of churchyards and cemeteries in the County and 36% of the total number of hectares.
- **West** has 22 sites of 20.83 ha which equates to 0.28 ha per 1,000. This equates to 17% of the total number of sites and 17% of the total number of hectares for churchyards and cemeteries in the County.

Quality

5.177 There are no national or local standards for the quality of churchyards and cemeteries. Increasingly though, a number of local authorities have entered cemeteries for the Green Flag Award.

5.178 Quality inspections have been undertaken via a site visit and completion of a scored proforma. The quality was broadly based on the scoring system used for other accessible types of open space. The key criteria include:

- **Main entrance safety and cleanliness**
- **Signage**
- **Upkeep and safety of graves**
- **Quality of roads and pathways**

- **Provision of bins and seats**

Quality Line

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

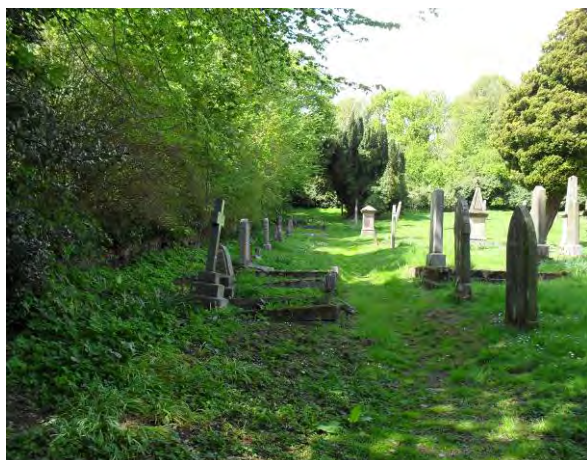

- 5.179 Site visits were undertaken to the 118 of the 128 sites which were identified as being churchyards and cemeteries. It is important to consider the wider facilities that could be developed further at some of the sites. These would include recycling facilities for visitors to dispose of flowers etc. The key findings of the quality assessments undertaken are provided in Figure 5.42.

Figure 5.42 : Churchyards and Cemeteries Quality Rating

Area	Quality Range	Quality Variance	Average Quality Score	Quality Rating
North	22% - 83%	61%	57%	Average
South East	19% - 90%	71%	60%	Average
West	22% - 85%	63%	53%	Average
County Wide	19% - 90%	71%	57%	Average

- 5.180 The results of the quality assessment show a significant variance in the quality of churchyards and cemeteries.

- **Overall, the range of quality across all sites is 71% with an average quality of 57% ('Average' on the quality line). There are 52 sites which fall in the "good" or "excellent" category (a score of 61% or more)**
- **In the North, South East and West the overall quality of cemeteries and churchyards was found to be "average".**
- **The quality of churchyards and cemeteries in the South East were the best whilst the quality in the West was the worst of all three areas.**

Above Images from site audit to Site 5213 St John's Cemetery

Above Images from site audit to Site 3082 Cowpen Cemetery

- 5.181 The allocated scores reflect the quality of the infrastructure of the sites within the typology at one point in time. The importance of cemeteries and places to remember the dead and to allow people to sit and reflect and to grieve should not be underestimated, as such they need to be maintained and managed to an excellent standard.
- 5.182 Generally improvements to the infrastructure of sites within this typology would make significant differences to visitors though improved overall appearance, maintenance of benches and bins, and the provision of recycling or compost areas for visitors to dispose of flowers.

Accessibility

- 5.183 There is no appropriate accessibility standard for churchyards and cemeteries, although it is important to take into consideration the needs of the elderly or more infirm members of the local community and to consider access to public transport when planning new sites. It is also important to give consideration to travel distance and ensuring that sites can be easily accessible for local people.

Standards

- 5.184 No assessment has been undertaken to survey the adequacy of cemetery provision and availability of plots to meet demand. This is in keeping with other local authority PPG17 audits where research has shown that no reference is made to calculating future demand.
- 5.185 The quality of cemeteries is of paramount importance as they are places where people come to grieve and remember lost loved ones. In a caring society these sites should be maintained to the highest possible standards with provision of a well-cared for space which allows quiet contemplation.

Cemeteries and Churchyards Standards

Quantity

No quantitative standard set.

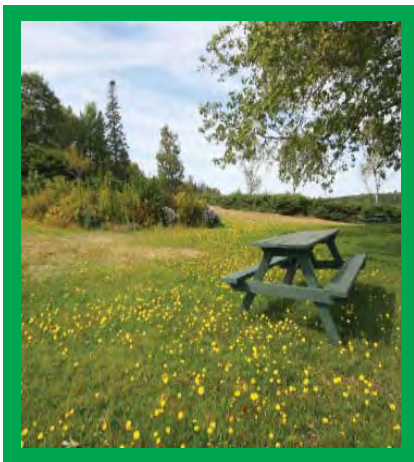

Quality

The proposed quality standard for Cemeteries and Churchyards is 76% or above for all Council managed and maintained sites as a mark of respect and comfort to people visiting the sites.

Accessibility

No accessibility standard set.

Section 6 - Resourcing Open Space

6 Resourcing Open Space

Introduction

- 6.1 Northumberland County Council has endeavoured whenever possible to invest in its open space provision. However it is increasingly becoming difficult to maintain sites, let alone enhance them through significant improvement. Improved revenue funding with increased capital support from central Government is currently unlikely and as such more creative financing methods such as partnerships and regeneration initiatives will be required to help continue to improve maintenance and greenspace improvements.

Revenue Funding

- 6.2 There is a need for the future management and improvement of the County's open spaces to follow a strategic framework. The range and diversity of open space provided across the County means that it is essential that resourcing and financial planning is put in place to deliver safe attractive open spaces.
- 6.3 A key issue is the fact that parks and open spaces generally have open access 24 hours a day, and as such face problems of vandalism, illegal tipping and abuse which are often difficult to predict and increasingly drain resources. Resources that could be best spent providing safer, cleaner, higher quality green space for local people.
- 6.4 It is important to note that following further consultation it will be necessary to assess the financial implications for each type of provision and utilise developer contributions wisely.

Capital Funding

- 6.5 The capital required to improve the infrastructure within the County's open spaces is not within the financial resources held by the Council, hence the need to maximise on the capital opportunities held outside by national governing bodies and Government agencies.
- 6.6 CAGE Space supports the idea of a strategic framework. In the CAGE manifesto they also identify that political support is essential, as is making the case for high quality open space both internally within the Council and externally with the national governing bodies, regional bodies, parish/town councils and partners.
- 6.7 In order for this study to be a success it is essential to secure 'Buy-in' across the Council. The Council should, therefore, continue the role of a Parks and Open Spaces Champion as a means of driving forward the open space agenda. This role is currently within the remit of the Council's Neighbourhood Services and Highways; and Infrastructure and Environment Portfolio Holders.
- 6.8 In order to deliver a vision for a network of good quality, accessible clean and safe open space across the County it is essential to seek financial support at the external and importantly internal level for future improvement to new and existing provision.
- 6.9 The development of partnership will be fundamental to the delivery of good quality open space. The County has already made positive steps through partnership working in open space through the establishment of community initiatives such as self management agreements with clubs and societies. This needs to be taken wider through the involvement of friends of parks and open space groups, local groups interested in driving forward improvements to their local spaces.
- 6.10 Partnership with the private sector can also bring the benefits and funding to improve the County's open spaces. The links with the existing franchises in the parks need to be expanded to rejuvenate day time and weekend use of the parks and open spaces and the associated facilities and driving out the undesirable elements and anti-social behaviour by packing the park with people.

- 6.11 For example, Oldham Council has transformed former redundant bowls pavilions into vibrant community focused cafés by working in partnership with local business enabling reinvestment in tired and redundant buildings, revitalising the bowling greens and bringing people into the parks.
- 6.12 Wholesale commercial sponsorship is very difficult to obtain when requested by the Council. However, working in partnership with third parties may prove more attractive to local, regional or nationally recognised commercial sector investors.

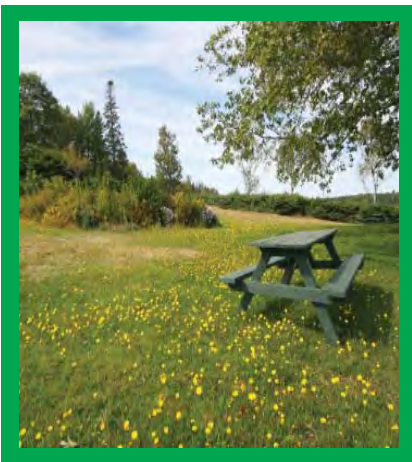

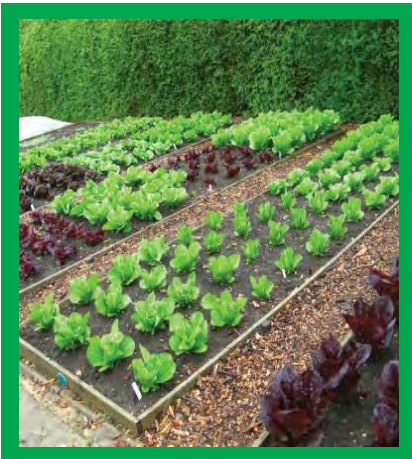

Developer Contributions

- 6.13 An essential part of the success will be the internal commitment and buy-in to initiatives such as Section 106 funding and developer contributions linked to the growth or regeneration aspirations for the County. Ensuring that appropriate revenue funding is in place to sustain capital investment in open space is a key long term management objective.
- 6.14 The research behind the PPG17 study provides the evidence with regards to the quantity, quality and accessibility to open space across the County. The evidence will support the development of the LDF, initially through the Core Strategy, but also subsequent more detailed documents, such as the Northumberland Delivery Development Plan Document and/or Supplementary Planning Documents. The evidence will also be used to assist in negotiations with developers on the provision of open space, sport and recreation.
- 6.15 This study provides the evidence that will enable the County Council to move to the next stage and prioritise the need for investment through wider community consultation and stakeholder consultation at a local level.
- 6.16 When considering the implementation of planning policy that entails on or off-site developer contributions, it is worthwhile reviewing how other authorities determine when provision should be on or off-site.
- 6.17 Outlined below are examples of other local authority guidance:
- **Fareham Borough Council** - the Council favour on-site contribution, it is dependent upon a number of factors that include the size of the development site and if the site is in close proximity to existing good quality provision. The Council guidance also includes a matrix to identify when on/off-site contributions are appropriate in accordance with the number of dwellings and provision type.
 - **Stockport MBC** - the Council seek commuted sum payments for small scale developments, with the funds being held in an investment/interest earning account to accrue funds to enable improvements.
 - **Harrogate Borough Council** – The Council seek provision on site whenever possible, if provision falls below a specified size the Council seek off site contributions.
 - **Worcester City Council**- shortfalls in provision not accommodated on site are met through commuted sum payments that are then allocated and spent on identified projects.
- 6.18 Maintenance sums are also an important consideration when dealing with developer contributions. Research of other Council's has revealed that this varies significantly across local authorities:
- **Fareham Borough Council** – maintenance payments to the Council 12 months after a site or provision is transferred to the Council. Maintenance is calculated on the number of bed spaces the type of provision and is updated annually.
 - **Stockport MBC** – Maintenance payments to the Council 12 months after handover, maintenance sums are calculated using current rates with a multiplier and are for 15 years.

- **Harrogate Borough Council** - the Council revise the maintenance payments required on an annual basis by adding 10% contingencies to the annual cost and multiplying by the number of years, maintenance is normally required for 5 years.
- 6.19 The PPG17 guidance identifies that the simplest way to express the requirements for future maintenance is to express it in terms of a sum per unit of provision such as £/hectare or £/sqm.
- 6.20 The general approach, which has been the norm for many local authorities, has been to multiply the typical cost of annually maintaining a facility by an agreed number of years. The guidance advocates that a fair way to negotiate with developers is to calculate the net present value of the anticipated revenue payments. The commuted sum payment is then based on:
- **The estimated cost of annual maintenance - this needs to be established not so much on the current cost of maintenance but after consideration as to whether the current level of maintenance is adequate to maintain the provision to the standards required. This removes the opportunity to under price the commuted sum payment and transfer historic budgetary constraints or budget reductions onto new provision.**
 - **It is good practice to work to a more appropriate cost with an assumed rate of inflation.**
 - **An agreed time period for which payment is to cover (research undertaken as part of this strategy has shown that the time period expected varies from 5-25 years).**
- 6.21 The Council should continue to ensure that developers with permission for new developments make contributions towards the capital expenditure that is initially required to provide and enhance provision (i.e. capital contribution), whilst also contributing to the ongoing revenue cost of maintaining the provision (i.e. revenue contribution).
- 6.22 The contribution from developers should be based on single bed spaces rather than housing units as this will ensure the cost reflects the increase in demand and use created by new development on existing facilities.
- 6.23 The Council should use the audit findings as a means of identifying where provision and quality improvements require further investment.
- 6.24 Analysis of existing guidance on open space leads to the conclusion that:
- **The Council should establish and set standards for the different types (typologies) of provision;**
 - **The Council should ensure that all new housing development contributes to open space provision, this includes development of single dwellings;**
 - **The Council should consider producing an SPD, which should contain a list of priority projects and wherever possible contain costing details which can be annually updated. The initial priorities should be linked to priorities identified in the PPG17 assessment and encompass priority projects from the Playing Pitch Strategy.**
- 6.25 The Council, through planning policy, should ensure that the adopted standards demonstrate the principles of Best Value and the requirement to consult local people and communities. It will ensure that local people have access to a network of good quality facilities within their local area.
- 6.26 The Council should maintain a countywide open space fund (pooled fund), especially for the areas within the County boundaries where there is limited development opportunity, or where developments are small in size and do not generate a contribution that is large enough for improvements, yet the development will still incur additional demand on existing facilities.

- 6.27 This would be established to ensure contributions are always sought and create the means whereby funds could be used to enhance and improve existing provision or provide new provision to address deficiencies and need.
- 6.28 The improvements that can be made to open spaces should be detailed within the SPD, which could relate to improvements to access to facilities. It has to be recognised that the exact improvements to provision may not have been identified at the outset and it may therefore be more appropriate to use the Neighbourhood Management Area level as the area to ring-fence funding.
- 6.29 The principle of the pooled fund would be to create a source of funding that could be utilised in a planned way to secure additional investment into green space. This would be either by using monies direct from the fund to undertake improvements or as a source of matched funding to secure greater levels of external investment. One of the valuable assets available to the County is land, some of which is not used to its maximum capacity.
- 6.30 The Council is naturally reluctant to release open space for disposal, however the benefits of reinvesting a substantial part of the proceeds from any sale are considerable and at present there are no real alternatives available to close the funding gap. A number of City Councils such as Bristol and Leeds are going down this route to enable them to improve the green space to a standard fit for local people.
- 6.31 It is clear from the audit and assessment that the Council has to focus on improving the quality and accessibility to good quality open space facilities. As such, the acquisition of more land as a result of planning gain through development has to be appropriately resourced not just to keep sites ticking over but to contribute as an asset. Therefore, the Council should only consider the option of adopting more land as a last resort. The focus from developer contributions should be to secure appropriate levels of funding to ensure sites and facilities are improved.

Section 7 - Setting Provision Standards

7 Setting Provision Standards

- 7.1 This section examines the development of local standards for each typology. The study covers all open space, sport and recreational provision across the County. It is important to note that the assessment has focussed on accessible greenspace provided in and around urban and rural settlements; standards are set only for the typologies listed in Figure 3.1. GIS mapping has been utilised to illustrate a number of key aspects (Appendix 4).
- 7.2 Standards of provision have been derived for Northumberland on the basis of:
- **Consultation with local residents**
 - **Consultation with specific user groups**
 - **Consultation with key providers**
 - **Consultation with key stakeholders**
- 7.3 Local residents were asked a range of questions regarding current open space, sport and recreation provision with relation to quantity, quality and accessibility. The consultation and survey findings also reveal the local communities' perception of accessibility, quantity and quality of provision. The distance thresholds have been calculated for each typology responses from consultation.
- 7.4 PPG17 advocates the development of standards for all the major typologies of provision. The total amount of open space by typology has been measured as part of this audit of provision. The assessment of quantity has been undertaken on the basis of:
- **A review of the number of sites and size of provision, in relation to local population**
 - **The identification of a site typology based on the 'primary purpose' of each site**

Summary of Standards

- 7.5 In developing standards PPG17 guidance is very much focussed on setting achievable standards of provision in terms of quantity, quality and accessibility. It is very much about ensuring there is enough good quality readily accessible provision at the local, neighbourhood and area based level. Unlike Green Infrastructure Strategy which is concerned with ensuring provision is protected, connected and recognised for its multi functional purpose across the above levels and at the sub regional level.
- 7.6 Outlined below are a summary of the proposed quantity, quality and accessibility standards that have been set for open space, sport and recreation across the County.

