Description

Alwinton is situated 16km west of Rothbury on the edge of Northumberland National Park.

Heavy rainfall on 28 June, 7 August and 25 September 2012 resulted in the flooding to properties. In addition to the Rose and Thistle public house and Alwinton Farm, five residential properties were flooded.

The source of the floodwater was the Hosedon Burn. The Burn overtopped spilling into adjacent land and flooding nearby properties.

Work to improve the public sewer system was carried out by Northumbrian Water Ltd two years ago, and residents state that this has alleviated drainage issues to some extent.

In September 2008 flooding occurred in Alwinton, affecting the same properties as identified in the plan above.

RMA Actions:

NCC *Exercised:* Communicated with Parish Clerk to ascertain issues.
 Proposed: Undertaken Flood Investigation Report

EA *Exercised:*
