

Funded by UK Government

Additional £3.782m Budget 2023 highways maintenance and pothole repair funding, 2023 to 2024

Local highways maintenance: additional funding from 2023 to 2034

The 2023 budget announced an additional £200 million for the Pothole Fund to be spent on highways maintenance for the financial year 2023 to 2024. This funding has been allocated on a formula basis and Northumberland County Council was awarded £3.872m of this funding. This is in addition to the existing Local Transport Plan highways maintenance funding.

The Department for Transport (DfT) is committed to allocating this funding to local highways authorities so they can most effectively spend this funding on maintaining and improving their respective network, based upon their local knowledge, circumstances and priorities.

The Additional Highway Maintenance Capital Programme for 2023 - 24 to utilise this funding has been developed to address the deterioration of the highway network following a comprehensive review of the needs of all our roads.

The programme has been split into two packages of work: -

- Carriageway repair named schemes which will provide essential structural maintenance and resurfacing works over and above that already planned within the LTP.
- Small Works which will allow us to address those more discrete areas on the road network that are identified by the Area Teams to be in poor condition. Works will consist of smaller areas of resurfacing and structural patching.

A contingency amount has also been allowed in case any unexpected issues arise as designs are progressed and due to inflation or other potential cost increases.

2023 - 24 Highway Maintenance Additional DfT Funded Programme £3,872,000 - Approved June 2023

North Northumberland

Road No	Location	Description	Budget Estimate	Status March 2024
B6525	Barmoor Red House	Carriageway Repairs	£150,000	Complete