Figure 7.1 : Summary of Standards

Typology	Quantity	Quality	Accessibility
Parks and Gardens	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 2.14 ha per 1,000 population</p> <p>Area analysis: surplus in the North and South East, deficiency in the West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 57% and to deliver all parks and gardens to a standard of good quality (61%)</p> <p>To achieve and maintain Green Flag status in 3 parks across the County (one in each neighbourhood area)</p> <p>All Country Parks to achieve Country Park Accreditation and a quality rating of 76% (Excellent)</p>	<p><u>Standard</u></p> <p>To provide access to good quality parks and gardens and for all households in the County to be within 1,000m or 12 minutes travel time</p>
Natural and Semi-Natural Greenspace	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 7.55 ha per 1,000 population</p> <p>Area analysis: surplus in the North, deficiency in the South East and West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 48% (current Countywide open space average) and to deliver all Local Nature Reserves to a minimum quality rating of 61% (good)</p>	<p><u>Standard</u></p> <p>To provide natural & semi-natural greenspace within 1,200m or 15 minutes travel time of where people live</p>
Amenity Greenspace	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 1.09 ha per 1,000 population</p> <p>Area analysis: surplus in the North and South East, deficiency in the West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 48%. This includes ensuring facilities and infrastructure are 'fit for purpose'</p>	<p><u>Standard</u></p> <p>To provide amenity greenspace within 600m or 8 minutes travel time of where people live</p>

Typology	Quantity	Quality	Accessibility
Outdoor Sports Facilities	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 1.69 ha per 1,000 population</p> <p>Area analysis: Surplus in the North and West, deficiency in the South East</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61% (good quality).</p>	<p><u>Standard</u></p> <p>To provide outdoor sports facilities within 1,200m or 15 minutes travel time of where people live</p>
Provision for Children & Young People	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 0.50 ha per 1,000 children's population (aged 0-15 years)</p> <p>Area analysis: Surplus in the North and West, deficiency in the South East</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61% and to ensure all fixed play design considers the play value of the provision as the key driver</p>	<p><u>Standard</u></p> <p>To provide fixed play provision within 800m or 10 minutes travel time of where people live</p>
Allotments	<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 0.51 ha per 1,000 population</p> <p>Area analysis: Surplus in the South East, deficiency in the North and West</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61%. This includes ensuring facilities and infrastructure are 'fit for purpose'</p>	<p><u>Standard</u></p> <p>To provide an accessible allotment plot within 800m or 10 minutes of where people live</p>
Cemeteries & Churchyards	<p><u>Standard</u></p> <p>No quantitative standard set</p>	<p><u>Standard</u></p> <p>All Council managed and maintained sites to achieve a quality score of 76% or above.</p>	<p><u>Standard</u></p> <p>No accessibility standard set</p>

Parks & Gardens

- 7.7 Parks and gardens are an integral part of the County's open space infrastructure. They provide a sense of place for the local community and provide landscape quality to particular urban areas. The County provides 63 accessible parks and garden sites covering 666.08 hectares and therefore an overall provision of 2.14 ha per 1,000 population. The recommended minimum standards are:

Figure 7.2 : Standards for Parks & Gardens

Quantity	Quality	Accessibility
<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 2.14 ha per 1,000 population</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 57% and to deliver all parks and gardens to a standard of good quality (61%)</p> <p>To achieve and maintain Green Flag status in 3 parks across the County (one in each neighbourhood area)</p> <p>All Country Parks to achieve Country Park Accreditation and a quality rating of 76% (Excellent)</p>	<p><u>Standard</u></p> <p>To provide access to good quality parks and gardens and for all households in the County to be within 1,000m or 12 minutes travel time</p>

- 7.8 There are no existing national standards related specifically to parks and gardens and there are no specific guidance policies within the existing planning framework other than the adoption of the former District Council PPG17 findings where completed. There is a need for a County wide standard that will act as a guide for the future. As such the current provision has been set as the minimum standard for future provision.

Quantity

- 7.9 Quantity standards are based on current levels of provision and if the application of the County wide provision per 1,000 is applied then
- **North Area also has a surplus of 17.56 ha.**
 - **South East Area has the greatest quantity surplus of parks with over 64 ha identified.**
 - **West Area has a deficiency of 81.67 ha of park and garden provision.**
- 7.10 The audit and the consultation has identified the importance and significance of parks and gardens in the County. It is important that the standards of provision reflect the existing and continued significance in the future.
- 7.11 It is important to note that the public perception of parks and gardens and outdoor sports spaces may be seen to be the same thing especially in the more rural areas where recreation grounds tend to serve the same purpose as a park.

- 7.12 Across Northumberland a considerable number of recreation ground sites have been classed as parks and gardens and people often refer to them as being their 'Local Park' As such in applying the standards for parks and gardens they do need to be considered in parallel with standards identified for outdoor sport.
- 7.13 To illustrate this point the current standard set for parks and gardens shows the South East Area to be deficient of outdoor sports provision by 71 ha and to have a surplus of parks of 64 ha. If the standards are treated in isolation then it may be concluded that there is a need for more provision or more negatively that there may be an opportunity for disposal.
- 7.14 PPG17 is not about the disposal of surplus provision it is geared to ensure that local people have equal access to a range of good quality provision regardless of where they live.

Quality

- 7.15 The Council currently has 3 parks that it manages that have achieved the National Quality Standard Green Flag Award. The parks are Hexham Parks, Hirst Park and Carlisle Park. Less than 5% of the County's park provision has achieved the Green Flag Award.
- 7.16 The audit as identified that a considerable amount has been done to drive up the quality of parks and gardens and from consultation with stakeholders it is evident that much is ongoing through a partnership approach with organisations such as Northumberland Wildlife Trust, Groundwork North East, parish and town councils and local organisations to improve these important spaces.
- 7.17 The South East Area has the greatest variance in the quality of parks and gardens with a difference in the range of quality scores of 45% between the lowest and highest scoring site.
- 7.18 The average quality is recommended as the minimum quality threshold for the next two years with the view to raising the quality further to 61% thereafter. At present from the parks and gardens that have been audited
- **North Area - has 13 sites or 54% of the North's park and gardens fall below the County average**
 - **South East - 52% or 12 parks in the area fall below the County average**
 - **West Area - 38% of parks (5 sites) in the area fall below the County average**

Accessibility

- 7.19 Map 4a demonstrates the access standard for parks and gardens. The GIS analysis has identified that 64% or 94,560 residential households in the County are within the combined access catchments set for parks and gardens. Importantly 36% of households are not currently within the catchment area. It is important to recognise that people will undoubtedly make use of the open space nearest to where they live and that may not be a site classified as a park or garden and this needs to be considered with outdoor sports provision.

Natural and Semi-Natural Greenspace

- 7.20 It is widely understood that sites of a natural or semi-natural nature that are accessible enhance the quality of life for people. The wildlife and biodiversity benefits that these sites also contribute are often neglected. Biodiversity is important to the quality of the air that people breathe, to the richness in variety of species in an area and as an indicator of the health and quality of a local environment. These areas not only have benefits in terms of biodiversity, they can also be valuable to local economies and as a tourist asset.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

7.21 Northumberland has 261 sites classified as natural and semi-natural greenspace covering 2346.42 hectares and providing an overall standard of 7.55 ha per 1,000 population.

7.22 The recommended minimum standards are:

Figure 7.3 : Standards for Natural and Semi-natural Greenspace

Quantity	Quality	Accessibility
<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 7.55 ha per 1,000 population</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 48% (current Countywide open space average) and to deliver all Local Nature Reserves to a minimum quality rating of 61% (good)</p>	<p><u>Standard</u></p> <p>To provide natural & semi-natural greenspace within 1,200m or 15 minutes travel time of where people live</p>

Quantity

7.23 Quantity standards are based on current levels of provision and if the application of the County wide provision per 1,000 is applied then

- **North Area also has a surplus of 338.16 ha.**
- **South East Area has a slight deficiency of 7.44 ha identified.**
- **West Area has a deficiency of 330.72 ha of natural and semi natural greenspace provision.**

7.24 The existing average provision of accessible natural and semi natural greenspace needs to be applied in the absence of any other guidance or provision policy. The average of 7.55 ha per 1,000 population is by far the largest provision standard and reflects the significant importance placed on this type of provision. It reflects the major land restoration that has taken place to the former coalfields in an attempt to provide people with an attractive place to live.

7.25 The standards reflect the larger sites managed and maintained specifically to provide local people with access to nature and to primarily provide important habitat to local wildlife and to contribute at the local level to the biodiversity value.

7.26 It is important to note that there are habitats and naturalistic areas within other typologies such as parks and gardens where there may be a woodland or a wildflower area. These may have been created to add landscape value or biodiversity interest to a park or amenity site or to provide screening and landscaping to large outdoor sports sites.

7.27 PPG17 is not about the disposal of surplus provision it is geared to ensure that local people have equal access to a range of good quality provision regardless of where they live.

Quality

7.28 The audit as identified that work has been ongoing in terms of improving these resources. More recently to realise the potential from a Green Infrastructure perspective in terms of greater connectivity of space, improved accessibility and enhanced wildlife, bio-diversity value.

- 7.29 From consultation with stakeholders it is evident that much is ongoing through a partnership approach with organisations such as Northumberland Wildlife Trust, Groundwork North East and local organisations to improve these important spaces.
- 7.30 The audit has revealed that these site in terms of quality have the greatest range (5% - 87%) or variance (82%) in quality from the lowest scoring to the highest rated sites.
- 7.31 The average quality is recommended as the minimum quality threshold for the next two years with the view to raising the quality further. At present from the natural and semi natural greenspace sites that have been audited.
- **North Area - has 69 sites or 69% that fall below the County average quality for natural and semi-natural greenspace**
 - **South East - 20 or 65% fall below the County average for natural and semi natural greenspace**
 - **West Area - 21 or 75% in the area that fall below the County average for natural and semi-natural greenspace**

Accessibility

- 7.32 Map 4b demonstrates the access standard for natural and semi-natural greenspace based on local travel times identified through the public consultation.
- 7.33 The GIS analysis has identified that 83% or 122,250 residential households in the County are within the combined access catchments set. 17% of households are not currently within the catchment area and it is important to note that other provision may meet this accessibility deficiency.
- 7.34 It is important to note that the standards above are for sites that have been classed as natural or semi natural in and around settlements. It does not include the natural sites such as the extensive open moorland, forestry plantation or coast and beaches, or the extensive rights of way network.

Amenity Greenspace

- 7.35 There is no national guidance to suggest the level and extent of provision for amenity greenspace. The former National Playing Fields Association as part of its Six Acre Standard suggests that provision of informal casual playing spaces should be provided within housing development to a provision of 0.5 ha.
- 7.36 The County's amenity greenspaces provide a number of functions mainly in residential areas enabling local people to take part in recreation close to home. From the consultation it is the provision that people use most regularly.
- 7.37 The County has 385 sites that have been classified as amenity greenspace these sites occupy 339.24 ha and provide the County with a provision of 1.09 ha per 1,000 population.

- 7.38 This is a reflection of these sites having a tendency to be small but with lots of provision scattered in and amongst residential areas. The recommended minimum standards are:

Figure 7.4 : Standards for Amenity Greenspace

Quantity	Quality	Accessibility
<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 1.09 ha per 1,000 population</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 48%. This includes ensuring facilities and infrastructure are 'fit for purpose'</p>	<p><u>Standard</u></p> <p>To provide amenity greenspace within 600m or 8 minutes travel time of where people live</p>

- 7.39 Quantity standards are based on current levels of provision and if the application of the countywide provision of 1.09 ha per 1,000 is applied then

- **North Area also has a surplus of 10.47 ha.**
- **South East Area has a surplus of 45.20 ha identified.**
- **West Area has a deficiency of 55.67 ha of amenity greenspace provision.**

- 7.40 The existing average provision of amenity greenspace needs to be applied in the absence of any other guidance or provision policy. However the provision of this type of space in amongst housing needs to be useful space and it needs to be big enough to cater for informal recreation. As such it needs to be consolidated as a useable space that does not lead to conflict with neighbours whilst also being well designed, planned and managed. It makes an important contribution to local areas and to ensuring local people have sufficient space to meet the needs of their community.

Quality

- 7.41 The sites are often the gateways into local community areas and they form an important part of the wider green network. The Countywide average rating is 48% across all amenity greenspace this should be used as the minimum quality threshold.

- 7.42 The average quality is recommended as the minimum quality threshold for the next two years with the view to raising the quality further. At present from the natural and semi natural greenspace sites that have been audited.

- **North Area - has 44 sites or 27% that fall below the County average quality for amenity greenspace**
- **South East - 70 or 38% fall below the County average for amenity greenspace**
- **West Area - 17 or 45% in the area that fall below the County average for amenity greenspace**

- 7.43 One of the fundamental failings in the provision of amenity greenspace at a national level is the lack of any identification as to who owns and manages the site and who to contact if there is an issue or problem. This does not mean that every amenity site should have a large sign or information board, as this would often be out of scale and cost prohibitive. What could be achieved is a simple disc similar to those used on the rights of way network.

- 7.44 This could contain the site name, plot number and contact number for who manages the site. This could work in a similar way to the numbering on the street lighting columns which serve to let people know which light is faulty or out.

Accessibility

- 7.45 Map 4c demonstrates the access standard for amenity greenspace based on local travel times identified through the public consultation. The GIS analysis has identified that 78% or 115,838 residential households in the County are within the combined access catchments set. 22% of households are not currently within the catchment area and it is important to note that other provision may meet this accessibility deficiency
- 7.46 It is important to note that the standards above are for sites that have been classed as amenity greenspace in and around settlements. It does not include the roadside verges or spaces smaller than 0.1 ha that are scattered through residential areas.

Outdoor Sports Facilities

- 7.47 This section considers the wide range of outdoor sports provision across the County. It includes specific sites developed to promote sport and recreation these are sites designated as formal outdoor sports facilities. It is also recognised that sites within other typologies also provide sport facilities within the site e.g. a park with a pitch or bowling green.
- 7.48 It is important to note that Golf Courses have not been included in the quantity standards as they tend to be large sites and would seriously skew quantity standards especially as they tend to be restricted in terms of accessibility and it is unlikely that planning policy would require a developer to provide a new golf course as a result of new development. Further details regarding the provision of grass pitches have been developed within the separate Playing Pitch Strategy a summary of standards is provided below.
- 7.49 The audit has identified 202 accessible sites that have been classified as outdoor sport these occupy 526.80 ha and provide 1.69 ha per 1,000 population. The recommended minimum standards are:

Figure 7.5 : Standards for Outdoor Sports Facilities

Quantity	Quality	Accessibility
<u>Standard</u> To ensure provision does not fall below the current level of 1.69 ha per 1,000 population	<u>Standard</u> To achieve a minimum standard of 61% (good quality).	<u>Standard</u> To provide outdoor sports facilities within 1,200m or 15 minutes travel time of where people live

- 7.50 Quantity standards are based on current levels of provision and if the application of the countywide provision of 1.69 ha per 1,000 is applied then
- **North Area also has a surplus of 40.88 ha.**
 - **South East Area has a deficiency of 70.98 ha identified.**
 - **West Area has a surplus of 30.10 ha of outdoor sport provision.**

- 7.51 The only former guidance in relation to setting standards for outdoor sport came from The NPFA 6 Acre standard. The 6 acre standard set a requirement of 1.60 - 1.80 ha of outdoor sport space per 1000 head of population and as the overall quantity standard shows the County currently has a provision that meets this former national recommendation. At the area level both the north area and west area have a provision in excess of the 1.60 ha per 1000. The south east falls short with a provision of 1.21 ha per 1,000.
- 7.52 The provision included as outdoor sports includes those sites that are specifically provided for the pursuit of sport (football, cricket, rugby, hockey, tennis and bowls). It includes those recreation grounds that only have provision for sport. It is important to realise that sports facilities exist within other typologies such as pitches or bowling greens and courts in parks. Many of these facilities prove to be multifunctional being used for sport at weekends and events or activities on other days. It is important therefore that provision of outdoor sport is considered side by side with parks and gardens provision as identified earlier.
- 7.53 A more detailed Playing Pitch Strategy has been developed to sit alongside this PPG17 assessment. The Playing Pitch Strategy goes into great detail on the supply and demand for pitches based on local need/ demand. It identifies by sport and by neighbourhood area where the current surplus of pitches by type and age provision are. It details where future need will be based on extensive club consultation that includes predicted club growth.
- 7.54 The standard for outdoor sport should only be considered as the starting point and the Playing Pitch Strategy should be used to guide future demand of pitch based sports.

