HEIGH IN METRES

ORDNANCE SURVEY

SHEET NU 12 SE

SCALE 1:10 000

SYMBOLS

ROADS

Road — Track — Track — Path — Path

Where unfenced shown by pecked lines.

RAILWAYS

Cutting, Embankment — Multiple track

Road over — Single track

Road under — Level Crossing — Foot Bridge — Siding, tramway or mineral line

Standard gauge

Narrow gauge

VEGETATION

Bracken — Rough grassland — Heath — Marsh — Saltings — Reeds — Scrub — Coppice — Orchard — Coniferous trees — Non-coniferous trees

MISCELLANEOUS

Antiquity, (site of) — Boulders — Building — Lake, loch or pond — Sloping masonry — Chalk pit, clay pit or quarry — Gravel pit — Sand pit — Disused pit or quarry — Triangulation station

Pylon — Pole — Electricity transmission line

Glasshouse — Refuse or slag heap

Direction of flow of water — Shingle — Sand

BOUNDARIES

As notified to 1-4-78.

County (England and Wales), Region or Islands Area (Scotland)

District

London Borough

Civil Parish (England), Community (Wales)

Constituency (Co,Boro or Burgh)

0·91m FF 0 CF — Electoral Division or Ward. Example of change of mereing. Basic survey areas only

Imperial equivalents for metric boundary mereings: 0·91m = 3ft 1·22m = 4ft

Coincident boundaries are shown by the first appropriate symbol above, eg . . Boro Const & ED Bdy . . For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

HEIGHTS (METRES)

Values are given in metres above mean sea level at Newlyn.

Surface heights determined by: ground survey ·163m; air survey ·108m

Bench marks and their values are shown on large scale maps, and bench mark lists containing fuller and possibly later levelling information are obtainable from the Director General, Ordnance Survey.

Contours are at 5 metres vertical interval.

ROCK FEATURES

Loose rock — Boulders — Outcrop — Scree — Vertical face

CONVERSION SCALE

Metres - Feet

2000 Metres = 6500 Feet; 1500 = 5000; 1000 = 3000; 500 = 2000; 100 = 1000; 0 = 0; 100 Metres = 500 Feet

THE NATIONAL GRID REFERENCE SYSTEM

TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE Charlton Hall

The grid letters on this sheet are NU

EASTING
Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north and south margins. 17
Estimate tenths eastwards 8
178

NORTHING
Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east and west margins. 22
Estimate tenths northwards 3
223

Full 100 metre reference NU 178223

The full reference, above, is unique. If grid letters are omitted, the resulting reference 78223 recurs at intervals of 100 kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to one mile and larger, the grid letters are normally omitted.

At the eastern edge of this sheet True North is 0° 16′ West of Grid North and at the western edge 0° 12′ West of Grid North. Magnetic North was about 8° West of Grid North in 1978 decreasing by about ½° in three years

SURVEY DIAGRAM

THE NATIONAL GRID REFERENCE SYSTEM

The grid lines form part of the National Grid and are at 1km intervals.

To give a unique reference defining the position of a point to within 100 metres proceed as follows:—

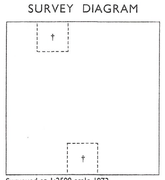

1. Take the two letters preceding the sheet number — TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... — 06
   Estimate tenths eastwards from the grid line to the point (distance e)..... — 8
   The resulting three figure number is the Easting... — 068
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... — 29
   Estimate tenths northwards from the grid line to the point (distance n)..... — 6
   The resulting three figure number is the Northing... — 296
4. The full 100 metre reference is given by writing first the letters, followed by the Easting and then by the Northing..... — TQ 068296

EXAMPLE from sheet TQ 02 NE

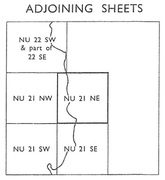

At the eastern edge of this sheet True North is 0° 23′ West of Grid North and at the western edge 0° 20′ West of Grid North. Magnetic North was about 8° West of Grid North in 1978 decreasing by about ½° in three years.

SURVEY DIAGRAM

Surveyed at 1:2500 scale 1973.
† Not published at 1:2500 scale.