Quality

- 7.55 The sites are often the gateways into local community areas and they form an important part of the wider green network.
- 7.56 Owing to the fact that good quality outdoor sports provision can contribute to so many social agendas and due to the fact that local people have to pay to make use of the facilities it is only right that the quality of these sites as the norm are seen to be good. Therefore the quality standard has been set at 61% and the view is that all outdoor sport provision should be brought up to that standard.
- **North Area - has 41 sites or 47% that fall below the County average quality for outdoor sport**
 - **South East - 35 sites or 57% that fall below the County average**
 - **West Area - 29 sites or 54% in the area that fall below the County average for outdoor sport**
- 7.57 The county has a wide range of outdoor sports facilities that vary from single pitch sites with no changing facilities to large multi pitch sites to single club sites run by local teams with little or no input from the Council. As a focus for improvement the Council needs to in the first instance focus on the larger multi-purpose sites that serve the widest audience. These should be the hub for outdoor sport with the single club single pitch sites serving as spokes to feed into the wider sports development agenda.

Accessibility

- 7.58 Map 4d demonstrates the access standard for outdoor sport based on local travel times identified through the public consultation. The GIS analysis has identified that 84% or 124,746 residential households in the County are within the combined access catchments set. 16% of households are not currently within the catchment area and it is important to note that other provision especially parks may meet this accessibility deficiency.

- 7.59 It is important to note that a number of schools across the county have sports facilities that have no community use. In the areas where there is a deficiency of outdoor sport and if sports provision on other sites, such as parks, fails to meet demand then the Council needs to work in partnership with the schools to secure community use where possible.
- 7.60 Developer contributions should be sought to improve existing facilities. By improving quality this will improve carrying capacity through enhanced maintenance, improved drainage and upgraded multi use changing facilities that allow adults and children, male and female use.

Provision for Children and Young People

- 7.61 For the purposes of developing this study provision for children and young people has concentrated the research on the fixed play provision within the County and consists of equipped play areas and other specialist provision such as multi use games areas and wheeled play provision or skate parks.
- 7.62 The provision facilities for children and young people are important in facilitating opportunities for physical activity and the development of movement and social skills. As such the results for quality audit for play provision are often much lower than expected as the audit considers not only the physical condition of the equipment, it also considers the range and play value and measures them against models that are considered best practice in terms of play provision
- 7.63 The audit and assessment examines space designated for children's play, but recognises that children play in a wide variety of other spaces as well.
- 7.64 The former National Playing Fields Association (NPFA), now Fields in Trust (FIT) 6 acre standard has long been an influence over the provision of fixed play provision for children and young people. The recommended standards have been applied on a widespread basis by local authorities regardless of the condition, accessibility or quality of existing fixed play provision.
- 7.65 This has resulted in a proliferation of play areas that have been installed and that are not suited to the age of the children that live nearby, i.e. developers have provided a toddler's play area in a residential area where the majority of children are junior age or above. The play areas often come with a limited life and inappropriate future maintenance funding with little concession if any to future repair or replacement, thereby proving difficult to maintain and keep to a good quality safe standard.
- 7.66 The former NPFA Guidance also failed to provide for the needs of teenagers and the consultation reiterates this concern. The provision for teenagers has been a concern that the former District Councils had started to tackle.
- 7.67 The audit undertaken has revealed that there are 224 sites that have provision for children and young people, occupying 26.90 hectares. The recommended minimum standards are listed in Figure 7.6.

Figure 7.6 : Standards for Provision for Children & Young People

Quantity	Quality	Accessibility
<u>Standard</u> To ensure provision does not fall below the current level of 0.50 ha per 1,000 children's population (aged 0-15 years)	<u>Standard</u> To achieve a minimum standard of 61% and to ensure all fixed play design considers the play value of the provision as the key driver	<u>Standard</u> To provide fixed play provision within 800m or 10 minutes travel time of where people live

- 7.68 Quantity standards are based on current levels of provision and if the application of the County wide provision of 0.50 ha per 1000 is applied then
- **North Area also has a surplus of 1.23 ha.**
 - **South East Area has a deficiency of -4.26 ha identified.**
 - **West Area has a surplus of 3.03 ha.**
- 7.69 The provision is split between sites that are specifically provided for children and young people (i.e. stand alone play areas) and provision within other typologies e.g. parks. The total number of play areas classified as 'stand-alone sites' is 116, with the remaining 108 play areas located on sites classified within other typologies.
- 7.70 The more rural neighbourhood management areas of the north and west have a greater number of standalone sites; this is possibly a result of some of the more rural settlements having little provision other than a play area for children. In the more urban south east area the reverse is the case with the greatest number of facilities being provided within other typologies such as parks or amenity greenspaces.
- 7.71 In light of the provision for teenagers needing to be addressed the County, Town and Parish Councils have made inroads into the teenage provision with:
- **37 MUGAs (multi-use games areas)**
 - **15 skate parks**
 - **4 BMX tracks**
- 7.72 Unfortunately it has not been possible to undertake more detailed analysis with regards to the older age groups of 16 -19 year olds as the population data regarding these age groups has not been available. As a result the standard of 0.5 ha should only be used to calculate provision for 0-15 year olds.
- 7.73 Throughout Northumberland there is 0.50 hectares of provision per 1,000 population of children and young people
- **North area has the most number of play sites with 81 sites in total**
 - **South East area has the least provision per 1,000 population with 0.34 ha / 1,000 population**
 - **West area has the most provision with 0.74 ha / 1,000 population**
- 7.74 It must be noted that the quality and accessibility of provision is more important than the amount of provision, given the small amount of area the sites generally cover
- 7.75 What is needed is bigger more multifunctional sites that offer risk and adventure and the council need to move away from the more generic style play areas that contain swings and roundabouts with little or limited play value. In dealing with developers the Council should move away from play areas that fall into the LAP Standard advocated by the former NPFA.

Quality

- 7.76 These sites are often instrumental in children and young people's early year development. As such it is essential that they are stimulating, fun, safe and provide the means to capture a child's imagination.
- 7.77 It is important that these sites offer variety, play value, an element of risk as well as a stimulating and pleasant environment.

7.78 The average rating of sites across the County is 32% - this rates as 'below average'

- **Overall scores range from 3% (very poor) to 84% (excellent)**
- **Play sites in the South East on average rated better than those in the North or West**
- **North Area play sites rated an average score of 27%**
- **South East Area play sites rated an average score of 40%**
- **West Area play sites rated an average score of 28%**

7.79 There is a real need to improve the quality of fixed play provision for children and young people across the County. The County need to refocus its provision and to reduce the number of sites with single pieces of equipment in favour of more multifunctional adventurous play areas that do not necessarily have fixed play equipment but offer different challenges to stimulate children and young people.

Accessibility

7.80 The GIS analysis has identified that 81% or 120,198 residential households in the County are within the combined access catchments set. 19% of households are not currently within the catchment.

7.81 This needs to be considered further and it is suggested that the accessibility standards should be revisited following consultation with the people these sites are meant to serve, namely children and young people.

7.82 There needs to be a clear understanding of the demand for this type of provision and the type of provision needed by children and young people.

Allotments

7.83 This section considers the provision of all allotments across the County. The accessibility of open space varies greatly dependent upon the type of provision, and it is by their very nature that allotments are only accessible with restrictions in that you must be a tenant or plot holder. Allotments provide a key type of provision within the overall portfolio of open space, sport and recreation facilities.

7.84 From the consultation undertaken, the value of allotments is significant, providing facilities for physical activity in addition to the promotion of healthy eating and educational value. The provision of allotments is a statutory function for local authorities under a number of legislative acts including the 1950 Allotment Act.

7.85 Despite the 1950 Act there are no existing national standards that specifically relate to allotments. The only real guidance has been in relation to the promotion of allotments and the factors that need due consideration when considering allotment disposal, this was provided through the Local Government Association.

7.86 The audit undertaken has revealed that there are 126 sites with occupying 160.07 ha plots, and providing 0.51 ha per 1,000 population.

7.87 There is a need to establish the number of plots provided on allotments and to measure this against the waiting list in order to establish the current and future demand. Unfortunately this information has not been available during the development of this strategy, the Council hold very little information in relation to allotments and the supply of plots or individual site waiting lists.

7.88 The following recommended minimum standards are very much recommended as an interim measure until further detail can be collated and analysed as part of an allotment strategy for the County :

Figure 7.7 : Standards for Allotments

Quantity	Quality	Accessibility
<p><u>Standard</u></p> <p>To ensure provision does not fall below the current level of 0.51 ha per 1,000 population</p>	<p><u>Standard</u></p> <p>To achieve a minimum standard of 61%. This includes ensuring facilities and infrastructure are 'fit for purpose'</p>	<p><u>Standard</u></p> <p>To provide an accessible allotment plot within 800m or 10 minutes of where people live</p>

- 7.89 The sites are often the gateways into local community areas and they form an important part of the wider green network.
- 7.90 The Countywide average rating is 36% across all allotments where access was obtained during the audit. This falls way short of a rating of good which should be the minimum the Council aspires to deliver especially when people pay for a plot.
- 7.91 Owing to the fact that good quality allotment provision can contribute to so many social agendas and due to the fact that local people have to pay to make use of the facilities it is only right that the quality of these sites as the norm are seen to be good. Therefore the quality standard has been set at 61% and the view is that all Allotment provision should be brought up to that standard.
- 7.92 This will be a tall task for the council to achieve as only 5 sites out of 105 that were audited achieved 61% or above. Especially as in recent times the demand for allotments has increased significantly.
- 7.93 It would be advisable for the Council to research the allotments as a separate strategy to this assessment. This would be advisable because at present the Council has no evidence to justify or counteract the sale or disposal of allotment provision and as such could be open to criticism. Other studies have set a quantity standard in the region of 1ha per 1,000.
- 7.94 Finally, there is an increasing interest in local food production, reduced food miles, local composting, recycling and development of community gardens.

Cemeteries & Churchyards

- 7.95 Cemeteries can provide a valuable contribution to the portfolio of open space provision within an area. For many, they can provide a place for quiet contemplation in addition to their primary purpose as a final resting place.
- 7.96 They often have wildlife conservation and bio-diversity value. In the context of this study, it is important to acknowledge that cemeteries are not created with the intention of providing informal or passive recreation opportunities.

- 7.97 There are 128 sites identified as cemeteries equating to 125.42 hectares of provision across the County. The recommended minimum standards are:

Figure 7.8 : Standards for Cemeteries & Churchyards

Quantity	Quality	Accessibility
<u>Standard</u> No quantitative standard set	<u>Standard</u> All Council managed and maintained sites to achieve a quality score of 76% or above.	<u>Standard</u> No accessibility standard set

- 7.98 These sites are primarily for the burial of the dead and areas for contemplation for the loss of loved ones, family and friends. It is essential therefore that these sites are maintained to high quality as a mark of respect for the dead and as a comfort and reassurance to family and friends.

Natural England - Nature Nearby ANGst Standard Assessment

- 7.99 Accessibility analysis has been undertaken using two methods, firstly the average travel time identified from the consultation with local people (based on an average walking speed of 3 mph as recommended in PPG13 and in accordance with PPG17 Guidance) and secondly by application of accessibility thresholds based on a derivative of standards recommended by Natural England in their Nature Nearby ANGst Standard and by the Town and Country Planning Association (TCPA) Bio-diversity by Design Guidance
- 7.100 From a PPG17 perspective the ANGst model recommended standards that people living in towns and cities should have and as such is seen very much as the target the council and its partners will aspire to deliver:
- **That no person should be located more than 300m from their nearest area of natural greenspace of at least 2ha in size; (5 minutes walking distance)**
 - **Provision of at least 1ha of Local Nature Reserve per 1,000 population;**
 - **That there should be at least one accessible 20ha site within 2km from home;**
 - **That there should be one accessible 100ha site within 5km; and**
 - **That there should be one accessible 500ha site within 10km.**
- 7.101 The main emphasis of the ANGst model is that local people have easy access to natural and semi natural greenspace close to where they live. ANGst recognises that these sites are an important resource that provide local communities with the opportunity to get close to nature and biodiversity as part of an everyday experience and therefore plays a positive role in contributing to their health and well being.
- 7.102 To reflect the significant variance in the County four tiers of scale have been adopted and derived from the TCPA and Natural England advice these are
- **That no person should be located more than 300m from their nearest area of natural greenspace of at least 2ha in size; (5 minutes walking distance)**
 - **Provision of at least 1ha of Local Nature Reserve per 1,000 population;**

- That there should be at least one accessible 20ha site within 2km from home;
- That there should be one accessible 100ha site within 5km; and
- That there should be one accessible 500ha site within 10km.

- 7.103 PPG17 advocates that the ANGST model is an appropriate and generally accepted professional measure. However, it should be noted though that the model is very much a quantitative not qualitative measure that does not consider factors such as site quality, capacity or site fragility nor does it consider the role and function that the extensive linear Rights of Way network plays in the provision of accessible green infrastructure.
- 7.104 As part of the PPG17 local needs assessment a public consultation exercise was undertaken to identify public opinion on the use, quality, quantity and accessibility of the greenspace where they live. Local people were asked how and by what means they travel to the greenspaces they use.
- 7.105 Figure 7.9 indicates the response given as to the main method of transport used by residents to get to the different types of open space across the County. The figure shows that the main method of travel is walking to parks and gardens, amenity greenspace and provision for children and young people. Driving is the main method of travel to natural and semi natural greenspace and outdoor sports facilities. Possibly as a reflection of the remote nature of natural and semi natural sites or the need to carry kit to participate in outdoor sport. Public transport and cycling only accounted for between 0% and 3% within each typology.

Figure 7.9 : Type of Transport Used to Access Facilities and Open Space

Typology	Walk	Drive	Public Transport	Cycle
Public Parks and Gardens	55%	43%	1%	1%
Provision for Children and Young People	70%	28%	0%	2%
Amenity Greenspace	84%	14%	0%	2%
Outdoor Sports Facilities	40%	57%	1%	2%
Natural and Semi Natural Greenspace	35%	61%	1%	3%

- 7.106 Local residents were also asked to identify how long it took for them to travel to facilities in the County.

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

- 7.107 The results in Figure 7.10 indicate that most respondents rarely travel for more than 20 minutes to their nearest facility or open space.

Figure 7.10 : Travel Time to Nearest Facility or Open Space

Typology	Less Than 5 Mins	6-10 Mins	11-20 Mins	21-30 Mins	31-60 Mins	More Than 60 Mins
Parks and Gardens	26%	30%	22%	16%	5%	1%
Provision for Children and Young People	30%	34%	25%	7%	3%	1%
Amenity Greenspace	56%	22%	13%	7%	3%	0%
Outdoor Sports Facilities	17%	28%	32%	14%	8%	1%
Natural and Semi Natural Greenspace	17%	24%	27%	19%	9%	3%

- 7.108 Natural and semi-natural greenspace appear to be the open spaces and facilities which people take the most time to travel to. This is possibly a reflection of the more remote nature of many of these sites. Figure 7.10 further indicates the amount of time taken to travel to facilities but it does not include information provided by those people who did not know how long it takes them to travel.
- 7.109 Application of the ANGst standards and the defined thresholds associated with the size of site has shown that 89% of all households are within the defined catchments of a local open space.
- 7.110 Figure 7.11 shows the accessibility when applying the ANGst at the Neighbourhood Management Area level. The Figure shows that if accessible greenspace provided in and around urban and rural settlements is included within the defined thresholds then the South East has no deficiency in provision. The West area is the most deficient from an accessibility perspective with 30% of all households falling outside the catchment.
- 7.111 Using the sites contained within the PPG17 analysis means that the highest tier i.e. sites above 500ha and within 10km are not included within the calculation. There are sites and habitats that are over 500ha and these have been considered within the wider Green Infrastructure Strategy. Sites such as open moorland, beaches, extensive sand dune systems have been excluded from the PPG17 as explained earlier and due to their impact when setting a quantitative planning standard.

Figure 7.11 : Accessibility analysis using ANGst

Area	Number of households in Area	No. of households within 800m catchment	% of households within catchment area	% of households outside catchment area
North	45,396	38,912	86%	14%

Area	Number of households in Area	No. of households within 800m catchment	% of households <u>within</u> catchment area	% of households <u>outside</u> catchment area
South East	69,152	69,140	100%	0%
West	33,464	23,448	70%	30%
Total	148,012	131,500	89%	11%

Comparison with neighbouring local authorities

- 7.112 It is useful to gauge provision within the County against neighbouring local authorities, and as such the findings and standards from other PPG17 assessments or greenspace strategies provide a valuable point of comparison. Provision within the County has been compared with neighbouring local authorities where available. This benchmarking data has been used to compare both quantity and accessibility standards. These are shown in Table 7.12.
- 7.113 PPG17 advocates that local authorities should move away from the use of national provision standards in order to develop local standards that best fit the County and local need. The use of benchmarking with other local authorities is useful to ensure the people of Northumberland are provided with a good level of facilities and provision. From Table 7.12 it is evident that all of the proposed standards are within the range of open space standards from neighbouring Local Authorities.

Figure 7.12 : Quantity and Accessibility Standards Compared with neighbouring Local Authorities

Typology	Northumberland Proposed Quantity Standard (per 1,000 population)	Northumberland Proposed Access Standard	Comparison with other Local Authorities		
			Local Authority	Local Quantity Standard (per 1,000 population)	Local Access Standard
Parks and Gardens	2.14 ha	1,000 m	County Durham	0.77 ha	480 m
			Eden	0.11 ha	N/A
			Newcastle	1.20 ha	1,000 m / 1,500 m
			North Tyneside	N/A	900 m / 2,200 m
Natural and Semi-Natural Greenspace	7.55 ha	1,200 m	County Durham	12.17 ha	960 m
			Eden	N/A	N/A
			Newcastle	1.20 ha	600 m
			North Tyneside	N/A	300 m / 2,000 m
Amenity Greenspace	1.09 ha	600 m	County Durham	2.41 ha	480 m
			Eden	2.31 ha	N/A

			Comparison with other Local Authorities		
Typology	Northumberland Proposed Quantity Standard (per 1,000 population)	Northumberland Proposed Access Standard	Local Authority	Local Quantity Standard (per 1,000 population)	Local Access Standard
			Newcastle	1.20 ha	500 m
			North Tyneside	N/A	300 m
Outdoor Sports Facilities	1.69 ha	1,200 m	County Durham	1.13 ha	480 m
			Eden	1.15 ha	N/A
			Newcastle	1.10 ha	1,500 m
			North Tyneside	N/A	N/A
Provision for Children & Young People	0.50 ha per 1,000 children's population (aged 0-15 years)	800 m	County Durham	0.20 ha	450 m / 800 m
			Eden	N/A	N/A
			Newcastle	15m ² per dwelling	N/A
			North Tyneside	0.80 ha	N/A

Northumberland County Council

Open Space, Sport & Recreational Facilities – PPG17 Assessment

			Comparison with other Local Authorities		
Typology	Northumberland Proposed Quantity Standard (per 1,000 population)	Northumberland Proposed Access Standard	Local Authority	Local Quantity Standard (per 1,000 population)	Local Access Standard
Allotments	0.51 ha	800 m	County Durham	0.96 ha	480 m
			Eden	0.14 ha	N/A
			Newcastle	1 allotment plot for 5% of population aged 30-75yrs	1,000 m
			North Tyneside	N/A	N/A

Recommendations

7.114 A number of recommendations are made in relation to all sites and the assessment undertaken. These are concerned with the use of information gathered and the further development of the study in future years. The following recommendations are made:

- **The Council should continue the role of having a Parks and Open Spaces Champion, as a means of driving forward the open space agenda.**
- **Audit open space, sport and leisure facilities on a regular basis (every two/three years) and publish findings. This will allow trend data to be collated and improvements to be tracked. It is important that findings are published to enable wider stakeholders to track progress. This process should form part of the on-going relationship with Parish and Town Councils, whilst also recognising the Council's place based discharge and offer.**
- **Develop a central record of all open space, sport and leisure facilities (indoor and outdoor) to include the findings of the assessment undertaken. The central record should include access to GIS mapping.**
- **Address the current fragmented responsibilities for the management, development and future provision of open space across the County through the establishment of a consultative steering group. This should be undertaken within the remit of the Council's place based discharge and offer and involve representatives from leisure, planning, neighbourhood services, regeneration and Northumberland Association of Local Councils (NALC).**
- **Continue to develop the marketing information produced about open space, sport and recreation facilities available, key activities accommodated and access arrangements. The Council should seek to work with key partners in future marketing, such as the local Primary Care Trust (PCT), the wider voluntary sector, education, parish and town councils, Youth Service etc to ensure that open space fulfils a valuable role in meeting wider social objectives (e.g. health improvement, increased active participation).**
- **The Council should consider producing an SPD, which should ensure that developers with permission for new developments make contributions towards the capital expenditure that is initially required to provide and enhance provision (i.e. capital contribution), whilst also contributing to the ongoing revenue cost of maintaining the provision (i.e. revenue contribution). The contribution from developers should be based on single bed spaces rather than housing units as this will ensure the cost reflects the increase in demand and use created by new development on existing facilities.**

- The contribution from developers should be based on a County-wide open space fund (pooled fund), especially for the areas within the County boundaries where there is limited development opportunity, or where developments are small in size and do not generate a contribution that is large enough for improvements, yet the development will still incur additional demand on existing facilities. This would be established to ensure contributions are always sought and create the means whereby funds could be used to enhance and improve existing provision or provide new provision to address deficiencies and need.
- Develop an access standard regarding physical access for those users and potential users with a disability.
- Develop an allotment strategy in partnership with local councils to establish a full picture of the current supply and future demand for allotments in the County.
- Review maintenance standards for open space, and agree with local people any changes. Report on performance annually. It is important to set quality standards for each of the open space categories.
- Continue to work towards the reduction of the effects of crime and anti-social behaviour in parks and open spaces.

Recommendations for Future Planning

7.115 The Companion Guide suggests that planning policy needs to:

- Enhance or protect existing open spaces or sport and recreational facilities of value to the local community, the guidance stipulates that this needs to be the key driver that influences planning decisions regarding provision
- Ensure new provision fills identified deficiencies in existing provision
- Develop planning policy that clarifies the circumstances in which the authority may consider allowing the redevelopment of existing provision
- Set clear guidance on developer requirements for both onsite/ off site contributions complete with the methods for calculating any necessary future maintenance or establishment costs

- **Develop the principles for relocating necessary provision that is poorly located**

7.116 Strategic policies need to be set out in the Core Strategy and the standards should be explained within subsequent Local Development Plan documents such as the Northumberland Delivery Development Plan Document (DPD) or Supplementary Planning Documents (SPDs).

7.117 The following recommendations should be implemented for future planning:

- **Where appropriate, the findings and recommendations of this report should be incorporated in the updating and renewal of other Council plans and strategies.**

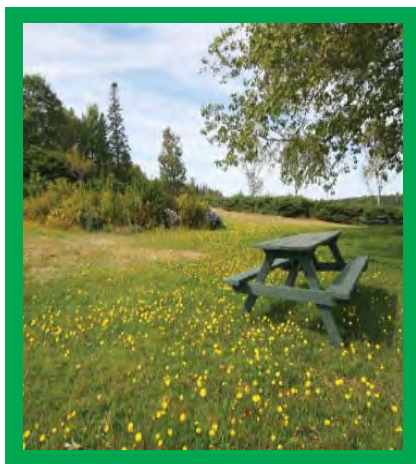

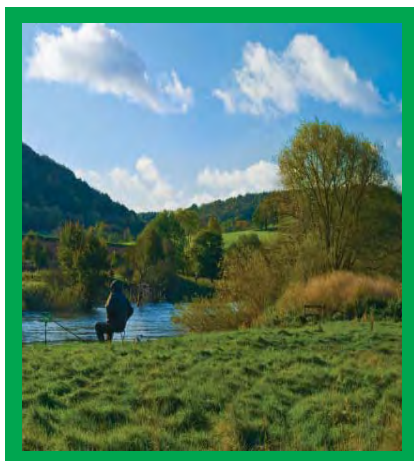

- **Planning documents linked to the evolving Local Development Framework should, where appropriate, include findings of this report.**

- **Consideration should be given to a Supplementary Planning Document (SPD) setting out standards of on-site open space provision or level of contribution towards off-site provision expected from developers.**

- **The Council should ensure that, in policy terms, a high quality of open space, sport and recreation provision is given appropriate weight so that it can be used to develop relevant management and maintenance regimes.**

- **Quality Standards (Appendix 3) should be implemented to new open spaces and sites identified for improvement.**

Appendix 2 - Strategic Context

APPENDIX 2 – STRATEGIC CONTEXT

- 2.1 In developing the study it is important to consider and recognise national and local planning policy and guidance. The relevant provisions are summarised below:

National Policy

Planning Policy Statements / Guidance (PPS/PPG)

- 2.2 National guidance seeks to ensure Local Authorities plan effectively for open space, sport and recreation by using a number of tools, including:
- **Assessments of needs and opportunities - Local Authorities are required to carry out open space assessments and to consult with local people to identify local needs;**
 - **Setting standards - National standards such as the National Playing Fields Association (NPFA) standards for outdoor sport and children's play will be replaced by local standards set in development plans that must include quality, quantity and accessibility and are based on local needs;**
 - **Maintaining an adequate supply of open space and sports and recreational facilities:**
 - Existing open space, sports and recreational buildings and land should not be built on unless the land can be shown as surplus to requirements (A key driver for PPG17 is not to dispose of sites, rather to ensure local people have access to a range of good quality provision)
 - High quality open spaces and those of particular value to communities should be protected through development plan policies;
 - Planning conditions or obligations can be used to enhance the quality of existing spaces or create new ones where an assessment recognises a deficit in provision of open spaces, sport or recreational facilities;
 - Local Authorities should also ensure that commercial and industrial developments do not just include landscaping, but also consider visitors' needs such as accessibility and safety and ensure the development has an element of open space provision;
 - Planning Obligation funding can also be used as investment in parks, open spaces and tourist areas to improve the quality and accessibility for local people;
 - That provision should be based on local need and the crux of the guidance is not to provide more of the same, rather improve and enhance what is already there.
- 2.3 When planning new open space and sports and recreational facilities, local authorities should:
- **Develop and locate intensive recreational uses where they can contribute to town centre vitality and viability;**
 - **Strive to avoid any significant loss of amenity to residents, neighbouring uses or biodiversity;**
 - **Aim to improve quality through good design;**
 - **Seek to promote accessibility by walking, cycling and public transport, and ensure that facilities are accessible for all;**
 - **Continue to add to and enhance the range and quality of existing facilities;**
 - **Seek to promote areas of open space in commercial and industrial areas;**

APPENDIX 2 – STRATEGIC CONTEXT

- **Consider using any surplus land for open space, sport or recreational use, weighing this against alternative uses;**
- **Assess the impact of new facilities on social inclusion and consider the recreational needs of visitors and tourists;**
- **Meet the regeneration needs of areas;**
- **Consider security and personal safety, especially for children.**

Planning Policy Guidance Note 17 (PPG17: Planning for Open Space Sport and Recreation, 2002)

- 2.4 The Government's policy objectives for open space, sport and recreation are set out in Planning Policy Guidance Note 17 (PPG17 – Planning for Open Space, Sport and Recreation, 2002). In terms of delivery the long term aims are to:
- **Ensure the provision of networks of accessible, high quality open spaces and sport and recreation facilities in both urban and rural areas, which meet residents and visitors needs, are economically and environmentally sustainable and are fit for purpose;**
 - **To ensure an appropriate balance between new provision and the enhancement of existing provision;**
 - **To provide clarity and reasonable certainty for developers and landowners in relation to the requirements and expectations of the local planning authority in respect of open space and recreational provision.**
- 2.5 A key aspect of PPG17 is that local authorities should undertake a local needs assessment and audit of existing provision. The objective is to move away from the use of national standards of provision and to establish local standards of provision that address quality, quantity and accessibility.
- 2.6 The guidance advises (in paragraphs 1-10) Local Authorities to undertake and consider:
- **Undertake robust assessments of existing and future need to guide effective planning for open space, sport and recreation, therefore consultation is essential to ensure the needs of the local communities are known**
 - **As a minimum needs assessment should include the differing population and community needs for open space sport and recreational facilities**
 - **The needs of people living working and visiting should be taken into account**
 - **To undertake an assessment that identifies specific surpluses and deficiencies that can form the basis to guide the development of a more strategic framework and approach to management and future provision at a local level**
 - **Ensure that sport and recreation facilities are easily accessible by a choice of transport modes and wherever appropriate the facilities are centrally located**
 - **To consider factors such as cost and location as an accessibility factor**
 - **Quality audits will be important as they will allow the identification of potential for increased use through better design management and maintenance**
 - **The assessment will enable the Council to deliver more effective planning policy**

APPENDIX 2 – STRATEGIC CONTEXT

- **Provide good quality open space and recreational facilities as an integral part of new communities not as a bolt on to ensure they are attractive places for people to live and work**
 - **To develop locally derived standards of provision which are evidence based**
 - **Adopt a strategic approach and to plan in a progressive and positive manner for the provision and enhancement of well designed open space, recreational and sporting facilities**
 - **To provide the strongest protection for open space that is or that has the potential to be of value to local people**
- 2.7 PPG17 states that local authorities should utilise the information gathered from undertaking a needs and opportunities assessment and set locally derived standards of provision for open space, sport and recreation. In setting local standards they should include:
- **A quantitative assessments (i.e. how much have they got and how much do they need and where?);**
 - **A qualitative standard which can be used as a means of measuring what needs to be improved and assessing performance though the number of sites that have been improved;**
 - **An accessibility standard that considers how people travel, how long it takes and if travel time is acceptable. It should also consider other factors such as cost and barriers to use.**
- 2.8 Setting such standards based on local needs will form the basis for redressing the surplus or deficiencies through the planning process. It will also allow standards to inform LDF documents and other Council strategies or plans.
- 2.9 The guidance advocates a cross departmental approach to undertaking the needs assessment and auditing. This approach links planning processes with the Community Strategy and Best Value process. Local planners, managers of parks and open space, outdoor sport and recreation are encouraged to work together in the delivery of the audit and assessment. External stakeholders and local people are also an integral part of the assessment.
- 2.10 The Guidance identifies a five step process for undertaking a local assessment
- Step 1 Identify Local Need**
 - Step 2 Audit Local Provision**
 - Step 3 Determine Provision Standards**
 - Step 4 Apply Provision Standards**
 - Step 5 Draft Local Policies**
- 2.11 PPG17 maintains that open spaces, sport and recreation all underpin people's quality of life. Well designed and implemented planning policies for open space, sport and recreation are therefore fundamental to delivering broader Government objectives.
- 2.12 PPG17 stresses the importance of protecting and enhancing the Public Right of Way network for walkers, cyclists and horse riders. The guidance also stresses that parks, recreation grounds, playing fields and allotments must not be regarded as 'previously-developed land'.

APPENDIX 2 – STRATEGIC CONTEXT

- 2.13 PPG17 states that open space and sports and recreational facilities that are of high quality, or of particular value to a local community, should be recognised and given protection by local authorities through appropriate policies in plans. Areas of particular quality may include small areas of open space in urban areas that provide an important local amenity and offer recreational and play opportunities:
- **Areas of open space that provide a community resource and can be used for informal or formal events such as religious and cultural festivals, agricultural shows and travelling fairs. Travelling fairs may also require suitable winter quarters;**
 - **Areas of open space that particularly benefit wildlife and biodiversity.**
- 2.14 The assessment will ensure the County meets the requirements placed on the Council by PPG17 by setting local standards of provision for each different type of open space. The local standards will be derived from existing provision and consultation with key stakeholders (both internal and external), local people and interested groups.
- 2.15 PPG17 directs local authorities away from the use of traditional simple standards such as the National Playing Field Association (NPFA) 6-acre Standard. The standard has been used traditionally by planners as the generic standard to adopt, even though it was never intended to be a prop for planners it somehow became one. The 6-acre standard, whilst a worthwhile tool, did not set standards for every type of space such as parks or natural areas.
- 2.16 In addition, PPG17 has a number of wider objectives set out in its Companion Guide. These are:
- **Supporting an urban renaissance - local networks of high quality and well managed and maintained open spaces, sports and recreational facilities help create urban environments that are attractive, clean and safe. Green spaces in urban areas perform vital functions as areas for nature conservation and biodiversity and by acting as 'green lungs' can assist in meeting objectives to improve air quality.**
 - **Supporting a rural renewal - the countryside can provide opportunities for recreation and visitors can play an important role in the regeneration of the economies of rural areas. Open spaces within rural settlements and accessibility to local sports and recreational facilities contribute to the quality of life and well being of people who live in rural areas.**
 - **Promotion of social inclusion and community cohesion: well planned and maintained open spaces and good quality sports and recreational facilities can play a major part in improving people's sense of well being in the place they live. As a focal point for community activities, they can bring together members of deprived communities and provide opportunities for people for social interaction.**
 - **Health and well being - open spaces, sports and recreational facilities have a vital role to play in promoting healthy living and preventing illness, and in the social development of children of all ages through play, sporting activities and interaction with others.**
 - **Promoting more sustainable development - by ensuring that open space, sports and recreational facilities (particularly in urban areas) are easily accessible by walking and cycling and that more heavily used or intensive sports and recreational facilities are planned for locations well served by public transport.**

(Source ODPM Assessing Needs and Opportunities –A Companion Guide to PPG17 2002)

APPENDIX 2 – STRATEGIC CONTEXT

Planning Policy Statement 1 (PPS1: Delivering Sustainable Development)

- 2.17 PPS1 has sustainable development as the core principle for planning policy nationally. Sustainable development delivery aims to
- **To provide high quality developments of mixed use and sustainable communities**
 - **Reduce the need to travel by car**
 - **Using land in an efficient manner including re-using sites that have previously been developed**
- 2.18 In applying this to the PPG17 assessment it has important links in developing open space, sport and recreation facilities that are sustainable, valued by local communities and will support the Council in providing a balance of provision across the Borough and local areas through determining deficiencies or surpluses and potentially changing the management regimes on sites to meet the needs.