HEIGHTS IN METRES

ORDNANCE SURVEY

SHEET NU 21 SE

SYMBOLS

ROADS

Road — Track — Track — Path — Path

Where unfenced shown by pecked lines.

RAILWAYS

Cutting, Embankment — Multiple track

Road under, Road over, Level Crossing, Foot Bridge — Single track — Standard gauge

Siding, tramway or mineral line — Standard gauge

Narrow gauge

VEGETATION

Bracken — Marsh — Coppice

Rough grassland — Saltings — Orchard

Reeds — Coniferous trees

Heath — Scrub — Non-coniferous trees

MISCELLANEOUS

Antiquity, (site of) — Lake, loch or pond

Boulders — Sloping masonry

Building — Chalk pit, clay pit or quarry

Gravel pit

Pylon, Pole — Electricity transmission line — Sand pit

Disused pit or quarry

Glasshouse — Triangulation station

Refuse or slag heap

Direction of flow of water — Shingle, Sand

BOUNDARIES

As notified to 1-9-76.

County (England and Wales), Region or Islands Area (Scotland)

District

London Borough

Civil Parish (England), Community (Wales)

Constituency (Co,Boro or Burgh)

0·91m FF, CF — Electoral Division or Ward — Example of change of mereing — Basic survey areas only

Imperial equivalents for metric boundary mereings: 0·91m = 3ft 1·22m = 4ft

Coincident boundaries are shown by the first appropriate symbol above, eg Boro Const & ED Bdy

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

HEIGHTS (METRES)

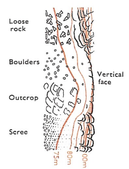

Values are given in metres above mean sea level at Newlyn.

Surface heights determined by: ground survey ·163m; air survey ·158m

Bench marks and their values are shown on large scale maps, and bench mark lists containing fuller and possibly later levelling information are obtainable from the Director General, Ordnance Survey.

Contours are at 5 metres vertical interval.

ROCK FEATURES

CONVERSION SCALE

Metres - Feet

2000 Metres = 6500 Feet; 1500 = 5000; 1000 = 3000; 500 = 1000; 100 = 500

0 Metres = 0 Feet

100 Metres = 500 Feet

ABBREVIATIONS

BP,BS	Boundary Post or Stone	Pol Sta	Police Station

GP	Guide Post	TCB	Telephone Call Box
MP	Mile Post	TCP	Telephone Call Post
MS	Mile Stone	W	Well

THE NATIONAL GRID REFERENCE SYSTEM

TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE Seaton Barns

The grid letters on this sheet are - NU

EASTING

Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north and south margins. Estimate tenths eastwards: 26 1/261

NORTHING

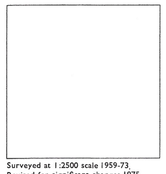

Take south edge of kilometre square in which point lies and read the large figures printed opposite this line on east and west margins. Estimate tenths northwards: 13 2/132

Full 100 metre reference NU 261132

The full reference, above, is unique. If grid letters are omitted, the resulting reference 261132 recurs at intervals of 100 kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to one mile and larger, the grid letters are normally omitted.

At the eastern edge of this sheet True North is 0° 23′ West of Grid North and at the western edge, 0° 20′ West of Grid North. Magnetic North was about 8¼° West of Grid North in 1976 decreasing by about ¼° in four years.

SURVEY DIAGRAM

Surveyed at 1:2500 scale 1959-73.
Revised for significant changes 1975.
Contours surveyed 1972.
Mean high water surveyed 1959-73.
Mean low water surveyed 1963-71.

ADJOINING SHEETS

1 square centimetre on this map represents 1 hectare (2·471 acres) on the ground.

1 metre = 3·2808 feet

1 foot = 0·3048 metre

A booklet, *Place names on maps of Scotland and Wales*, is published by the Ordnance Survey, and includes a glossary of the most common Gaelic, Scandinavian and Welsh elements used on Ordnance Survey maps of Scotland and Wales.

The representation on this map of a road, track or path is no evidence of the existence of a right of way.

Made and published by the Director General of the Ordnance Survey, Southampton.