Planning Policy Statement 3 (PPS3: Housing)

- 2.19 This states that new residential environments should provide or enable good access to community space including green space, open amenity and recreational space (including play space) and that emphasis should be given to the needs of children and young people. The guidance advocates the need for well designed, safe and secure stimulating areas with safe pedestrian access.
- 2.20 Nationally the Government has encouraged local authorities to develop an open space strategy as part of the national drive to create cleaner, greener, safer sustainable communities.
- 2.21 Green spaces are important to the health and everyday well being of the people of the County. Therefore well designed and implemented planning policies are fundamental, and it is essential that the Council provides sufficient facilities of the right type in the right places and that these facilities are correctly resourced, well managed and maintained both now and in the future.
- 2.22 The study will help to meet the need for accessible good quality green spaces that meet local needs through the creation of networks of provision that are sustainable and valued by the communities they are designed to serve. It will ensure that the Council provides an appropriate balance and equal access to a network of good quality provision through enhancement, refurbishment or new provision where necessary. It will provide a clear framework for investment and management action.

Planning Policy Statement 12 (PPS12: Local Spatial Planning)

- 2.23 PPS12 explains what local spatial planning is, and how it benefits communities. It also sets out what the key ingredients of local spatial plans are and the key government policies on how they should be prepared. It should be taken into account by local planning authorities in preparing development plan documents and other local development documents.
- 2.24 Each local authority is required to produce a Sustainable Community Strategy (SCS) following consultation with their local communities and key local partners through the Local Strategic Partnership. The Sustainable Community Strategy sets out the strategic vision for a place and is linked into overarching regional strategies. It provides the vehicle for considering and deciding how to address difficult cross-cutting issues such as the economic future of an area, social exclusion and climate change. Building these factors into the community's vision in an integrated way is at the heart of creating sustainable development at the local level.

APPENDIX 2 – STRATEGIC CONTEXT

- 2.25 A Local Area Agreement (LAA) is normally a three year agreement, based on the SCS vision, that sets out improvement targets for the priorities of a local area. The agreement is made between Central Government and local authorities and their partners on the Local Strategic Partnership. Local authorities and their public sector partners are no longer under a duty to produce an LAA despite them being a key delivery mechanism for the SCS.
- 2.26 PPS12 therefore offers, and requires, the development of a stronger leadership role for local authorities and elected members, built on collaboration through Local Strategic Partnerships and accountable delivery through LAAs. The government intends that spatial planning objectives for local areas, as set out in the Local Development Framework, should be aligned not only with national and regional plans, but also with the shared local priorities set out in Sustainable Community Strategies where these are consistent with national and regional policy. To achieve this, the Local Government White Paper strongly encourages local authorities to ensure that:
- **Their Sustainable Community Strategy takes full account of spatial, economic, social and environmental issues;**
 - **Key spatial planning objectives for the area as set out in the Local Development Framework Core Strategy are in harmony with SCS priorities; and**
 - **The Local Area Agreement, as the delivery agreement with central government, is based on the priorities of the SCS and supported by local planning policy to deliver the outcomes agreed.**

Planning Policy Statement 9 (PPS9: Biodiversity and Geological Conservation)

- 2.27 This guidance seeks to ensure that enhancement and conservation of biological and geological diversity are an integral part of sustainable development and that they contribute towards urban renewal and the wider urban renaissance.
- 2.28 Conservation and enhancement are seen as important in the guidance. The guidance refers to local importance, such as veteran trees and ancient woodland. It also advocates that conservation, enhancement and restoration of biodiversity and geology should be an intrinsic part of the strategic approach to development location and form.
- 2.29 The Council will need to ensure that future development plan documents will identify the location of sites designated as important for bio diversity and geological importance. The document will also need to recognise the need for the creation of new habitats in order to meet future targets.
- 2.30 PPS9 re-affirms the Government's position on the conservation of the natural environment. It outlines the need to protect sites that are both designated and undesignated and to manage wisely and promote the creation of new habitats. The guidance advocates the integration of measures to promote and protect nature across all aspects of the Council's work.
- 2.31 The standards set and subsequent policy guidance will be based on a comprehensive audit that considers quantity, quality and accessibility of the provision within the Borough. The standards and subsequent policy framework recommendations will be in keeping with national, regional and local plans and strategies and will support the emerging Local Development Framework.

Circular 05/2005 Planning Obligations

- 2.32 This Circular provides revised guidance for local authorities on the use of planning obligation funding such as section 106 agreements made under the provisions of the Town and Country Planning Act 1990. It clarifies the policy terms and outlines appropriate processes for securing planning obligations.

APPENDIX 2 – STRATEGIC CONTEXT

- 2.33 The Circular defines planning obligations as ‘Private Agreements’ negotiated by the local authority and private developers or people who wish to develop a piece of land. The purpose is to limit the impact of development or to allow development in circumstances that would otherwise be unacceptable from a planning perspective. It means developers may have to commit to a recreational provision or contribute to improvement off site. This can be either a required new provision, a provision off site or a financial contribution.
- 2.34 Obligations (Financial) can be made to compensate for loss or damage caused by the development or to reduce the impact of a development. This again may comprise on or off site financial obligations.
- 2.35 A planning obligation may therefore be used to restrict development or require the land to be utilised in a specific way and require a payment to the local authority for loss or future maintenance (if it is new provision).
- 2.36 Circular 05/2005 stipulates a number of tests to ensure a planning obligation is an appropriate mechanism. It has to be:
- 1. Relevant to planning**
 - 2. Necessary to make proposed development acceptable in planning terms**
 - 3. Related directly to proposed development**
 - 4. Fairly and reasonably related in scale and type**
 - 5. Reasonable in all other respects**
- 2.37 Tests 1 and 2 ‘relevant and necessary’ requires justification for developer obligations to be established in national, regional or local planning policy.
- 2.38 The Circular and associated tests allow for improving both quantity and quality of open space and associated facilities. It also allows for the pooling of contributions towards strategic provision. This includes pooled provision with neighbouring authorities.
- 2.39 Developer contribution as a support for new facilities is allowed. For example, developer funding can be utilised as a contribution towards a facility planned by the Council.
- 2.40 The Circular also advises on maintenance payments for facilities that are primarily for the benefit of users and the associated development. Developers may be required to make payment in perpetuity for the subsequent maintenance of such provision.
- 2.41 The Government's objective in relation to planning policy and developer contributions is for local authorities to provide clear and specific justification within the local development framework that is based on clear and robust evidence, particularly local need.

Community Infrastructure Regulations 2010

- 2.42 These draft Regulations set out the detailed provisions enabling local authorities in England and Wales to introduce a Community Infrastructure Levy (CIL) in their areas, and also how the levy would operate if they did so. The levy would apply to new buildings above a certain size and the revenue from the levy must be applied to infrastructure needed to support the development of the area. The Regulations also provide for the reform of the current system of developer contributions towards infrastructure (‘planning obligations’) so that the two regimes operate effectively alongside each other.

APPENDIX 2 – STRATEGIC CONTEXT

- 2.43 CIL is an important new tool for local authorities to use to help them deliver the growth and housing set out in their development plans. As well as raising additional revenue for infrastructure, CIL will provide greater transparency and certainty for the development industry on the level of contributions towards infrastructure that are expected and as such should reduce delays in the granting of planning permission by removing negotiations over the amounts sought. Local authorities will have an additional source of revenue that can be used more flexibly to bring forward infrastructure than the current system of planning obligations.

Summary of Audit Commission Report (June 2006)

- 2.44 The Audit Commission reported on a study aimed at examining how local authorities in England were managing their approach to providing their public sports and recreation facilities and attempts to improve access and value for money.
- 2.45 Observations were made on strategic planning of sport and recreation services, operational management options and success of options appraisals.
- 2.46 It was recommended that Councils should improve the strategic planning of sports and recreation provision and increase overall efficiency by:
- **Assessing current and future sports and recreation needs**
 - **Forming partnerships to aid the planning, procurement and delivery of services**
 - **Appraise the options for delivery and test the market to ensure that the best value option is identified**
 - **Improve the collection, analysis and use of performance information.**

Urban Greenspaces Task Force “Greenspaces, Better Places” (September 2006)

- 2.47 The report highlights principles and recommendations to support the renaissance of sustainable parks and green spaces and rekindle the relationship between people and the places in which they live.
- 2.48 It recognises that parks and open spaces have the potential to make a significant contribution to urban regeneration by making places more liveable and sustainable whilst also enriching the quality of people's lives.

National Agency Guidance

Sport England: Spatial Planning for Sport and Active Recreation : Sport and Recreation in Supplementary Planning Documents (2009)

- 2.49 Sport England's interests relate to the development of policy within Local Development Documents and the implementation of policy through development control. This guidance helps to clarify how the interests of sport and recreation are best represented at a local level.
- 2.50 Supplementary Planning Documents (SPDs) provide a means of amplifying policy presented in the parent Core Strategy and can therefore prove a useful tool in helping to clarify particular issues and promote the interests of sport and recreation. The specification of planning obligations is the commonest example of the consideration of sport and recreation issues (typically as community infrastructure), but there are other examples of the potential for taking a wider view on the contribution of sport and recreation to achieving improvements in quality of life for local communities. Sport and recreation issues in SPDs relate principally to guidance on developer contributions to the provision of community infrastructure. As such they are widely applicable, and sport and recreation issues are now typically considered as part of an authority's wider approach to planning obligations.

APPENDIX 2 – STRATEGIC CONTEXT

Planning for Open Space (2002)

- 2.51 The key messages advocated by Sport England in this publication are:
- **Policy on planning applications for the development of playing fields provides 5 exceptions to the opposition normally raised by Sport England to the loss of facilities**
 - **Any development affecting playing fields has to have been considered by Sport England as a key consultee.**
 - **Planning Inspectors will no longer accept the traditional 6 Acre standard approach in emerging development plans within local authorities and expect to see the development of local standards of provision.**
 - **Local authorities will need to consider the Towards a Level Playing Field Methodology (guidance on the production of playing pitch strategies) when undertaking open space assessments.**

CABE Space

- 2.52 CABE Space is a part of The Commission for Architecture and the Built Environment (CABE), and was set up in early 2003. It has a primary role to champion excellence in the design and management of parks, streets and squares in towns and cities.
- 2.53 CABE Space receives its funding through central government and their work is to encourage a more holistic approach to open space. A primary objective for CABE Space is to ensure people have access to good quality, well designed, and well managed public open spaces. They are raising the profile and importance of open space in the wider agenda of regeneration, health and well being of local communities.
- 2.54 The key document relevant to this strategy is the best practice guidance for developing Open Space Strategies (2009).

Open Space Strategies – Best Practice Guidance (2009)

- 2.55 The guidance has been developed to support the guiding messages in PPG17 and to contribute to the wider agenda of improving open space through a more strategic approach. The document outlines the importance of good strategic planning in relation to open space and the benefits it can bring.
- 2.56 The document demonstrates the importance of developing an open space strategy and the benefits it can bring. These include:
- **Reinforce local identity and civic pride**
 - **Enhance the physical character of an area, shaping existing and future development**
 - **Improve physical and social inclusion, including accessibility**
 - **Provide connected routes between places for wildlife, recreation, walking and cycling, and safer routes to schools**
 - **Protect and enhance biodiversity and ecological habitats**
 - **Provide green infrastructure and ecosystem services**
 - **Provide for children and young people's play and recreation**

APPENDIX 2 – STRATEGIC CONTEXT

- **Raise property values and aid urban regeneration**
- **Boost the economic potential of tourism, leisure and cultural activities**
- **Provide cultural, social, recreational, sporting and community facilities**
- **Protect and promote understanding of the historical, cultural and archaeological value of places**
- **Contribute to the creation of healthy places, including quiet areas**
- **Provide popular outdoor educational facilities**
- **Promote the opportunities for local food production**
- **Help mitigate and adapt to climate change**
- **Improve opportunities to enjoy contact with the natural world**

2.57 The guidance outlines 3 stages to developing an open space strategy:

- **Stage 1 Prepare** - includes the importance of robust consultation, reviewing core documents and policies from national to local level, development of local typologies and the use of digital mapping to establish quantity, quality and accessibility of open space. The gathering of evidence is crucial to providing a robust assessment and to enabling informed management decisions
- **Stage 2 Deliver** - pulling together the key themes and strands into a clear and concise framework, establishing standard of provision and preparing a final strategy
- **Stage 3 Monitor and Review** – providing key performance indicators, establishing responsibility for delivery and timescales for reviewing the action plan and strategy.

Is the Grass Greener? (2004)

2.58 Using international examples of both good and bad practice to demonstrate issues common in many local authorities that have been encountered abroad, the guide focuses on maintenance and management practices to provide challenging solutions to common issues, such as:

- **Poor maintenance**
- **Hostile environments**
- **Lack of a strategic coherent approach to the management of greenspace**
- **Poor design**
- **Lacking of facilities to engage users**

2.59 CABE Space have produced a wealth of similar publications including 'A Manifesto for Better Public Spaces (2003)' and 'The Value of Public Space (2004)', which promote and advise on the value and benefit that good quality well managed open space can provide. Key messages from all the documents include:

- **High quality public environment is a vital part of any regeneration strategy and can have a positive impact on the value of property**

APPENDIX 2 – STRATEGIC CONTEXT

- **Good quality accessible open space is important to our mental well being and research shows that well maintained spaces can help reduce stress and encourage more people to become active**
- **Open spaces that are well designed, well used and intrinsic to a community can reduce crime or the fear of crime, they benefit young people and encourage children to play freely outdoors experiencing the natural environment**
- **Well designed and well maintained spaces can bring people together and foster social ties**
- **Open space brings people closer to the natural environment, biodiversity and wildlife**

The Green Flag Award - The National Standard for Parks and Open Spaces

- 2.60 This is a national award scheme for parks and open space in England, Wales and more recently Scotland. The Civic Trust manages the award on behalf of central government and is backed by Natural England, English Heritage, the Countryside Commission for Wales, the Heritage Lottery and other similar organisations.
- 2.61 The scheme encourages the provision of good quality parks and open spaces that are well managed and sustainable. The award encourages community involvement and stipulates that sites must have a management plan in order to be considered.
- 2.62 The award is increasingly raising expectations as to what public open spaces can offer and gives reassurance to people that the value they place on their local space is not misdirected.

Regional Policy

- 2.63 In May 2010 the new Government announced the abolition of the Regional Strategies. They were formally revoked, under s79(6) of the Local Democracy Economic Development and Construction Act 2009, on 6 July 2010. Supporting guidance to local authorities upon the revocation of RSS stated: "In the longer term the legal basis for Regional Strategies will be abolished through the Localism Bill that we are introducing in the current Parliamentary session. New ways for local authorities to address strategic planning and infrastructure issues based on co-operation will be introduced."
- 2.64 On 10th November 2010 the High Court ruled that The Secretary of State for Communities and Local Government was not entitled to use the discretionary power to revoke regional strategies contained in s 79(6) of the Local Democracy, Economic Development and Construction Act 2009 to effect the practical abrogation of the regional strategies as a complete tier of planning policy guidance (Cala Homes (South) Ltd v Secretary of State for Communities and Local Government). As a consequence the Regional Spatial Strategy still forms part of the statutory development plan.

Regional Spatial Strategy for the North East (2008)

- 2.65 The Regional Spatial Strategy for the North East of England, (which still forms part of the statutory development plan following the ruling quashing the revocation), sets out a sustainable long-term vision for the development of the region and provides the regional framework for the determination of planning applications and planning appeals. It includes an undertaking to ensure that an improved environment is a high priority. (The coalition Government still plans to abolish the RSS through the Localism Bill).

APPENDIX 2 – STRATEGIC CONTEXT

- **Policy 2: Sustainable Development-Planning proposals and Local Development Frameworks should support sustainable development. Sub-sections of this policy embrace environmental and social objectives.**
 - Environmental Objectives include promoting the concept of green infrastructure, with a network of linked multi-functional green spaces in and around the Region's towns and cities.
 - Social Objectives include improving health and well being, and also ensuring good accessibility by walking and cycling as well as by public transport
- **Policy 8: Protecting and Enhancing the Environment Strategies, plans, programmes, and planning proposals should seek to maintain and enhance the quality, diversity and local distinctiveness of the environment throughout the North East by (inter alia):**
 - Identifying and protecting existing woodland of amenity and nature conservation value, particularly ancient woodlands;
 - Encouraging and supporting the establishment of green infrastructure including strategic wildlife corridors.
- **Policy 9.6: Environment One component of this policy seeks to support the establishment of strategic networks of green infrastructure that link existing and proposed greenspace with green corridors running through urban, suburban and urban fringe areas to the countryside and coast.**
- **Policy 24: Delivering Sustainable Communities Proposals should assess the suitability of land for development in relation to the potential contribution to reducing health & social inequality through the provision of accessible health, sports, community & recreational facilities, including suitable provision for play space, in new development.**

2.66 In addition to the above policies 11.3c and 16 are highlighted as relevant to this work, and should be considered as appropriate.

Local Policy

Northumberland Consolidated Planning Policy Framework (April 2009)

2.67 The Consolidated Planning Policy Framework for Northumberland was adopted by Northumberland County Council on 4 February 2009 and identifies the need to consider relevant policies and strategies adopted by the former County Council and District Councils e.g. former Core Strategies and Local Plans when considering planning applications and other development proposals. Consolidated Planning Policy Framework comprises two sections:-

- **Section A** - Schedule of Statutory Development Plan Documents
- **Section B** - Schedule of Planning Policy Documents which do not form part of the Development Plan

Section A - Schedule of Statutory Development Plan Documents

2.68 This schedule includes Policy S5 of the adopted Structure Plan, adopted Local Development Framework documents which form part of the Statutory Development Plan, and local plan policies 'saved' either through regulation or Direction by the Secretary of State. Together with the North East of England Regional Spatial Strategy (RSS) these documents comprise the statutory Development Plan for Northumberland.

APPENDIX 2 – STRATEGIC CONTEXT

Section B - Schedule of Planning Policy Documents which do not form part of the Development Plan

- 2.69 This schedule is itself comprised of two parts. The first is concerned with those local development documents which are part of the Local Development Framework but do not form part of the statutory Development Plan and includes a number of Supplementary Planning Documents (SPDs). The second part comprises various planning policy documents which have been prepared by the seven former local planning authorities and which are used to provide guidance and advice in considering and determining planning applications. The documents in Part 2 are not individually identified in the policy framework in the Council's Constitution but are referred to as the 'Schedule of Planning Policy Documents which do not form part of the Development Plan'. The documents contained in Part 2, whilst prepared by predecessor councils, were also adopted by the Northumberland County Council on 4 February 2009.
- 2.70 As a precautionary note the Framework flags up that the documents contained within the Consolidated Planning Policy Framework need to be read in context. Where they were adopted some time ago, it is likely that material considerations, in particular the emergence of new national and regional policy- will be afforded considerable weight when determining planning applications. As a precautionary note the Framework flags up the fact that some policies were adopted some time ago, as a consequence of which it is likely that other material considerations - in particular the emergence of new national and regional policy - will be afforded considerable weight when determining planning applications. In addition, the document makes it clear that there will be a need from time to time to rely on existing evidence-based documents to assist in the due consideration of assessing development proposals. These include:
- **Housing needs assessments**
 - **Retail capacity studies**
 - **Emerging evidence based studies**
 - **Open space and recreation assessments**
 - **Landscape character assessments**
 - **Employment land reviews**
 - **Wind capacity studies**
- 2.71 As a precautionary note the schedule flags up the fact that some policies were adopted some time ago, as a consequence of which it is likely that other material considerations - in particular the emergence of new national and regional policy - will be afforded considerable weight when determining planning applications. In addition, the Appendix documentation makes it clear that there will be a need from time to time to rely on existing evidence-based documents to assist in the due consideration of assessing development proposals.
- 2.72 The schedules also include a bibliography of the policy documents, including date of approval by the preparing authorities and an indication of their relevance by geographical coverage and spatial theme coverage.
- 2.73 Considerations to be taken into account in relation to "Spatial Theme Definitions" include.
- **For 'Recreation & Open Space' these may include parks and gardens, provision of new open space, sport and recreational facilities, children's play, strategic open spaces, golf courses, countryside activities, recreational footpaths, cycleways and bridleways.**

APPENDIX 2 – STRATEGIC CONTEXT

- For ‘Natural Environment’, these may include sites of international and national importance for nature conservation, sites of local or regional nature conservation significance, protection of species, biodiversity and geo-diversity sites, wildlife networks, landscape character, areas of high landscape value, best and most versatile agricultural, trees and hedgerows.

2.74 The Consolidated Planning Policy Framework for Northumberland is a ‘living’ document and the Council has signaled its intention to update the Framework when new planning policy documents are adopted.

2.75 In relation to open space, sport and recreational facilities, there are a number of key issues resulting from the above context, and specifically the existing planning policies being applied. These are summarised below:

Key Planning Issue in Relation to Open Space, Sport & Recreational Provision	How it is Currently Dealt With	Impact of this Situation
Standards of Provision	Standards of provision are based on the former district approach, which varies across the county.	Standards of provision are inconsistent across the new unitary area, as a result of the previous approached under former authorities. The new Northumberland PPS and PPG17 will be used to inform the setting of standards relevant to the new unitary area. These will replace the existing ones developed by former authorities.
Quality of Provision	The requirement for quality of provision varies between all former districts. The basis on which quality of provision is determined also varies, as each former district undertook its own PPG17 at different times, methodologies also varied, as did the level of pitch quality audits. Approaches to grounds maintenance also varied in the former districts.	There is no consistent measure of quality across Northumberland in terms of open space, sport and recreational facilities. This needs to be addressed in future planning policy so that all providers have a quality level to aspire to, and all users have an understanding of what they can expect in return for hire fees.
Accessibility	There is inconsistency in relation to accessibility of open space, sport and recreational facilities.	Different areas of Northumberland currently have varying levels of accessibility; the critical issue about accessibility is that community provision should be available, and affordable to local communities.

APPENDIX 2 – STRATEGIC CONTEXT

Key Planning Issue in Relation to Open Space, Sport & Recreational Provision	How it is Currently Dealt With	Impact of this Situation
SPDs	Not all former district authorities adopted and operated SPDs in relation to Sport and Play Provision.	In preparing the Northumberland LDF consideration needs to be given as to whether there is the need to prepare a Northumberland wide Sport and Play Provision SPD.
Responsibility for Provision	The former County Council was not responsible for sport and leisure provision in its widest sense. Provision was previously the responsibility of the former district authorities.	The new unitary authority now has responsibility, albeit non-statutory, for open space, sport and recreation facilities. It is important that future planning policy aligns the level of responsibility with appropriate local priorities, so that the contribution of this type of provision to the NCC corporate agenda is clear, and can be addressed appropriately in future planning policy.

Growth Point Status

- 2.76 The Northumberland Growth Point (NGP) initiative for South East Northumberland was approved by government in 2008. The initiative is designed to accelerate growth in housing, regeneration and economic prosperity.
- 2.77 A key target identified is to realise an increase in housing by over 20% over the period 2008-2017, with the total new housing provision expected to be over 6,300. The initiative is also tasked with ensuring that the uplift in housing is complemented by an improvement to the residential neighbourhood and the quality of place. As a result, specific attention is drawn to the role and function of green infrastructure in the delivery of these aspirations.
- 2.78 Growth Point status represents a joint commitment between government and the new Growth Point Partnership to increase the level of housing provision in the sub region and accelerate its delivery. However it is not solely about housing numbers; it is also about:
- **Widening the opportunity of housing choice**
 - **Improving the liveability and quality of life for local people**
 - **Developing ‘greener’ housing provision in accordance with the Housing Green Paper**
 - **Improving the quality of the housing and the design of new development**
- 2.79 The NGP proposal for the south east is based around six identified potential “growth areas”:

APPENDIX 2 – STRATEGIC CONTEXT

- 2.80 The Growth Point Area comprises the whole of Wansbeck and Blyth Valley and it extends westward to include the market town of Morpeth (The main settlements being Ashington, Blyth, Cramlington and Morpeth) and north to include the Rural Coalfield Area.
- 2.81 The submission for Growth Point status was on the back of new housing largely being achieved through increased residential development on Brownfield regeneration sites or through urban extension at Ellington, Lynemouth, East Ashington, Blyth Estuary, Cambois, North Morpeth and Cramlington South West Sector.

Releasing the Strength of our Communities – A Sustainable Community Strategy for Northumberland to 2021

- 2.82 The Northumberland Sustainable Communities Strategy (SCS) sets the strategic framework for delivering more sustainable and integrated communities. The main premise of the strategy is to 'release the strength' of Northumberland's communities for the benefit of the lives of all residents. The overriding vision is to ensure that, by 2021, all Northumberland residents will:
- **Enjoy a good standard of living** - More Northumberland residents and employers will prosper and thrive economically. Many will have embraced lifelong learning as the foundation for building their self-esteem and confidence. They will be increasingly aspirational and have a more positive enterprising and "can do" attitude to realising their personal goals. They will have fewer barriers to work and have local access to a wider range of good, long-lasting job or business opportunities.
 - **Live safely and in comfort** - Most Northumberland residents will live in a decent home that is secure and warm. They will have greater housing choice at prices they can afford. Their homes will be set in surroundings that are increasingly welcoming and pleasant – safer to walk around in, freer from litter and graffiti, and interspersed with well-designed, attractive buildings and green spaces.
 - **Lead healthier lifestyles** - More Northumberland residents will live independently, longer and be less likely to die from heart disease, cancer, suicide or accidents. They will have greater scope to make healthier choices – by eating balanced diets, regularly playing sport or taking exercise, stopping smoking and drug-taking, drinking alcohol in moderation, and handling the day-to-day stresses of modern living.
 - **Readily access the things they need** - More Northumberland residents will feel included and informed. They will be better connected to jobs, learning opportunities and essential services through enhanced points of entry that are convenient, affordable and welcoming to all. They will know where to turn for advice and be confident that their enquiry will be handled promptly and effectively.
 - **Take part in cultural activity** - More Northumberland residents will have broader opportunities to enjoy their leisure time. They will be regularly gathering to enjoy acclaimed events or quality venues and be equally passionate about actively cherishing their heritage and trying new things. They will be welcoming and open to sharing the considerable cultural delights on offer with visitors.
 - **Care about our environment** - More Northumberland residents will recognise the increasing vulnerability of the natural assets they rely upon and most will be taking action to combat climate change. They will be striving to protect and enhance their unique habitats, landscapes and countryside, to minimising pollution and waste, using energy prudently, and buying more produce locally.
 - **Get involved and bring about change** - Northumberland residents will be more prepared to volunteer and constructively find ways to help themselves in realising an opportunity or tackling issues of concern. They will be capable of forming and articulating a collective view on things that matter to them and be prepared to challenge the "powers that be" with those views.

APPENDIX 2 – STRATEGIC CONTEXT

- 2.83 The strategy recognises that delivering the vision will require a multi-agency approach and the support of the members of the public, the private sector, and the voluntary sector. As such, aligning policies and activities, sharing and pooling intelligence, and strengthening dialogue with the community and other stakeholders are considered key 'divers' to successful delivery.

Northumberland Economic Strategy (2010-2015)

- 2.84 The Northumberland Economic Strategy establishes a vision to secure opportunities for residents and businesses in a resilient economy, in support of national economic recovery. In partnership, the strategy aims to align and focus resources that can make a positive difference to the sustainability, inclusion and resilience of Northumberland. To deliver the vision, and informed by policy and fiscal direction from central government, the objectives are to:
- **Become a low carbon economy**
 - **Create the conditions for sustainable growth**
 - **Support resilient and diverse sectors**
 - **Enable an inclusive and enterprising economy**
- 2.85 The Northumberland Economic Strategy is part of a wider community planning framework for the county including the Sustainable Community Strategy (SCS), the Local Development Framework (LDF) and other principal thematic strategies and plans. The role of the strategy is to support delivery of the SCS linking the contributions of the Northumberland Strategic Partnership to enable delivery of economic interventions.

Northumberland Local Investment Plan

- 2.86 The Northumberland Local Investment Plan sets out a high level, strategic vision around which the Homes and Communities Agency (HCA) will invest resources in partnership with NCC. The vision for the Investment Plan is simply to '....release the strength of our communities' by making the most of the unique offer of Northumberland as a place to live, work and visit. The overarching objectives of the plan are as follows:
- Diversification across economic sectors maximising opportunities for regeneration and growth particularly relating to the **Energy and the Environment including low carbon and renewable energy developments**.
 - Developing **tourism and the creative and cultural sectors** further utilising our natural assets and heritage.
 - Develop the strength of **enterprising communities, businesses and people**.
 - **Promoting economic prosperity** and raising employment and skills levels.
 - In the commuter belt and **more rural areas** tackle **housing affordability** issues for local communities through taking forward relevant recommendations in the Matthew Taylor report on the Living, Working Countryside.
 - To promote Northumberland's **high quality of life and distinctive environment** that provides the ideal location to attract and retain high skilled workers in the region.
 - Considering the **future for the Council's own stock** and **improving private sector accommodation**, particularly in North Northumberland.

APPENDIX 2 – STRATEGIC CONTEXT

- Addressing the needs of an **ageing population** through support to them in their own homes as well as new provision including extra care, private and social accommodation and working with the HCA to consider the findings of the Housing our Ageing Population: Panel for Innovation report.
- Understanding and responding to the needs of our **vulnerable people** including those experiencing or at risk of being homeless, people with learning disabilities and/or mental health issues, and Gypsy, Roma and Traveller communities.
- Reducing Carbon Emissions and reducing Fuel Poverty.

- 2.87 The plan determines that SEN, as one of the principal character areas of Northumberland, presents some of the greatest challenges and opportunities in Northumberland. Its challenges are caused by the fact that it is the most populated area of the county, and also because its key centres of Ashington and Blyth in particular have suffered major industrial decline that have led to high levels of deprivation. However, the opportunities afforded by its NGP status means that the regeneration of places such as Blyth, Cramlington and Ashington will realise considerable investment in housing, business and other forms of commercial property.
- 2.88 The importance of this plan from a GI perspective is in terms of deliverability and that it identifies the resource input requirements from the private, local and government agencies to include cash investments, land assets, and infrastructure development. The plan recognises that the ability to secure developments in infrastructure and community-need projects will be more difficult to achieve through private sector investment in housing and commercial development in lower value locations such as Blyth, Ashington and Cramlington where requirements for affordable housing are likely to be higher. Therefore, development vehicles such as housing alliances and cross subsidy schemes are seen as being important as they bring all key partners together and can ensure the integration of broader 'place making' priorities in the planning, design and development of projects.

Northumberland Biodiversity Action Plan

- 2.89 The Northumberland Biodiversity Action Plan (BAP) 'Working with Wildlife' has been developed through the Northumberland Biodiversity Partnership. The partnership includes a variety of landowners, policy makers and stakeholders such as the former Borough Councils, Northumberland Wildlife Trust, County Landowners and Business Association, Northumberland Water, RSPB, Environment Agency, Forest Enterprise, Northumberland National Park, and Natural England.
- 2.90 The Northumberland BAP identifies and prioritises the species and habitats most in need of protection and enhancement and that are integral to the uniqueness or local character of Northumberland. These are identified in the table below:

Habitats	Blanket Bog	Lowland Heathland	Rivers and Streams
	Brownfield Land	Lowland Meadows & Pastures	Rocky Shore, Reefs & Islands
	Calaminarian Grassland	Maritime Cliff and Slope	Saline Lagoons
	Coastal Heathland	Native Woodland	Saltmarsh and Mudflat
	Fen, Marsh and Swamp	Ponds, Lakes and Reservoirs	Sand Dunes

APPENDIX 2 – STRATEGIC CONTEXT

	Gardens and Allotments	Recreational & Amenity Space	Upland Hay Meadow
	Heather Moorland	Reedbed	Whin Grassland
Species	Barn Owl	Freshwater Fish	Red Squirrel
	Bats	Freshwater Pearl Mussel	River Jelly Lichen
	Coastal Birds	Garden Birds	Upland Waders
	Common Seal	Great Crested Newt	Violet Crystalwort
	Dingy Skipper	Grey Seal	Water Rock-bristle
	Dormouse	Hedgehog	Water Vole
	Farmland Birds	Otter	White-Clawed Crayfish

- 2.91 The diversity of habitat and landscape across Northumberland helps shape the sense of place and character of the County as a whole. The County boasts a wealth of statutory and non statutory designated areas and networks of sites and habitats that serve as key ecological assets, with SEN for example consisting of Ramsar, Special Protection Area, SSSI, and local nature reserve designations.
- 2.92 The sphere of influence over the natural environment in Northumberland is wide and diverse with numerous agencies, governing bodies, private enterprise and the voluntary sector all having an input. As such the level and extent of management, availability of resources including investment, staffing and maintenance are also diverse and varied. This has a direct impact on the quality and consistency of the natural resource and would appear to lead to fragmentation, isolation and an inconsistent approach. GI can be used as a means of engaging all of these stakeholders and forging a more consistent and holistic approach to biodiversity protection and enhancement across Northumberland, and especially SEN.

Northumberland Rights of Way Improvement Plan, 2007

- 2.93 The Northumberland Rights of Way Improvement Plan sets the framework from which the County Council is to seek improvement to the existing network of public rights of way and the standards that are to be reached. Although GI is much broader in scope, the Rights of Way (RoW) network is integral in term of being a delivery mechanism for encouraging sustainable access to the green and open spaces, providing the green linkages between them, and between settlements.
- 2.94 The Improvement Plan includes four key objectives in respect of the four types of right of way, footpaths; bridleways; restricted byways (a right of passage for all non motorists); and byways open to all traffic. These objectives are:
- **Ensure that the network of public rights of way meet current and future needs, is accurately recorded, and is in a condition which enables legal use.**

APPENDIX 2 – STRATEGIC CONTEXT

- **Identify and implement improvements which will enhance the provision of recreational, health and transport requirements of residents and visitors using the Northumberland rights of way.**
- **Enhance the range, type and accessibility of information available about Northumberland rights of way.**
- **Work in partnership with interest groups to manage, enhance and promote the rights of way network.**

2.95 A key priority for NCC is to improve the quality of the RoW network, especially in relation to bridleways; to develop access to the network for all, with greater emphasis on promoted walks and rides; and developing further regionally and nationally important trails.

The Northumberland Sports Facilities Strategy, 2010 (Northumberland Sport)

- 2.96 Northumberland Sport is one of 49 County Sports Partnerships in England, bringing together a range of organisations with a common aim of ensuring the people of Northumberland can access and enjoy quality sporting and physical activity opportunities. The partnership is directly linked to the Northumberland Strategic Partnership via the Culture and Tourism Board and the Health and Well Being Thematic Partnership and is recognised as the lead partnership for sport and physical activity within the County.
- 2.97 The vision for Northumberland Sport is to **develop and increase participation in sport, building healthy and successful communities**. In order to fulfil this vision, it is important that communities have access to a range of sports and physical activities through sufficient levels of quality facilities.
- 2.98 The strategy sets out an approach taken by Northumberland Sport to establish a longer term perspective and plan for sports facilities. The Northumberland Sport Partnership has a fundamental purpose of helping to create more opportunities and the right environments for more people of all ages to play sport and/or lead active lifestyles. The quality and range of sports facilities in the county is critical to driving up participation and the strategy aims to ensure facility provision is planned, developed and sustained in a coordinated and cohesive way.
- 2.99 The strategy has demonstrated that there are no significant gaps in the basic infrastructure of major facilities in the County. Swimming pools and sports centres, for example, are located where you would expect them to be in the larger towns with few overlapping catchment areas. There is theoretical unmet demand because of the distance some people live from pools and centres, but there is no concentration of unmet demand in any one area of the County.
- 2.100 Northumberland is relatively well off for some facilities such as golf courses and fitness centres. There are shortages of smaller scale facilities such as pitches, especially synthetic turf pitches, and accessible indoor spaces in some areas – some of which can be addressed by bringing public owned assets more effectively into community use.
- 2.101 There is scope to work towards some specialist facilities particularly in relation to outdoor sport, building on Northumberland's great strength of high quality landscape. Whilst there can be long distances to travel to specialist indoor facilities in some cases, this is an inevitable consequence of Northumberland's large size and sparse population, and more talented athletes will normally need to travel to the Tyneside conurbation to access the levels of coaching and competition they need. Nevertheless opportunities should be taken if there are housing developments or replacement schools, or if Sports Governing Bodies wish to invest in the County, to broaden and develop the range of facilities available. The nature of Northumberland means that the greatest benefit to the greatest number of people will come through a broad range of improvements, adaptations and replacements commensurate with the scale and size of the County's communities.

APPENDIX 2 – STRATEGIC CONTEXT

2.102 Leading on from the results of the study, the **key strategic objectives** are:

- To maintain the current stock of facilities to a high standard, continuing to maintain a stock of public sports facilities which serves the majority of the County's population, and seeking opportunities to refurbish them to keep quality high and to refresh and adjust the facilities on offer to meet changing demand.
- To seek to replace facilities when they reach the end of their useful life; taking the opportunity to provide updated facilities to meet current and future demands and considering the most appropriate location for replacement facilities bearing in mind changes in population and demographics.
- To work with partners such as schools, colleges and community organisations to maximise the community use of local assets, particularly those in public ownership such as schools, making small scale improvements and adjustments where appropriate.
- To work with Governing Bodies to develop specialist facilities particularly relating to outdoor sport. To work towards setting a hierarchy of standards for provision commensurate with local needs, for example standards for the provision of synthetic surface pitches being considered through the playing pitch strategy.

2.103 The strategy recognises there is considerable financial pressure and uncertainty across public sector services and this poses a huge challenge for capital investment in new or improvements to existing sports facilities. Nonetheless the strategy aims to guide investment and a collaborative approach to facility development for years to come.

Existing Strategic Planning for Open Space & Sports Pitches: Key Review Findings

2.104 In the years leading up to the formation of the unitary authority, several of the constituent authorities developed relevant studies and strategies. We have reviewed these documents, with the key implications highlighted below. A summary of the status of our review of key authorities' documents is also shown below.

Playing Pitch and Open Space Strategy Review

Former Authority	Playing Pitch Strategy	Open Space Assessment
Alnwick	✓ (joint Strategy with Berwick)	✓
Berwick-upon-Tweed	✓ (joint Strategy with Alnwick)	✓
Blyth Valley	No separate strategy but detailed assessment included in PPG17 Audit and Assessment	✓
Castle Morpeth	X	X

APPENDIX 2 – STRATEGIC CONTEXT

Former Authority	Playing Pitch Strategy	Open Space Assessment
Tynedale	✓	✓
Wansbeck	✓ (Referenced from other docs)	✓ (Referenced from other docs)
County Wide Strategies	<ul style="list-style-type: none"> • Strategic Review of School Sports Facilities • Northumberland Sports Facilities Strategy (2010) 	

Summary of Key Issues from Existing Strategies

Document	Key Findings/Issues
Strategic Review of School Sports Facilities	<p>The review was commissioned to assist the County Council to plan for the re-provision of playing fields and sports provision against the backdrop of changes in the schools portfolio across Northumberland. Six sub-studies were commissioned – one for each local authority area. The reports note the impact of the closure of some schools which provide playing pitches and suggests that on sites where schools are to be retained, that any encroachment should be offset by re-provision and/or improvements to existing facilities. In the case of sites considered 'surplus', the existing playing pitches should be maintained with a view to encouraging community use. The backdrop to most local studies is a noted deficiency of playing pitch space.</p>
Northumberland Sports Facilities Strategy (2010)	<p>The strategy refers to indoor and outdoor facilities. Key issues summarised across the county in terms of outdoor pitches include qualitative issues – poor changing, poor drainage, lack of floodlit training facilities and lack of female changing facilities. Other themes include the need for new AGPs (Alnwick, Blyth Valley and Wansbeck priorities) on school sites and a need to focus on multi-pitch sites.</p> <p>Grass pitch improvements identified include:</p> <ul style="list-style-type: none"> • Alnwick – Longhoughton PC pitches and changing rooms, Alnwick Sporting Club pitches and changing rooms • Castle Morpeth – Ponteland pitch work, Morpeth Common drainage improvements • Tynedale – Hexham Duke House Wood, 4 x pitches and changing rooms • Wansbeck – Investment in pitches and changing facilities at Newbiggin Hall and Bomarsund Welfare

APPENDIX 2 – STRATEGIC CONTEXT

Document	Key Findings/Issues
North Northumberland Playing Pitch Strategy (Alnwick and Berwick-upon-Tweed District Councils) (2003)	<p>Study commissioned by Alnwick and Berwick-upon-Tweed District Councils. Key issues identified in both Berwick and Alnwick include:</p> <ul style="list-style-type: none"> • Generally poor changing accommodation • Only one rugby club in each district with generally poor pitch quality • No dedicated artificial hockey pitches • The need to upgrade around 22 pitches in Alnwick and 16 in Berwick • No significant quantitative shortfalls identified
PPG17 Open Space, Sport and Recreational Facilities Study – Alnwick and Berwick-Upon-Tweed District Councils	<p>Study commissioned after the 2003 Playing Pitch Strategy. Consultation issues relating to outdoor sports facilities highlighted include:</p> <ul style="list-style-type: none"> • The poor quality of provision, particularly in Alnwick and Amble • A need identified by 47% of sports clubs for a synthetic turf pitch • Demand for an indoor bowling green in Alnwick <p>The quantitative assessment undertaken suggests there are 157 hectares of outdoor sports provision (2.61 ha/1,000 in Alnwick and 2.92 ha/1,000 in Berwick). Recommended quantity standards are to remain at the current level, with a focus on qualitative improvements. The report notes significant variation in terms of quality.</p>
Blyth Valley PPG17 Assessment (2007)	<p>Study refers to all open space types. Consultation with sports clubs was not comprehensive, with a poor response rate noted. Key issues relating to sports pitch provision include:</p> <ul style="list-style-type: none"> • Access to playing pitches is based on 900m walking distance – all settlements have this access except for the northern part of Cramlington (Beaconhill Green) and the northern part of Seaton Sluice where, given the population demographics, there is no need for pitches. • Cricket and rugby participation in Blyth Valley is more or less constant, but adult football is still in decline; some junior football clubs have also disbanded in recent years • Part of the problem with adult football is that most “clubs” are actually single teams; this means they lack continuity and are not developing a pool of players for the future

APPENDIX 2 – STRATEGIC CONTEXT

Document	Key Findings/Issues
	<ul style="list-style-type: none"> • A number of football teams are “fragile” and may disband at any time, with the main threats to their future being a lack of volunteers willing to run them and the unwillingness of players to pay a realistic charge for their sport • Each of the constituent parts of Blyth Valley currently has sufficient cricket, adult football and adult rugby pitches to accommodate both current demand and a 10% increase in participation rates for all three pitch sports. However, there is a shortfall in junior and mini provision which means that some adult pitches are used by younger players. The Council should keep the demand balance between adult, junior and mini-pitches under review and remark adult pitches as necessary to achieve the best “fit” between supply and demand. • Clubs and the governing bodies are critical of the quality of pitches and changing provision in the Borough but do not regard the number of pitches as being in any way inadequate • There is likely to be a growing need for floodlit artificial turf pitches in the Borough as players abandon weekend football and move to mid-week play. These pitches should reduce the demand for grass pitches, particularly for mini-soccer and min-rugby. • Priority recommendations for the then Council to improve quality of pitches and changing provision; and to work with schools to open up education sites; although additional playing pitches are needed, there is limited need for new pitch development given the opportunities to improve the quality of existing provision and open up existing facilities, particularly on school sites • The Council should provide planned pitches at South Beach, Blyth and develop an AGP with Blyth Community College; the aim should be to provide an AGP with secured community use at each secondary school • Consultation with the FA’s development officer suggested the need for an additional floodlit third generation AGP • Audit suggested adult football in decline, in line with national trends • Cramlington, Alexandra Park is outdated, but the AGP at Cramlington High School is close to this site <p>The report references the Blyth Valley PPS (2001) (not reviewed) which forecast the need for an additional 7 adult football, 19 junior football and 24 mini football pitches.</p>

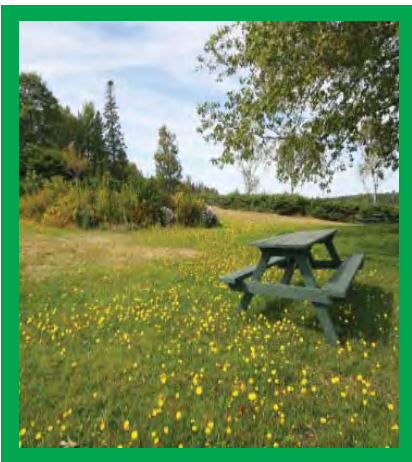

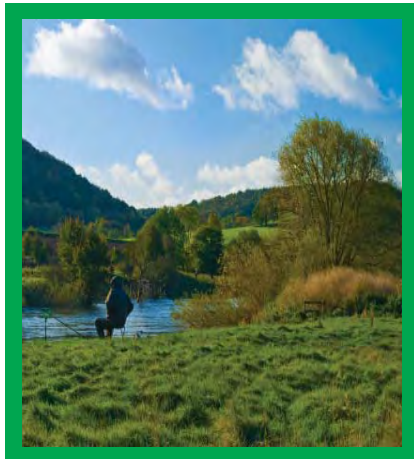

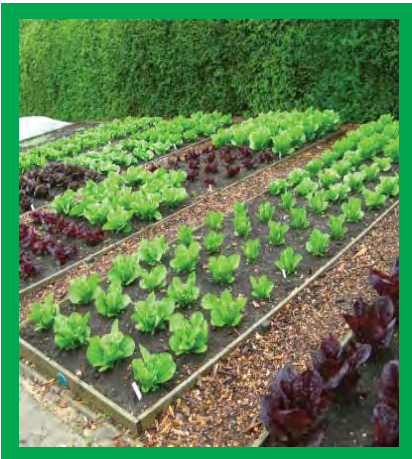

APPENDIX 2 – STRATEGIC CONTEXT

Document	Key Findings/Issues
	<p>Key sites for potential development are identified as:</p> <p>Blyth - South Beach – requires drainage to support increased usage</p>
<p>Tynedale Open Space, Sport and Recreation Study (2005)</p>	<p>This study breaks the authority area into 21 sub areas and sets out an approach to the provision and improvement of open space, sport and recreation facilities. It builds on the 2001 Recreational Open Space Strategy and reviews sports, children’s play and informal open space.</p> <p>The study is not PPG17-compliant in so far as it does not apply locally-derived standards, adopting the NPFA recommended standards for open space and children’s play areas. Playing pitches however are subject to a separate PPS, as reviewed below.</p> <p>The study concludes that:</p> <ul style="list-style-type: none"> • Each of the main towns (Hexham, Prudhoe and Haltwhistle) should continue to provide ‘an adequate amount of outdoor sports facilities including playing pitches’ • Both Hexham and Prudhoe should have a full size floodlit AGP. Floodlit MUGAs should also be provided • Tynedale Rugby Club should be supported to develop district-wide facilities including a floodlit AGP

APPENDIX 2 – STRATEGIC CONTEXT

Document	Key Findings/Issues
Tynedale Playing Pitch Strategy (2004)	<p>Strategy covers cricket, football, rugby and hockey in line with 'Towards a Level Playing Field' guidance.</p> <p>One of the conclusions of the strategy is the need to accommodate the likely move towards more sport being played on artificial pitches. Key objectives include:</p> <ul style="list-style-type: none"> • Deficiencies in playing pitches identified should be addressed, including a focus on improving the stock of synthetic turf pitches in the District • Main towns and local centres should provide key sports facilities including those of a District level • There should be an appropriate network of more localised sports facilities in villages across the District • Facilities at high and middle schools should be developed and enhanced for wider community use, in particular the potential replacement of school buildings over the next decade is an opportunity to provide top quality sports facilities for school and community use • Sports facilities should be to a standard suitable for their role and include changing / ancillary facilities as appropriate
Wansbeck Playing Pitch Strategy (2002)	<p>Although not available for review, the document is referenced in Wansbeck's 2007 Local Plan, which states that a local standard of 0.8 hectares of playing pitches per 1,000 people should be adopted for planning purposes. The plan highlights that "The Playing Pitch Strategy is in the process of review as part of an assessment of open space, outdoor sport and recreation in the District."</p>
Wansbeck Open Space Assessment (2007)	<p>Whilst there is adequate provision in terms of the number playing pitches, the quality of pitches varies; 26% were rated as poor. Changing rooms are present on 55% of sites and the quality also varied.</p> <p>There is a wide range of existing indoor sport and leisure facility provision but significant investment is required to improve quality and increase capacity.</p>

Appendix 3 - Quality Assessment Criteria

APPENDIX 3 - QUALITY AUDIT ASSESSMENT CRITERIA

To have a better understanding of the quality of the County's open space sites a detailed quality audit and survey was conducted between February and April 2010. The audit included visits to over 1,300 open spaces across the County including parks and open space, natural and semi-natural greenspace, allotments, cemeteries, etc:

- **To gauge the quality of each site at a given time, through the evaluation of the site infrastructure its condition and quality. The sites are measured in a consistent and objective way and the audit reflects the condition of sites from a visitors perspective**
- **To identify site characteristics and features that result in some sites being low quality and to provide information regarding the opportunity for improvement**
- **To establish a quality standard for the County's open space provision**
- **To identify sites that the Council should protect and those that would benefit from improvement**

Quality relates to the range of facilities and physical infrastructure contained within individual sites, the audit considers factors such as accessibility, safety, management, maintenance and overall impression it also considers the presence of fixtures such as benches, bins, gates, signage, hedges trees and paths.

Although the audit was primarily driven by PPG17, the information collated will provide the County with a comprehensive overview of the condition of the open space provision and will provide a level of management information not previously available. The information will enable the County to make informed decisions with regards to the resources required to undertake improvements in site management and maintenance.

The scores provide a means of comparing sites by typology. The audit also gives a clear and robust overview of the physical condition of open space across the County and within neighbourhood areas.

Quality Inspections have been undertaken via a site visit and the completion of a scored proforma. The quality assessment proforma is based on a number of key criteria encompassing the quality aspects of the Green Flag Programme, ILAM Parks Management Guidance and the Tidy Britain Scheme. The sites are classified by type and scores are translated into a percentage and then measured against the quality line rating below:

Quality Line

0% - 15%	16% - 30%	31% - 45%	46% - 60%	61% - 75%	76% +
Very Poor	Poor	Below Average	Average	Good	Excellent

The quality audit provides an indicative rating of quality out of 100%. It is important to note that the quality score represents a "snapshot" in time and records the quality of the site at the time of the visit audit.

In order to benefit from this it is important that an audit is undertaken annually across a proportion of sites to maintain and track quality improvement. Ideally all sites should look to be visited at least once within a five year period.

Sites are classified in accordance with type and then measured against elements that would be expected based on best practice for example an amenity greenspace provided in amongst housing as a space for people should provide a bench and a litter bin as well as a sign informing of site name or plot number and ownership contact detail, whereas amenity greenspace designed as a landscaped area with a no ball games sign would not need a bench or a bin, but should still have some form of signage to identify the site.

APPENDIX 3 - QUALITY AUDIT ASSESSMENT CRITERIA

QUALITY AUDIT ASSESSMENT CRITERIA

TYPOLOGY	ASSESSMENT CRITERIA	QUALITY STANDARDS
LARGE PARK	<ul style="list-style-type: none"> • Main Entrance • Side Entrance • Signage • Boundary • Roads / Paths • Young Trees ** • Mature Trees ** • Grass • Bins • Seats • Parking • Lighting • Information Board • Cleanliness • Events 	<ul style="list-style-type: none"> • Welcoming, safe, clean and tidy • All facilities well maintained and in usable condition, regularly checked and inspected • Signage to indicate site name, ownership and contact details • Boundaries well maintained and clearly defined • Adequate paths with access suitable for people with disabilities • All trees safely and appropriately maintained with adequate crown lifting • Well maintained grass sward, cleanly cut with naturalistic grass areas where appropriate • Appropriate planting of shrubs and flower beds, weed free and well maintained • Adequate bins and seating • Appropriate parking facilities on or near to site • Litter clearly under control • Limited evidence of vandalism or graffiti, with rapid and effective removal
LOCAL PARK OR RECREATION GROUND	<ul style="list-style-type: none"> • Signage • Paths • Mature Trees ** • Grass • Bins • Seats • Information Board • Cleanliness • Lighting * • Parking * 	<ul style="list-style-type: none"> • Very little or no evidence of dog fouling • Play provision signed, connected to path network, appropriately contained, clean and well maintained • Toilet facilities where possible • Good lighting in appropriate areas e.g. car park • Up to date notice boards with relevant information and contact details • Events programme (where appropriate)

APPENDIX 3 - QUALITY AUDIT ASSESSMENT CRITERIA

TYOLOGY	ASSESSMENT CRITERIA	QUALITY STANDARDS
		<ul style="list-style-type: none"> • Accessible water points

* Only applicable for Recreation Grounds

** If there are only Young Trees on site then Mature Trees are not an essential criteria.

*** Active Amenity space only.

APPENDIX 3 - QUALITY AUDIT ASSESSMENT CRITERIA

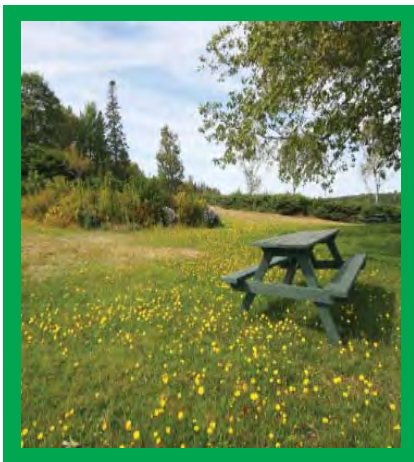

QUALITY AUDIT: KEY CRITERIA & SUB CRITERIA

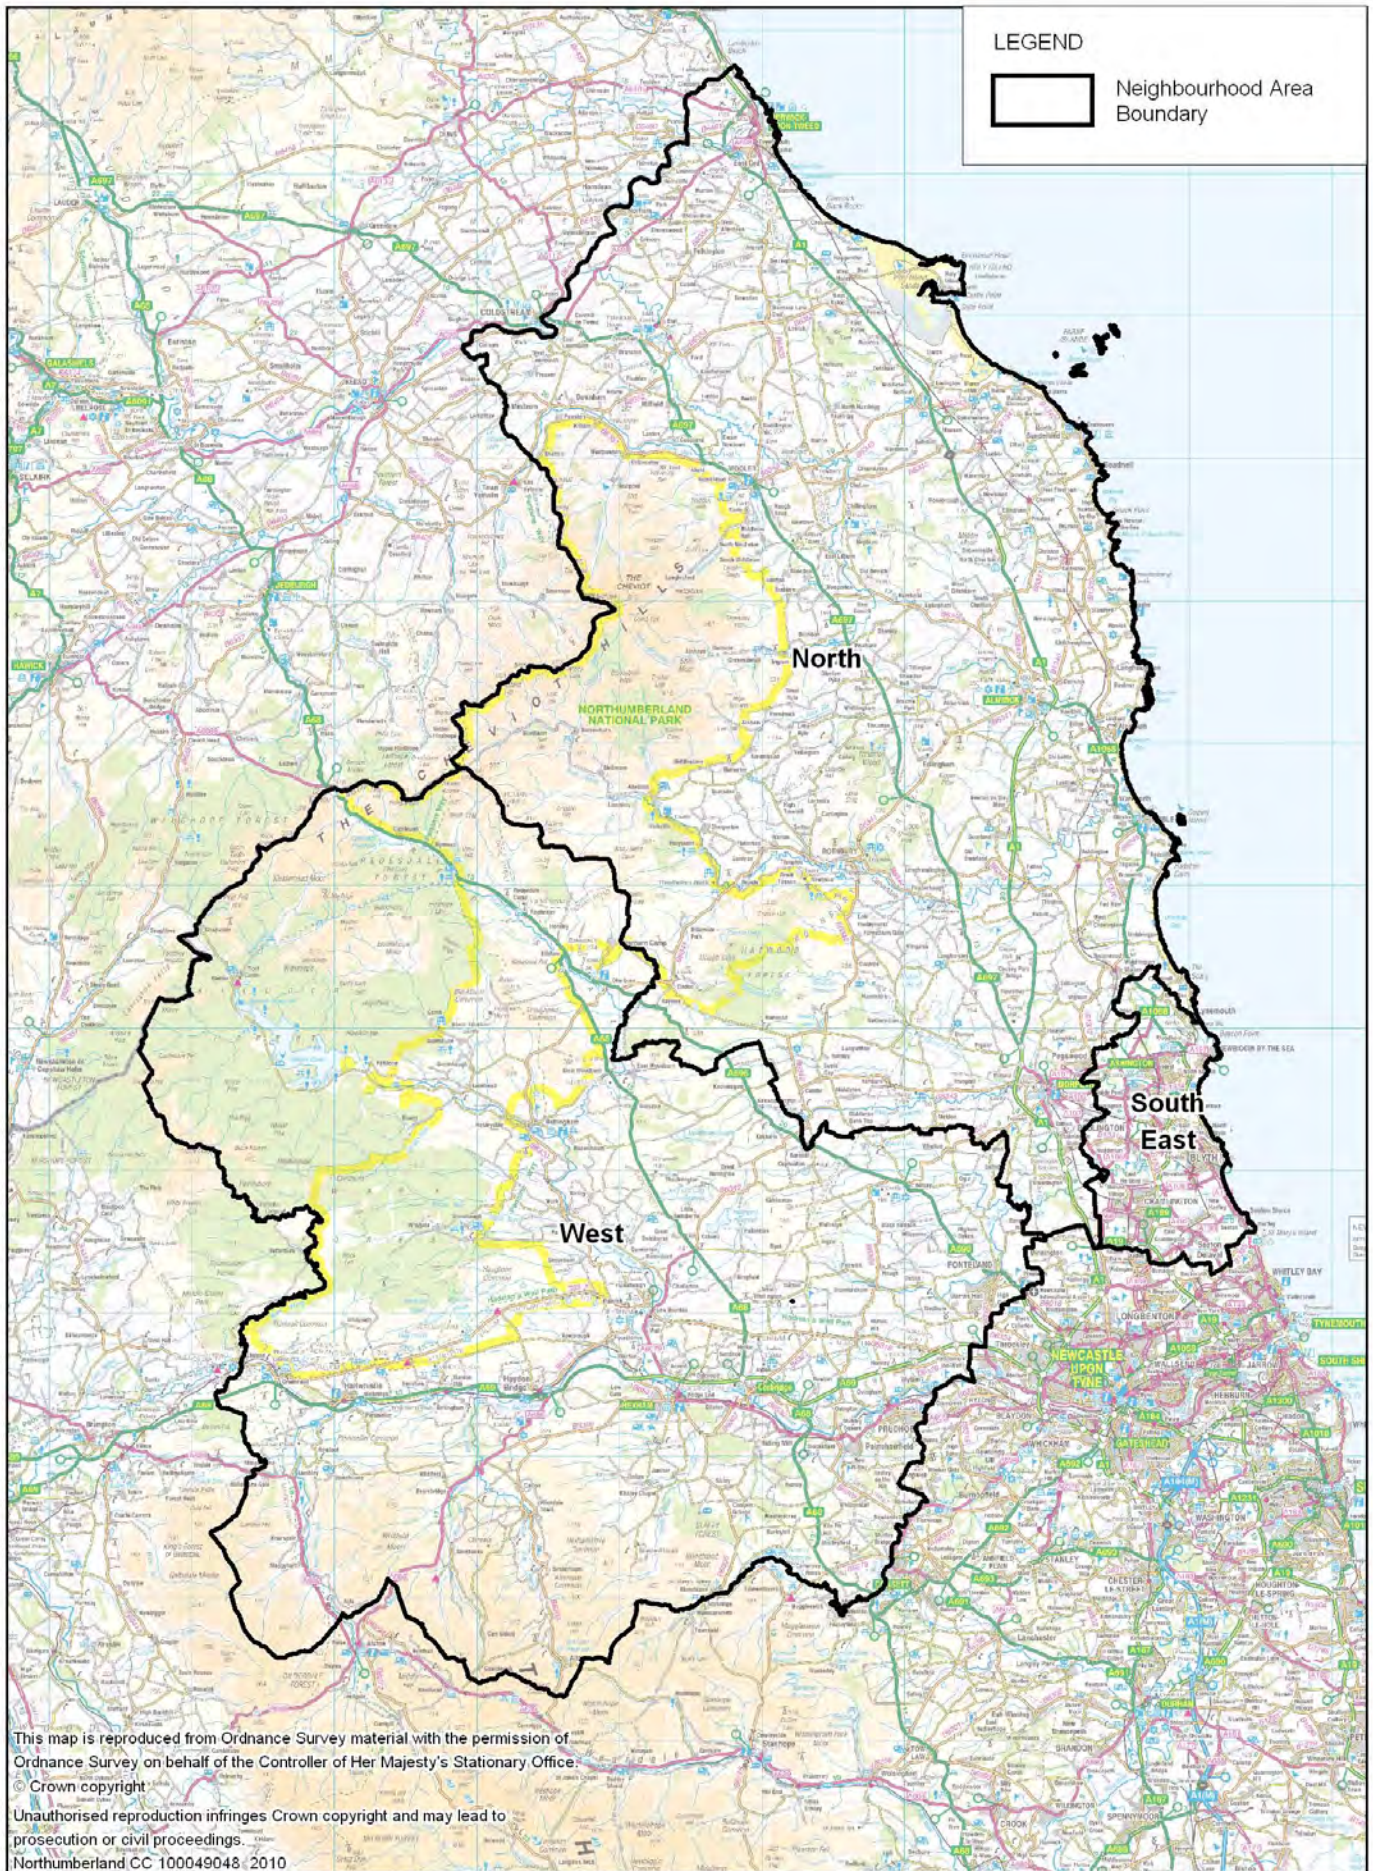

KEY CRITERIA	SUB CRITERIA											
MAIN ENTRANCE	Easy to Find	Obvious	Safe	Clean	Well Maintained	Litter Bin/Dog Bin						
SIDE ENTRANCE	Safe	Clean	Well Maintained									
SIGNAGE	Welcoming	Contact Detail	Name of Site	Site Map	Information	Well Maintained	Opening Closing Times					
BOUNDARY/ HEDGES / GATES/ FENCES	Well Maintained	Clearly Defined										
ROADS / PATHWAYS/ CYCLEWAYS/ ACCESSES	Suitable Materials	Level/Safe for use	Disabled Access	Well Defined Edges	Surface Clean	Weed Free						
FLOWER BEDS	Suitable use of plants	Weed Free	Edged	Well Maintained								
SHRUB BEDS	Suitable use of plants	Weed Free	Edged	Well Maintained								
YOUNG TREES	Appropriate mix	Well Maintained	Tree Ties Maintained	Trees Tagged								
MATURE TREES	Well Maintained	Adequate crown lifting	Trees Tagged									
CLOSE-MOWN GRASS AREAS	Full Grass Cover	Cleanly Cut	No Weed	No Clippings								
NATURALISTIC GRASS AREAS	Litter Free	Adequate Mowing Margins										
BINS	Numerous	Well Maintained	Emptied Regularly	Surfaced								
SEATS	Numerous	Well Maintained	Ease of Access	Provision for Disabled	Litter Bin Nearby							
TOILETS	Easy Access	Well Maintained	Good Condition	Safe to Use	Visible	Well Signed	Provision for Disabled					
PARKING	Adequate Spaces	Clean and Tidy	Good Condition	Well Signed	Safe to Use	Surface Markings						
LIGHTING	Good Lighting	Well Maintained										
INFORMATION BOARDS	Site Name	Adequate and up to date										
PLAY PROVISION	Signed	Rules	Safe	Well Maintained	Fence	Self Closing Gate	Bench	Bin	Equipment	Connected via path		

APPENDIX 3 - QUALITY AUDIT ASSESSMENT CRITERIA

KEY CRITERIA	SUB CRITERIA											
CLEANLINESS	Litter	Dog Fouling	Graffiti	Chewing Gum								
CEMETERY	Upright Graves	Vandalism	Tidy	Overgrown								
TENNIS COURTS	Surfacing	Fence	Posts	Nets	Line Marking	Secure Entrance	Correct Size	Adequate runoff	Floodlights	Information Board	Charges	Club House
BOWLING GREENS	Bench	Clean Gullies	Backboards	Turf	Fenced	Club House	Notice Boards	Floodlights	Staffed			
MUGA	Surfacing	Fence	Goals /Posts	Nets	Line Marking	Secure Entrance	Correct Size	Adequate runoff	Floodlights	Information Board/ Charges	Vandalism	
ALLOTMENTS	Water Supply	Condition of Plots	Disabled Access	Meeting Point	Composting
